## INFANT MORTALITY PROFILE

Where we live, learn, work and play has an impact on our health and the health of babies in our community.

CelebrateOne works with community leaders and residents in eight high-priority neighborhoods to make them safer and healthier for moms-to-be, babies, and families.

INFANT MORTALITY[1]

Infant mortality is the death of a child before they turn one year of age. In Central Ohio, black babies die at a rate 2.5 times that of white babies.

OUR GOAL

CelebrateOne is working to help our neighborhood thrive and for our neighbors to be as healthy as possible.
6 No more than 6 infant deaths per 1,000 live births!

1/2 Cut the disparity gap between white and black infant mortality in half!

Every baby deserves to celebrate his or her first birthday.

HEALTHY BABIES NEED HEALTHY NEIGHBORHOODS

Health is also related to the conditions where we live, learn, work and play. Health is quality schools, good jobs, safe places, decent housing… All of this and more determine the health of our neighborhood and babies.
