Columbus Division of Fire

Instructions for Ordering

Knox® Rapid Entry System Products Online

"In an effort to provide both fire department emergency access and building security, the Columbus Division of Fire has selected the Knox Box Public Safety Key Box System to accomplish these goals. This is a system that will allow the Division of Fire access to a key for non-destructive entry into a building. This is a voluntary system for commercial establishments within the City of Columbus, as well as all commercial and residential gates. In this program the building owner / occupant orders the correct device(s) to install on the building to secure keys for use by the fire department in an emergency."

Step 1

To Order Knox-Box Products, Go to
www.knoxbox.com/columbus

To Order FDC Protection Products, Go to
www.knoxbox.com/columbusohfdc

Step 2

Select product for purchase, enter installation address,
and proceed with checkout or eApproval.
