

You have a Choice

Columbus Power provides:

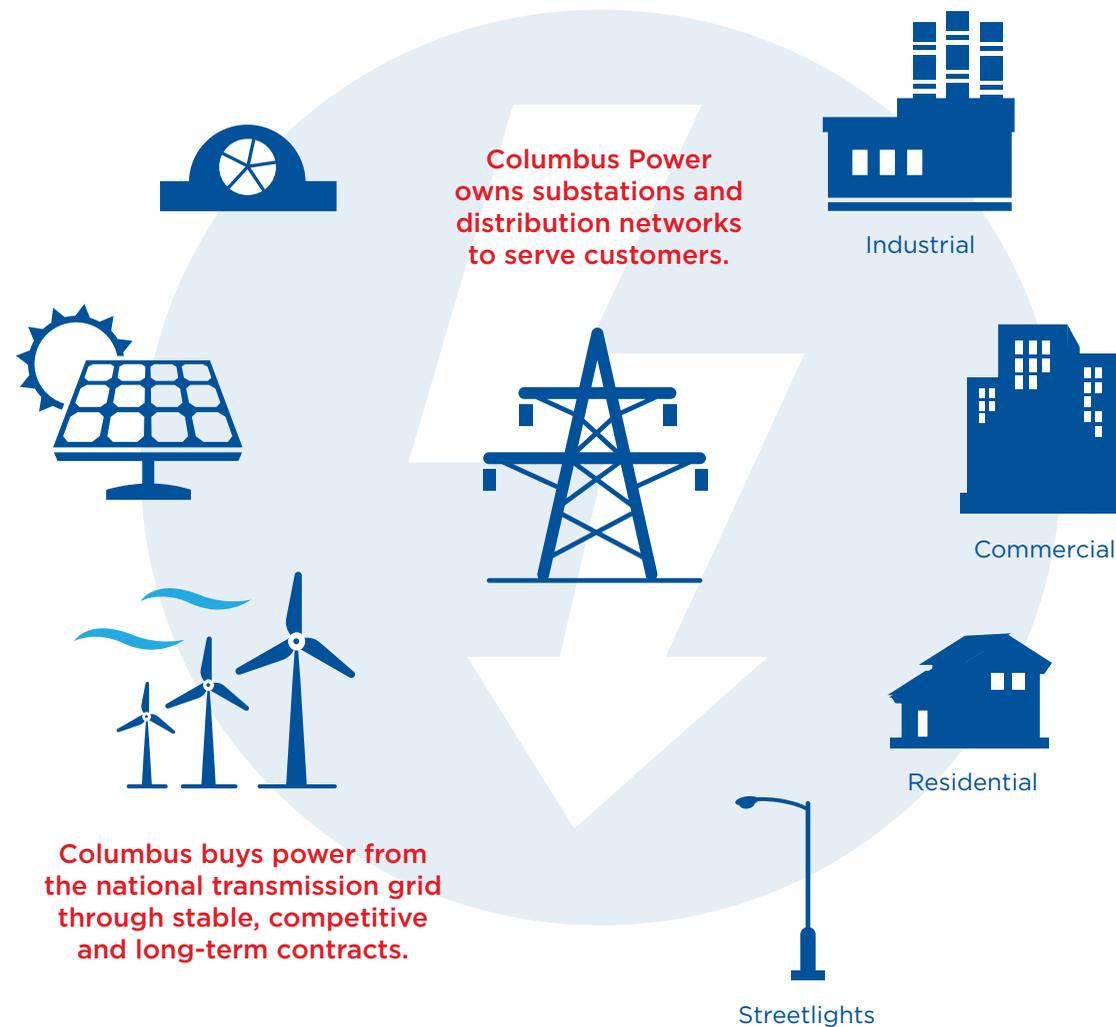

- **Reliable power**
- **Responsive service**
- **Stable, competitive rates**

Our residential rates are lower than the local commercial provider, and we have no hidden fees.

In the event of a main outage, power will be restored within hours, not days. We have an advanced Operations Dispatch Center, which is staffed 24/7. There will always be a live person to speak to when you call.

Our Customer Service, Operations and Maintenance personnel are based locally, and therefore provide highly responsive service to our customers.

Because our utility is owned and operated by the city, we are a nonprofit business. Our proceeds are used to fund city streetlights, which means the more customers we have, the more neighborhoods we can serve with streetlights.

Our Commitment

Our mission is to enhance the quality of life in Columbus by providing excellent service to our customers and the community through the reliable delivery of energy, modern streetlighting and related services.

About Us

The Columbus Division of Power is a full-service, publicly owned electrical utility that provides power to industry, business and residential customers through our own distribution system.

Columbus Power provides electricity to more than 12,000 industrial, commercial and residential customers with competitive and stable pricing.

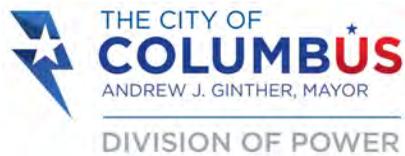

If you live within our service territory, please contact us to find out how we may be able to serve you.
