NOTE:
Plan designer shall be responsible to ensure that all bends,
valves, meters and/or backflow prevention assembly
lengths fit within the allotted space.

Refer to Division of Water Standard Details "L-617C".
L-602A & L-602B for additional information.

Use 90° Bend, if Domestic Only Service.

Note:
Meter Bypass must be installed in vertical position.

Manufacturer Approved Valves
(Butterfly Valves Prohibited)

Manufacturer Approved Valves
(Butterfly Valves Prohibited)

Minimum Clearance – 24"
Maximum Clearance – 30"

Zinc Coated All Thread

Flow

Relief Valve
(on RP’s only)

Fin. Funnel

Flow

For Wall Entry
Refer to L-6317C

For Wall Entry
Refer to L-6317C

Zinc Coated All Thread

Solid Concrete Supports under all Valves
and Meter Flanges, Solid Concrete Blocks may be used as well (Typical)
(Shim with Hardwood as Needed)

Manufacturer’s Drain Funnel
(shall be properly air gapped at relief valve)

Blocking per L-6310

Note: Meter Bypass not shown in Plan View for clarity.

24" Minimum Clearance

Use 90° Bend, if Domestic Only Service.

Zinc Coated All Thread
