Yet research tells us that those who do manage their anger are much more successful than those who don't. At the end of this workshop, you will understand how to: Recognize how anger affects your body, your mind, and your behavior. Use the five-step method to break old patterns and replace them with a model for assertive anger. Use an anger log to identify your hot buttons and triggers. Control your own emotions when faced with other people's anger. Identify ways to help other people safely manage some of their repressed or expressed anger. Communicate with others in a constructive, assertive manner.
