

## Residential Electric Vehicle Charging Rebate Program

### What is the EV Charging Rebate Program?

This program is for Division of Power customers who own an electric vehicle (EV) and need faster charging at their house or multi-unit dwelling.

Once the charger is installed and all the proper paperwork is submitted, you will be eligible to receive up to a \$500 rebate.

### Why take advantage of this program?

Statistics show most of EV charging is done at home.

Level 2 chargers are middle tier, capable of charging your EV in 3-4 hours.

Get up to \$500 to install your own Level 2 charging station.

### Other benefits

Reduce fuel emissions by not driving a gasoline powered car.

Save money in the long run because of less maintenance and less fuel.

**Get Connected, Columbus!**

### Other benefits

Reduce fuel emissions by not driving a gasoline powered car.

Save money in the long run because of less maintenance and less fuel.

### Applying for the EV Charging Rebate

- Contact an electrician to determine project scope.
- Fill out the pre-approval application online (web address below).
- Obtain the Minor Limited Scope Permit.
- Install your Level 2 EV charging station at home. You will have 90 days to complete your project.
- Schedule a 15 minute inspection.
- Complete the final application and send all required documents to:

Email: [evcharger\\_rebate@columbus.gov](mailto:evcharger_rebate@columbus.gov) or  
Mail: Columbus Division of Power/EV Rebates  
3500 Indianola Ave, Columbus, OH 43214

For more information about the program, pre-approval, required documents or the final application, please visit [columbus.gov/power](http://columbus.gov/power).

# Green Energy Program

## What is EcoSmart Choice®?

EcoSmart Choice® is a 100% renewable energy option available to residential, commercial and industrial customers.

## How does EcoSmart Choice® work?

Renewable energy has a naturally occurring source such as wind, solar, biomass, and hydroelectric, rather than fossil or nuclear fuels.

When you sign up for this program, EcoSmart will match your electricity usage with renewable energy certificates (RECs).

These RECs are taken off the market and cannot be resold; your purchase will be delivered to regional power grids.

Customers may opt out at any time with no penalty.

## Benefits

- Supports the Smart Columbus greenhouse gas emissions reduction goal.
- Increases the demand for renewable energy.
- Reduces the environmental impact of energy generation.

## New reduced pricing

To help our customers reach their green energy goals, the price for EcoSmart Choice® has been reduced from \$0.005/kWh to \$0.003/kWh. This is based on total usage and shows up on monthly bills. For example, a residential customer using 1,000 kWh would only pay an additional 3% that month.

Commercial and industrial customers can offset 25%, 50%, 75% or 100% with also the \$0.003/kWh or \$3/MWh. Offsetting at least 50% can help earn a LEED point.

## How do I enroll in EcoSmart Choice®?

Sign up online at [ecosmartchoice.org](http://ecosmartchoice.org)

- or -

Complete this enrollment slip and return it to:

City of Columbus  
 Division of Power
