

2019-2020 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 8th, 2019– Dec. 14th, 2019)

Highlights

- In week 50 of 2019, trends for the preliminary individual flu activity indicators were mixed compared to the previous week. Notable increases include medical facility lab positives, statewide PCP visits for flu or ILI, and influenza-associated hospitalizations. As a whole, flu intensity (composite indicator) continued to increase, is low and borders moderate.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, LOW
- Local medical facility labs reported 1,695 tests run with 247 (14.6%) positive results for week 50 of 2019.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms decreased compared to last week.
- In week 50 of 2019, the majority of individual local over-the-counter medication category sale trends tracked decreased (decrease in cough and cold, thermometer, pediatric anti-fever, adult anti-fever, and throat lozenge sales; increase in electrolyte sales; stable chest rub sales) compared to last week.
- In week 50, the U.S. seasonal influenza activity continues to increase and has been elevated for six weeks now. Please [visit the CDC website for specific information](#).

Local Flu Activity Dashboard *(All data are preliminary and may change as updated reports are received.)*

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 50, the preliminary Ohio¹ (statewide) influenza and influenza-like-illness (ILI) visit rate to athenaHealth® primary care providers (7.9 per 1,000 visits) increased compared to the previous week and is above its baseline average for the week (Figure 1). The week 50 percentage of all Emergency Department (ED) visits categorized as ILI decreased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 50 of 2019, 3.9% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.4% for week 50.

Laboratory Surveillance

During week 50 of 2019, reporting Franklin County sentinel medical facility laboratories tested 1,695 specimens, with 247 (14.6%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2019 through week 50 of 2019 is 15,452 with 536 (3.5%) positives (131 type A, 404 type B, 0 type A and B, 1 type unknown).

Nationally in week 50 of 2019, clinical laboratories reported 33,918 specimens tested for influenza viruses, 5,515 (16.3%) of which were positive (1,735 type A, 3,780 type B). In week 50, public health laboratories reported testing 1,413 specimens, 733 of which were positive (282 type A – of which 231 were A(H1N1)pdm09, 34 were H3N2, and 17 were not subtyped; 451 type B – of which 7 were Yamagata lineage, 310 were Victoria lineage, and 134 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 50 of 2019, Ohio clinical labs reported 18,805 specimens tested for influenza this season thus far. Positive results include: (21) A(H1N1)pdm09; (2) A/H3N2; (155) Flu A Not Subtyped, and (376) Flu B (through 12/14/2019). In week 50 of 2019, ODH Public Health Lab reported 67 positive influenza tests from various submitters this season so far. Positive results include: (21) A(H1N1)pdm09; (9) A/H3N2; (37) Influenza B (through 12/14/2019). Please visit the ODH website for more information.

ED Respiratory Visits

In the 50th week of 2019, the percentage of all ED visits categorized as respiratory decreased compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 50 of 2019, the majority of individual local over-the-counter medication category sale trends tracked decreased (decrease in cough and cold, thermometer, pediatric anti-fever, adult anti-fever, and throat lozenge sales; increase in electrolyte sales; stable chest rub sales) compared to last week.
