

Highlights

- In week 3 of 2020, despite recent decreases, some individual indicators show signs of rebounding upwards. As a whole, local flu intensity (composite indicator) increased slightly and remains HIGH.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, HIGH
- Local medical facility labs reported 2,762 tests run with 849 (30.7%) positive results for week 3 of 2020.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms decreased compared to last week.
- In week 3 of 2020, the trends for individual local over-the-counter medication category sales tracked were mixed (decrease in cough and cold, chest rub, adult anti-fever and throat lozenge sales; increase in thermometer and pediatric anti-fever sales; stable electrolyte sales) compared to last week.
- In week 3, U.S. key indicators that track flu activity remain high and, after falling during the first two weeks of the year, increased slightly this week. Please [visit the CDC website for specific information](#).

Local Flu Activity Dashboard *(All data are preliminary and may change as updated reports are received.)*

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 3, the preliminary Ohio¹ (statewide) influenza and influenza-like-illness (ILI) visit rate to athenaHealth® primary care providers (25.1 per 1,000 visits) increased compared to the previous week and is above its baseline average for the week (Figure 1). The week 3 percentage of all Emergency Department (ED) visits categorized as ILI decreased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 3 of 2020, 5.0% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.4% for week 3.

Laboratory Surveillance

During week 3 of 2020, reporting Franklin County sentinel medical facility laboratories tested 2,762 specimens, with 849 (30.7%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2019 through week 3 of 2020 is 30,517 with 4,762 (15.6%) positives (1,155 type A, 3,579 type B, 0 type A and B, 28 type unknown).

Nationally in week 3 of 2020, clinical laboratories reported 46,427 specimens tested for influenza viruses, 11,890 (25.6%) of which were positive (5,629 type A, 6,261 type B). In week 3, public health laboratories reported testing 1,262 specimens, 756 of which were positive (364 type A – of which 306 were A(H1N1)pdm09, 18 were H3N2, and 40 were not subtyped; 392 type B – of which 2 were Yamagata lineage, 308 were Victoria lineage, and 82 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 3 of 2020, Ohio clinical labs reported 42,760 specimens tested for influenza this season thus far. Positive results include: (130) A(H1N1)pdm09; (2) A/H3N2; (1,821) Flu A Not Subtyped, and (4,733) Flu B (through 1/18/2020). In week 3 of 2020, ODH Public Health Lab reported 285 positive influenza tests from various submitters this season so far. Positive results include: (116) A(H1N1)pdm09; (14) A/H3N2; (155) Influenza B (through 1/18/2020). Please visit the ODH website for more information.

ED Respiratory Visits

In the 3rd week of 2020, the percentage of all ED visits categorized as respiratory decreased compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 3 of 2020, the trends for individual local over-the-counter medication category sales tracked were mixed (decrease in cough and cold, chest rub, adult anti-fever and throat lozenge sales; increase in thermometer and pediatric anti-fever sales; stable electrolyte sales) compared to last week.
