

Human Terrain Mapping and Behavior Pattern Recognition

16-hour LEO Basic Course

Hosted by Columbus Division of Police, OH

May 14-15, 2020

HTMBPR is a science-based predictive analysis and proactive decision-making model. It's based upon lessons learned from the development of Human Behavior Pattern Recognition and Analysis (HBPR&A) programs for the Department of Defense. HTMBPR focuses on developing advanced critical thinking by understanding human behavior patterns. It provides a framework for Law Enforcement Officers to observe, articulate, document and defend decisions they make in the course of performing their duties by providing officers with the knowledge, skills and abilities to 1) observe a situation, orient themselves with in it, and make sound practical decisions in accordance with law and agency policy and procedure, and 2) then take legal, moral and ethically appropriate action(s). This is a tactical field decision-making model for intelligence-based policing.

The price per officer is **\$315.00**, this includes course registration, student materials, light snacks and refreshments. Students should arrive at **0730**, in order to sign in, as class will begin promptly at **0800**. On both days the course will run from **0800-1700/8:00AM-5:00PM** with a working lunch.
