In week 10 of 2020, individual flu activity indicator trends were mixed compared to last week, but values continue to be elevated. Overall, local flu intensity (composite indicator) decreased (fourth week in a row) slightly compared to last week and remains HIGH.

Geographic spread and local intensity designation (Click here for definitions) = WIDESPREAD, HIGH

Local medical facility labs reported 2,722 tests run with 560 (20.6%) positive results for week 10 of 2020.

The percentage of ED visits for both influenza-like illness (ILI) and respiratory symptoms increased compared to last week.

In week 10 of 2020, the trends for all individual local over-the-counter medication category sales tracked increased (increase in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.

In week 10, Flu activity as reported by clinical laboratories remains high but decreased for the fourth week in a row; however, influenza-like illness activity increased slightly. Please visit the CDC website for specific information.

^1Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

^2Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "=" Stable (-2% to +2%).

^3Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

^4Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

^5Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

^6Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.
Influenza Morbidity and Influenza-Like Illness (ILI) Reports
Updated statewide influenza and influenza-like-Illness (ILI) visit data from athenaHealth® was not available at the time of this report. In week 9, the preliminary Ohio¹ (statewide) influenza and influenza-like-Illness (ILI) visit rate to athenaHealth® primary care providers (35.0 per 1,000 visits) decreased slightly compared to the previous week and is above its baseline average for the week (Figure 1). The week 10 percentage of all Emergency Department (ED) visits categorized as ILI increased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 10 of 2020, 5.2% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage increased slightly compared to last week and is above the national baseline of 2.4% for week 9.

Laboratory Surveillance
During week 10 of 2020, reporting Franklin County sentinel medical facility laboratories tested 2,722 specimens, with 560 (20.6%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2019 through week 10 of 2020 is 52,155 with 11,419 (21.9%) positives (4,760 type A, 6,503 type B, 0 type A and B, 156 type unknown).

Nationally in week 10 of 2020, clinical laboratories reported 43,868 specimens tested for influenza viruses, 9,413 (21.5%) of which were positive (7,294 type A, 2,119 type B). In week 10, public health laboratories reported testing 1,513 specimens, 744 of which were positive (575 type A – of which 466 were A(H1N1)pdm09, 33 were H3N2, and 76 were not subtyped; 169 type B – of which 0 were Yamagata lineage, 130 were Victoria lineage, and 39 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 10 of 2020, Ohio clinical labs reported 71,110 specimens tested for influenza this season thus far. Positive results include: (536) A(H1N1)pdm09; (3) A/H3N2; (8,068) Flu A Not Subtyped, and (8,168) Flu B (through 3/7/2020). In week 10 of 2020, ODH Public Health Lab reported 886 positive influenza tests from various submitters this season so far. Positive results include: (516) A(H1N1)pdm09; (17) A/H3N2; (370) Influenza B (through 3/7/2020). Please visit the ODH website for more information.

ED Respiratory Visits
In the 10th week of 2020, the percentage of all ED visits categorized as respiratory increased compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales
In week 10 of 2020, the trends for all individual local over-the-counter medication category sales tracked increased (increase in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever, and throat lozenge sales) compared to last week.
