(IAT)

5. ADDRESSING  
IMPLICIT  
BIAS

An iceberg floating in a blue ocean under a blue sky. The tip of the iceberg is above the water, and the much larger base is submerged. The text 'Conscious Mind' is written in white above the water, and 'Subconscious Mind' is written in white below the water.

Conscious  
Mind

# DEFINE: IMPLICIT

*adjective*

1. implied, rather than expressly stated

Subconscious  
Mind

# DEFINE: BIAS

*noun*

1. Prejudice in favor of or against one thing, person or group when compared with another, sometimes in a way considered to be unfair.

**By the sheer virtue of differences in human experience, we each harbor bias in some way because we're all bringing something a little different to the table.**

# DEFINE: IMPLICIT BIAS

- Also known as implicit social cognition (implicit associations)
- Refers to attitudes/stereotypes
- Can be favorable or unfavorable assessments
- Activated involuntarily
- Resides deep in our subconscious

*(Source: Kirwan Institute For The Study of Race And Ethnicity; Understanding Implicit Bias; State of the Science: IMPLICIT BIAS REVIEW 2015)*

## 2. TYPES OF BIASES

1. WHAT IS  
IMPLICIT  
BIAS?

3. HOW IMPLICIT  
BIASES AFFECTS  
OUR ACTIONS,  
AND DECISIONS

4. IMPLICIT  
ASSOCIATION

(IAT)

5. ADDRESSING  
IMPLICIT  
BIAS

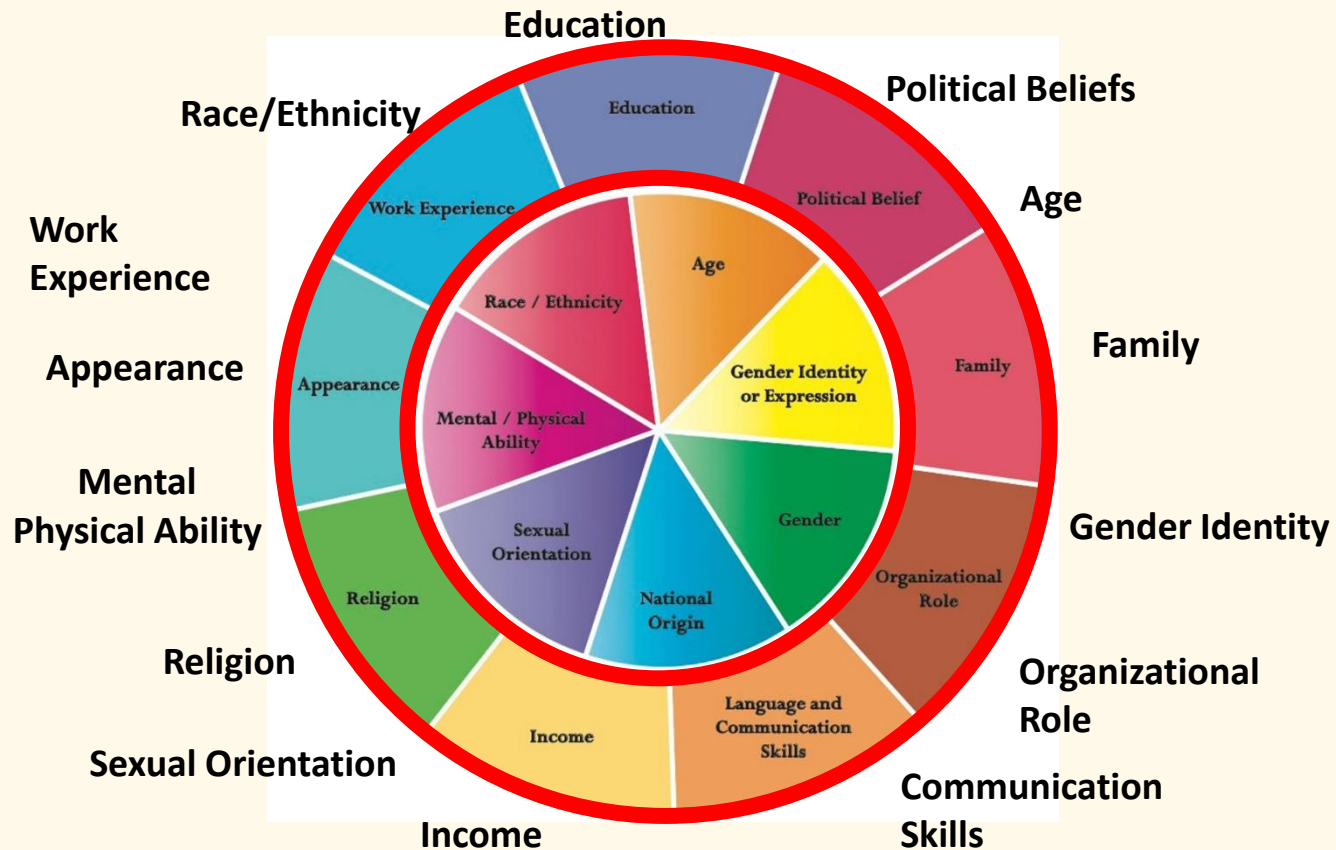

# THE USUAL SUSPECTS

**BIAS**

# DIVERSITY WHEEL

**BEAUTY BIAS:** Thinking the most handsome or tall individuals will be the most successful. There is evidence that it exists and that it leads to discrimination against less attractive people in a variety of areas, including hiring (i.e. Hooters).

**GENDER BIAS:** A tendency of unfair treatment of all genders because of their sex. If we look at just women and men, both have experienced **and** perpetrated gender bias. In employment, it can result in lower pay, loss of benefits or promotion.

**CONFIRMATION BIAS:** favors information which confirms previously existing beliefs or biases. An individual might even seek “proof” that further backs up their belief while discounting examples that do not support the idea.

مرحبا العالم! Hallo Welt!  
Hej Värld! Hello World!  
Ciao Mondo  
ハローワールド!  
¡Holá mundo! 世界您好!  
Salut le Monde!

**LINGUISTIC BIAS:** Linguistic bias is a type of language Bias towards speakers of other languages or dialects, or towards bilingual speakers.

# EXAMPLES OF OTHER TYPES OF BIASES:

- **CONFORMITY BIAS**: relates to bias caused by group peer pressure.
- **AFFINITY (LIKE ME) BIAS**: A tendency to warm up to *and trust* people like ourselves.
- **HALO/HORNS EFFECT**: we see one good/bad thing that colors our judgement.
- **ZIP CODE BIAS**: a set of beliefs that an area is better or worse than another and therefore may suffer/benefit accordingly.
- **AGE BIAS**: Unfair treatment in recruitment or granting promotions/privileges on the basis of age.

# BIASED LANGUAGE:

- Biased language is made up of words or phrases that might make certain people or groups feel excluded or underrepresented.
- Biased language includes **expressions that demean or exclude people because of age, sex, race, ethnicity, social class, physical or mental traits.**

# WARMTH + COMPETENCE

		Competence	
		Low	High
Warmth	High	<b>Paternalistic stereotype</b> low status, not competitive (e.g., housewives, elderly people, disabled people)	<b>Admiration</b> high status, not competitive (e.g., ingroup, close allies)
	Low	<b>Contemptuous stereotype</b> low status, competitive (e.g., welfare recipients, poor people)	<b>Envious stereotype</b> high status, competitive (e.g., Asians, Jews, rich people, feminists)

2 human traits govern social judgements and shape our emotions and behaviors towards individuals and groups

- **Warmth:** What are your intentions towards me?
  - Friend or a foe?
- **Competence:** What is the ability to carry out intentions?
  - Strong or weak

Source: Fiske et al. (2002). "A Model of (Often Mixed) Stereotype Content: Competence and Warmth Respectively Follow From Perceived Status and Competition." *Journal of Personality and Social Psychology* 82

# QUIZ TIME!

Look at each slide of the following pictures and note:

- High or Low **Warmth**
- High or Low **Competence**

As you look at each slide, note the observations, judgments and reactions that emerge.

# *AN INTRODUCTION TO THE IMPLICIT ASSOCIATION TEST*

VIDEO

Implicit Association Test

**Implicit Association Test - brought to you by Digital Intro at  
Wesleyan University Lisa Dierker**

<https://www.youtube.com/watch?v=EOPbf3Ponew>

# THE IMPLICIT ASSOCIATION TEST

- Measures the relative strength of associations between pairs of concepts
- Stronger implicit associations = less time to pair and less matching errors
- Weaker implicit associations = more time to pair and more matching errors

# THE IMPLICIT ASSOCIATION TEST

**Weapons IAT**: This IAT requires the ability to recognize White and Black faces, and images of weapons or harmless objects.

**Transgender IAT**: This IAT requires the ability to distinguish photos of transgender celebrity faces from photos of cisgender celebrity faces.

Harvard Implicit Association Test – Harvard University

Project Implicit

[Log In](#) [Take a Test](#) [About Us](#) [Learn More](#) [Technical Issues](#) [Contact Us](#) [Donate](#)

Race IAT

*Race* ('Black - White' IAT). This IAT requires the ability to distinguish faces of European and African origin. It indicates that most Americans have an automatic preference for white over black.

Disability IAT

*Disability* ('Disabled - Abled' IAT). This IAT requires the ability to recognize symbols representing abled and disabled individuals.

Gender-Science IAT

*Gender - Science*. This IAT often reveals a relative link between liberal arts and females and between science and males.

Weight IAT

*Weight* ('Fat - Thin' IAT). This IAT requires the ability to distinguish faces of people who are obese and people who are thin. It often reveals an automatic preference for thin people relative to fat people.

Age IAT

*Age* ('Young - Old' IAT). This IAT requires the ability to distinguish old from young faces. This test often indicates that Americans have automatic preference for young over old.

Sexuality IAT

*Sexuality* ('Gay - Straight' IAT). This IAT requires the ability to distinguish words and symbols representing gay and straight people. It often reveals an automatic preference for straight relative to gay people.

Gender-Career IAT

*Gender - Career*. This IAT often reveals a relative link between family and females and between career and males.

Religion IAT

*Religion* ('Religions' IAT). This IAT requires some familiarity with religious terms from various world religions.

Arab-Muslim IAT

*Arab-Muslim* ('Arab Muslim - Other People' IAT). This IAT requires the ability to distinguish names that are likely to belong to Arab-Muslims versus people of other nationalities or religions.

Weapons IAT

*Weapons* ('Weapons - Harmless Objects' IAT). This IAT requires the ability to recognize White and Black faces, and images of weapons or harmless objects.

Transgender IAT

*Transgender* ('Transgender People - Cisgender People' IAT). This IAT requires the ability to distinguish photos of transgender celebrity faces from photos of cisgender celebrity faces.

Presidents IAT

*Presidents* ('Presidential Popularity' IAT). This IAT requires the ability to recognize photos of Joseph Biden and one or more previous presidents.

Skin-tone IAT

*Skin-tone* ('Light Skin - Dark Skin' IAT). This IAT requires the ability to recognize light and dark-skinned faces. It often reveals an automatic preference for light-skin relative to dark-skin.

Asian IAT

*Asian American* ('Asian - European American' IAT). This IAT requires the ability to recognize White and Asian-American faces, and images of places that are either American or Foreign in origin.

Native IAT

*Native American* ('Native - White American' IAT). This IAT requires the ability to recognize typically White and typically Native last names.

# TRANSGENDER IAT SORTING INSTRUCTIONS

## Sorting Task Instructions

In this categorization task, you will sort images of both transgender and cisgender people. These are images of real people, some of whom you may know. To increase familiarity with the people in these images, we provided a short description of each. This page contains the transgender images, and the next page contains the cisgender images.

Again, "cisgender" refers to people who feel there is a match between the sex they were assigned at birth and the gender they feel themselves to be. "Transgender" refers to people who feel there is a mismatch between the sex they were assigned at birth and the gender they feel themselves to be.

Transgender Person	Name and Description
	Chaz Bono is a musician and actor.
	Chris Mosier is a triathlete.
	Laverne Cox is an actress.
	Caitlyn Jenner is a television personality.

Press the button below to learn about the cisgender images.

Continue

# TRANSGENDER IAT SORTING INSTRUCTIONS

## Sorting Task Instructions

This page contains more information about the cisgender images.

Cisgender Person	Name and Description
	Jon Favreau is an actor and director.
	Tyler Clary is a swimmer.
	Meagan Good is an actress.
	Meryl Streep is an actress.

Press the button below to begin the categorization task.

Continue

# IMPLICIT ASSOCIATION TEST

## Implicit Association Test

Next, you will complete the IAT. You will use the "e" and "i" computer keys to categorize items into groups as fast as you can. These are the four groups and the items that belong to each:

Category	Items
Good words	Nice, Pleasure, Laughter, Glorious
Bad words	Nasty, Agony, Hurt, Rotten
Cisgender People	
Transgender People	

There are seven parts. The instructions change for each part. Pay attention!

Continue

- Project Implicit -

# SORTING INSTRUCTIONS

Press "E" for

Bad words

or

Cisgender People

Press "I" for

Good words

or

Transgender People

## Part 3 of 7

Use the **E** key for Cisgender People and for Bad words.

Use the **I** key for Transgender People and for Good words.

Each item belongs to only one category.

If you make a mistake, a red **X** will appear. Press the other key to continue.

Go as fast as you can while being accurate.

Press the **space bar** when you are ready to start.

# RESULTS

**You have completed the study.**

During the Implicit Association Test (IAT) you just completed:

Your data suggest moderate automatic preference for Cisgender People over Transgender People.

## DISCLAIMER / HOW THE IAT WORKS

**Disclaimer:** These IAT results are provided for educational purposes only. The results may fluctuate and should not be used to make important decisions. The results are influenced by variables related to the test (e.g., the words or images used to represent categories) and the person (e.g., being tired, what you were thinking about before the IAT).

**How does the IAT work?**

The IAT measures associations between concepts (e.g., Cisgender People and Transgender People) and evaluations (e.g., Good words, Bad words). People are quicker to respond when items that are more closely related in their mind share the same button. For example, an implicit preference for Cisgender People relative to Transgender People means that you are faster to sort words when 'Cisgender People' and 'Good words' share a button relative to when 'Transgender People' and 'Good words' share a button.

Studies that summarize data across many people find that the IAT predicts discrimination in hiring, education, healthcare, and law enforcement. However, taking an IAT once (like you just did) is not likely to predict your future behavior well.

## 5. ADDRESSING IMPLICIT BIAS

1. WHAT IS  
IMPLICIT  
BIAS?

2. TYPES OF  
BIASES

3. HOW IMPLICIT  
BIASES AFFECTS  
OUR ACTIONS,  
AND DECISIONS

4. IMPLICIT  
ASSOCIATION  
TEST  
(IAT)

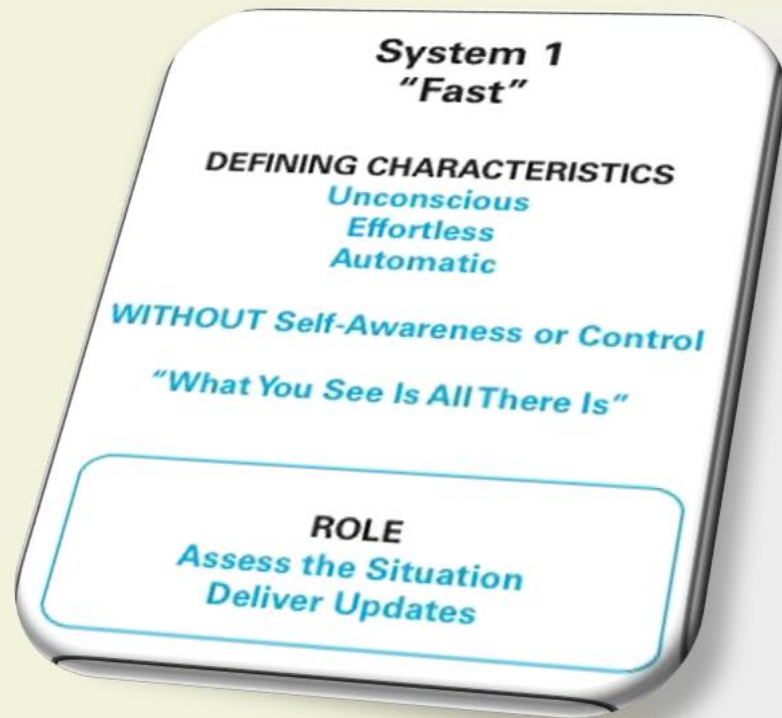

SO,...

**WHAT'S** **YOUR** **NEXT STEP** **?**

# HEURISTIC THINKING (HT) = SHORTCUTS

Start recognizing  
these shortcuts  
to prevent  
Implicit Bias from  
creeping in.

Conscious thoughts  
might not tell us when  
we have bias. Our  
brains work too fast.

# HOW FAST DOES IT WORK?

**15 milliseconds = 0.015 seconds**

# NOT SURE WHEN YOU ARE BIASED?

- Look for times where you're most susceptible to it
- At work, there are a few common places that implicit bias can affect you
  - When you're in a group
    - You might unconsciously ask the same person for input while ignoring other people
  - When you're stressed
  - When you are making a big decision
    - You may unconsciously promote younger employees over older employees (even with same qualifications.)

**Any of these moments, remind yourself of the biases that you know or think you have.**

# INTERRUPT YOUR BIAS IN THE MOMENT

So when Implicit Bias is active, you are in a physical & neurological process that moves really fast & is largely out of your control.

But that doesn't mean bias has to take over your decision making.

Just like you can calm yourself down if you get frightened, you can interrupt the process of Implicit Bias in the moment.

# UNDERSTANDING BIAS

- **Having biases does not make us bad**
- Every one of our decisions and interactions are influenced by factors within and outside of our scope of awareness.
- Our pre-existing reference points are our own limited version of the truth.
- They are powerful because they are anchored by predominant beliefs and feelings.

# **HOW TO ADDRESS IMPLICIT BIAS**

- Self reflection
- Open, honest dialogue
- Training and leadership development
- Communication and education for all

You are not responsible for your first thought.

But you are responsible for your second thought &  
your first action...

That is where your *power* lies.

*~Unknown*
