Pedestrian Hybrid Beacon (PHB)

Frequently Asked Questions

What is a Pedestrian Hybrid Beacon?

A Pedestrian Hybrid Beacon (PHB) is a marked crosswalk with overhead signal lights that indicate to drivers a pedestrian is crossing. Much like a traffic light at an intersection, the lights turn yellow for cars to slow down and red for them to stop for pedestrians.

Where will Pedestrian Hybrid Beacons be installed?

Pedestrian Hybrid Beacons will be installed along Cleveland Avenue at the intersections near the libraries, the Linden Branch at Kenmore Road and the Northern Lights Branch at Lehner Road.

How do I use a Pedestrian Hybrid Beacon to cross the road?

- 1. Push button to activate signal
- 2. Wait for the walk signal
- 3. Once the walk signal appears, look both ways before you cross
- 4. Cross the road carefully

Rectangular Rapid Flashing Beacon (RRFB)

Frequently Asked Questions

What is a Rectangular Rapid Flashing Beacon?

A Rectangular Rapid Flashing Beacon (RRFB) is a marked crosswalk with a bright Pedestrian Crossing sign and rectangular flashing lights that call attention to pedestrians crossing busy streets.

Where will Rectangular Rapid Flashing Beacons be installed?

Rectangular Rapid Flashing Beacons will be installed at the intersections of Cleveland Avenue and Agler Road, Lakeview Ave., Republic Ave., 19th Ave., and Camden Ave.

How do I use a Rectangular Rapid Flashing Beacon to cross the road?

- 1. Push button to activate flashing lights
- 2. Look both ways and cross the road carefully
