

**2013 Average Concentration of Metals in Com-Til and Com-Til Plus**  
 (All values in mg/kg)

|            | <b>COM-TIL</b> | <b>COM-TIL PLUS</b> | Maximum Value Allowed |
|------------|----------------|---------------------|-----------------------|
| Arsenic    | 8              | 8.4                 | 41                    |
| Cadmium    | 2.7            | 4                   | 39                    |
| Chromium   | 35             | 59                  | 1200                  |
| Copper     | 310            | 503                 | 1500                  |
| Lead       | 50.5           | 80                  | 300                   |
| Mercury    | 0.77           | 0.56                | 17                    |
| Molybdenum | 16             | 20                  | 35                    |
| Nickel     | 39             | 61                  | 420                   |
| Selenium   | 7.4            | 7.4                 | 100                   |
| Zinc       | 1650           | 2290                | 2800                  |

**Experience the Wonder of Plants Grown with COM-TIL**

Com-Til is a composted mix of biosolids from the City of Columbus Wastewater Treatment Plants, yard waste and wood chips. Com-Til Plus also contains some incinerator ash (sand).
