

Protecting Our Watershed

Makes It **Greener**, Keeps It **Cleaner**!

Benefits of Watershed Protection:

- Clean rivers for recreation
- Erosion control and pollution prevention
- Preservation of quality drinking water sources
- Healthy streams and habitat for animals and plants

We All Have a Hand In Water Protection

Activities across our watersheds directly impact the quality of streams and rivers.

You can help to protect our water resources by making smart choices.

Did You Know?

Water Fact:

A watershed is a defined area of land within which all water drains to a common stream or lake.
