Water System Name ____________________________________________________________

Project Title (same as listed on water supply data sheet): ____________________________

The following is a summary of the proposed pressure reducing stations:

<table>
<thead>
<tr>
<th>Station Name or Location</th>
<th>Flow Rate (gpm)</th>
<th>Inlet Pressure (psi)</th>
<th>Delivery Pressure (psi)</th>
<th>Relief Valve Pressure (psi)</th>
<th>Pressure Red. Valve Size (in.)</th>
</tr>
</thead>
<tbody>

</tbody>
</table>

The following is a summary of the proposed air relief valves:

1. How many air relief valves will be installed? __________________________

2. Will the relief pipes be screened? Yes ☐ No ☐

3. Will the pits be 3 feet above the 100 year flood elevation? Yes ☐ No ☐

4. Will the operation of the air relief valves be manual or automatic? If automatic air relief valves (not normally approvable) will be used, please provide justification.

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
5. If there is justification for using automatic air relief valves, will they be protected from the entrance of rain and flood waters?  

Yes ☐  No ☐

Provide a justification for any of the above questions which are answered “no”.
