Reverse Mortgages

- Reverse mortgages are loans that allow homeowners aged 62 and over to convert home equity (the amount they have paid into their home) into cash and to keep living at home for as long as they want. According to the National Council on Aging (NCOA), a reverse mortgage can help older adults make ends meet and stay independent, but they are not for everyone.
- The 2013 version of "**Use Your Home to Stay at Home**" is a helpful tool for decision-making related to reverse mortgages. The guide can be downloaded for free at www.ncoa.org/RMBooklet.
- Before getting a reverse mortgage, it is wise to get counseling from a government-approved agency. NCOA is one of nine approved counseling agencies. They will help you:
 - Evaluate the pros and cons of a reverse mortgage for your situation.
 - Apply for public and private benefits that can help you pay for needs like home energy, meals, and medications.
 - Find services in your community that can help you stay independent longer.

Universal Design

- Universal Design makes homes safer, easier and more convenient to live in for everyone of any age or ability. It involves having products and spaces that can be used by the widest range of people possible. There is a wide spectrum of human abilities. Everyone, even the most able-bodied person, passes through childhood, periods of temporary illness, injury and old age.
- Whether you are building a new home, or repairing or renovating an existing home, you too can incorporate, through home modification, characteristics of Universal Design. Home modification can vary from building a new home with universally designed features, to simple installation of lever door knobs on an older home to more complex structural changes in an existing home, such as installing a walk-in shower or an accessible ramp. The goal of home modification for existing homes is not to entirely redesign the home but to make a range of changes or repairs that result in your home being a comfortable, user-friendly, and safer place to live.
