**Subject:** Clintonville, Schreyer Springs Parking Impacts

**Date:** 10/17/2016

The current existing parking along residential streets where Green Infrastructure (GI) is being constructed within the Schreyer Springs Project area will not be impacted by the construction of the GI. All of the GI basin locations are located between the back of curb and the Right of Way line. The construction plans detail the GI locations where the 24-inch safe step-out area is located behind the curb. None of the proposed GI basins will impact the existing curb locations, horizontally or vertically.
