Forward

According to Chapter 1115.06, Regulated Substances are “chemicals and mixtures of chemicals which are hereby deemed to be a health hazard.” While this definition may seem to be all-encompassing, the actual chemicals on this list were not picked indiscriminately.

This Regulated Substances List is comprised of those chemicals regulated by the following:

- 1) Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)
- 2) Occupational Safety and Health Administration (OSHA)
- 3) Resource Conservation and Recovery Act (RCRA)
- 4) Safe Drinking Water Act (SDWA)
- 5) Toxic Substances Control Act (TSCA)

Many chemicals are referred to by their common, or trade names in everyday usage. For the most part, this list does not use common names, but rather specific chemical names as determined by the International Union of Pure and Applied Chemistry (IUPAC). For example:

COMMON NAME

Caustic Soda
 Quicklime
 TNT

IUPAC NAME

Sodium Hydroxide
 Calcium Oxide
 2,4,6-Trinitrotoluene or Benzene, 2-methyl-1,3,5-

While IUPAC names may seem inordinately complex, this convention is used so that there is no doubt as to which particular chemicals are in question. The other way to identify chemicals is by their Chemical Abstracts Service Registry Number (CASRN). Like the IUPAC name, a CASRN number is unique. Many times it is more convenient to refer to an individual chemical by its CASRN than by some long complicated name. Both name and number have been included on this list.

This document is organized into two sections. The first contains the complete list sorted by the chemical's name. The second contains the complete list sorted by its CASRN. Using the “Bookmarks” feature in Adobe Acrobat, one can advance to each of these sections.
