Revised: 11/8/2023

Permit Required

CFD Construction Safety Plan

For Construction, Alteration, Demolition Operations or System Impairments

The City of Columbus requires a Fire Safety Plan to be submitted by the building owner prior to the Construction, Alteration, or Demolition of any building or facility. Sections of the fire code that apply are the *Ohio Fire Code 901.7*, Chapter 33 and *NFPA 241*. It is highly recommended that a person on the jobsite or project is familiar with the applicable codes.

OFC 901.7 deals with fire protection systems that are out of service and what needs done to minimize the impairment. *OFC* chapter 33 and *NFPA 241* cover numerous safety issues. Egress, job site cleanliness, fire safety, heating equipment, propane storage and smoking are only a few of the issues covered. Again, it is vital that a person familiar with the fire code will assist you in order to have a safe and compliant job site. Safety is ultimately our goal. Not only for the public, but first responders as well.

The owner is ultimately responsible for filling out the plan. However, he or she can have a designee complete the forms.

An impairment occurs when a fire protection or detection system, fire alarm system or other system designed to maintain the fire resistance of the building element or structure is taken out of service, either wholly or in part, planned or unplanned. Fire protection or detection equipment subject to impairment management includes automatic sprinkler systems, fire protection water supplies, fire pumps, fire mains, gas extinguishing systems, foam systems, fire detection systems, water mist systems, powder systems, explosion suppression systems, fire doors, walls, ceilings, exits, egress, etc.

G. Preplanned impairments shall be authorized by the impairment coordinator Before authorization is given, a designated individual shall be responsible for Initial verifying that all of the following procedures have been implemented (OFC 901.7.4): The extent and expected duration of the impairment have been determined. The areas or buildings involved have been inspected and the increased risks determined. Recommendations have been submitted to management building owner/manager. A risk mitigation plan has been developed and will be implemented throughout the impairment. The insurance carrier, the alarm company, building owner/manager, and other authorities having jurisdiction have been notified. The supervisors in the areas to be affected have been notified. A tag impairment system has been implemented. Necessary tools and materials have been assembled on the impairment site. H. When impaired equipment is restored to normal working order, the impairment coordinator shall verify that all of the following procedures have been Initial implemented (OFC 901.7.6): Necessary inspections and tests have been conducted to verify that affected systems are operational. Supervisors have been advised that protection is restored. The fire department has been advised that protection is restored. The building owner/manager, insurance carrier, alarm company, and other involved parties have been advised that protection is restored. The impairment tag has been removed. I. A copy of the Fire Protection Impairment Plan; All System Impairment Permit(s), Fire Watch Logs, and Associated Documents shall be keep at the job site, in a **RED 3** Initial *Ring Binder*, for review by the Fire Code Official as needed.

FALSIFICATION OF A PUBLIC DOCUMENT IS A VIOLATION OF THE OHIO REVISED CODE, SEC. 2921.13(A) (5), A MISDEMEANOR OF THE FIRST DEGREE, PUNISHABLE BY UP TO (6) SIX MONTHS IMPRISONMENT & A FINE OF \$1,000.00.

Directions:

Complete the form above, once completed print and initial where indicated. Sign the last page and email the completed document to: <u>CFDConstructionSafetyPlans@columbus.gov</u> or click on SUBMIT button below.

The form will be reviewed and an email sent indicating if the form was accepted or rejected. Once accepted, random inspection(s) will be made to monitor compliance with the impairment plan. If violations of the plan is noted during these inspections construction will be halted until all violation have been corrected.
