1 - Introduction
About Columbus Citywide Planning Policies

Columbus Citywide Planning Policies (C2P2) serve as the basis for land use planning within the city of Columbus and specifically address land use and design in development review. C2P2 includes four primary elements: Guiding Principles, Design Guidelines, Land Use Policies, and Land Use Plans. The first three elements are applicable citywide, while Land Use Plans are area specific. Together, the four elements are used to guide community and city review of rezoning and variance applications. Table 1.1 (below) provides a description of each element.

<table>
<thead>
<tr>
<th>C2P2 Element</th>
<th>Description</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Guiding Principles</td>
<td>“Big picture” ideas that express how the city should develop and serve as the foundation for the Land Use Policies and Design Guidelines.</td>
<td>Citywide</td>
</tr>
<tr>
<td>Design Guidelines</td>
<td>Recommendations for the placement and design of development (what development should “look” like), including topics such as connectivity, setbacks, parking, open space, and natural resources.</td>
<td>Citywide</td>

Table 1.1

C2P2 and the Hilltop Area

Columbus City Council adopted Columbus Citywide Planning Policies for the Hilltop Plan Area on [future date to be inserted] in order to provide the Hilltop with the most up-to-date, best practices for land use and design. Unlike a static plan, updates to the C2P2 Guiding Principles, Design Guidelines and Land Use Policies (when adopted by City Council) will apply automatically to the Hilltop Area.

The Hilltop Land Use Plan is a primary element of C2P2 (for more information, see Table 1.1). The Land Use Plan was developed by city staff in partnership with the community to provide specific land use recommendations for property within the plan boundary. It includes a description of the Hilltop Plan Area (Plan Area), an existing conditions summary, a Recommended Land Use Map and Area Specific Policies. The Recommended Land Use Map directly corresponds to C2P2 Land Use Policies and applicable Area Specific Policies. Rezoning or variance applications are reviewed by city staff and the community for consistency with Columbus Citywide Planning Policies, including the Design Guidelines, Land Use Policies, and Land Use Plan. For more information on how to use the Hilltop Land Use Plan, see Using Columbus Citywide Planning Policies: Basic Steps on page 7.
Columbus Citywide Planning Policies are:

- **Adopted city policy.**
- **Used to guide community and city review of future rezoning and variance requests.**
- **NOT...** City code or law, and do not change existing zoning or zoning overlays already in place.
- **NOT...** used to address operational issues or issues unrelated to the built and natural environment, such as healthcare, code enforcement, and public safety. These items are outside the scope of the planning process.
- **NOT...** used to directly plan for traffic, congestion, or storm-water issues. (Instead, these matters are addressed as part of the development review process managed by the Department of Building and Zoning Services.)

Using Columbus Citywide Planning Policies: Basic Steps

Follow five basic steps to review development proposals using the Columbus Citywide Planning Policies:

**Begin with an area’s C2P2 Land Use Plan (Step 1-3):**

**Step 1:** Identify the location of the development on the Recommended Land Use Map located within the C2P2 Land Use Plan. Refer to the map legend to determine the recommended land use for the site location. Online mapping applications are also available at: www.columbus.gov/planning

**Step 2:** Refer to the Land Use Classification Table for a general description of the land use recommendation for the site.

**Step 3:** Review the Area Specific Policies located within the C2P2 Land Use Plan to determine if any apply to the site.

Then proceed to C2P2 Land Use Policies (Step 4):

**Step 4:** Review the C2P2 Land Use Policies (page 28-40) that corresponds with the land use recommendation for more specific policy information.

Then proceed to C2P2 Design Guidelines (Step 5):

**Step 5:** Refer to any relevant C2P2 Design Guidelines (page 15-27) for the proposed development.
Relationship to Existing Plans

The Hilltop Land Use Plan serves as adopted City policy and supersedes and replaces all previous plans and studies for the areas, including:

**Greater Hilltop Plan (2001)**
The Greater Hilltop Plan addressed issues pertaining to economic development, public safety, aesthetics of the neighborhood, community identity, along with traffic and circulation.

**The Greater Hilltop Plan Amendment (2010)**
The Greater Hilltop Plan Amendment served as an update to the 2001 Greater Hilltop Plan. The amendment addressed land use, urban design, economic development, and to a lesser extent, transportation.
2 – About the Plan Area
Plan Area

The Hilltop Land Use Plan Area (Plan Area) is located in the western portion of the city of Columbus. The area is served by the Greater Hilltop Area Commission.

The area’s 9,894 acres (approximately 15.46 square miles) are bounded by I-270 to the west, I-70 to the north, I-70 and the Indiana & Ohio Railroad to the east, and I-270 to the south (Figure 1-1). The Plan Area has a 2018 estimated population of 71,351 people comprising 26,160 households with an average household size of 2.69, and is located between the areas of the Westland, West Scioto, Franklinton, and Southwest Columbus. (Source: ESRI)
Plan Area Boundary Map

Figure 1-1

Hilltop Land Use Plan Boundary
Plan Area Overview

The Hilltop area is a large and diverse Columbus neighborhood located west of Downtown and adjacent to the Franklinton neighborhood. The oldest section of the Hilltop area was originally owned by Lucas Sullivant who was given the land as payment for his work as a surveyor for the Virginia Military District in the late eighteenth century. While Lucas Sullivant founded and settled in Franklinton, his son William Starling Sullivant, moved to the ridge west of the Franklinton area after his father’s death. The ridge came to be known as Sullivant’s Hill, the Hilltop’s original namesake. William Sullivant died in 1873, and a portion of his land was chosen as the site for the new Columbus State Hospital for the Insane. The Victorian-style asylum was completed in 1877, and at the time, was the largest building in the United States.

The Hilltop area had continued growth spanning several decades after the construction of the Columbus State Hospital. Population growth was spurred by new employment opportunities, the expansion of the streetcar system, and Columbus residents’ desire to move farther away from pollution and industry near Downtown. Some of the neighborhoods established in the early twentieth century include Glenwood Heights, Highland Terrace, Hilltonia, Wicklow, and Westgate. Post World War II, middle and working class residents continued to move to the Hilltop area and many were employed at the Delphi manufacturing plant. The Lazarus store opened in 1962 and Westland Mall opened in 1969 as an open-air concept. Both projects ushered in a new era of commercial development to the area.

Like many central city neighborhoods, Hilltop experienced population loss and economic challenges in the later portion of the twentieth century and into the twenty-first century. Despite these factors, neighborhood leaders are working with the City and other partners to foster continued investment, building on the elements that contribute to a thriving community. Civic groups in Hilltop include the Greater Hilltop Area Commission, Highland West Civic Association, Westgate Neighbors Association, South Central Block Watch, the Wilshire Heights Block Watch, Friends of the Hilltop, the Hilltop Business Association, and Summer Jam West.

Due to the history of development, the Hilltop area has a variety of commercial and residential architectural styles. Most commercial uses are located along West Broad Street and Sullivant Avenue with buildings that date from the early 1900s to current time. Residential architecture ranges from Italianate, Queen Ann, Second Empire, and Greek Revival to later styles such as Bungalow, Four-Square, Colonial, English Cottage, and Dutch Colonial Revival. Housing built after WWII is comprised mostly of Cape Cods and 1-story ranch style homes.

The grid street pattern in the Hilltop provides a high degree of connectivity for all travel modes, and the area is served by public transit service. The Central Ohio Transit Authority (COTA) #10 bus line runs east and west along West Broad Street as a frequent line (departure times every 15 minutes or better) and connects Westland, Downtown, Bexley, and Mt Carmel East. The COTA #6 bus line also serves the area with connections from the Hollywood Casino to the Arena Entertainment District, Downtown, Columbus State Community College, Linden and the COTA Northland Transit Center. The COTA #9 bus line and the #21 bus line serve the area connecting to Easton Town Center and Hilliard, respectively.
The area is also home to several noteworthy public and civic buildings. West High School was completed in 1929 and designed by Ohio-born architect Howard Dwight Smith who also designed the Ohio Stadium. Other significant buildings include Hoge Presbyterian Church, St. Aloysius Church, No. 17 Engine House, West Gate Lodge F & AM No 623, St. Mary Magdalene Catholic Church, John Burroughs Elementary School, Highland Elementary School, West Broad Elementary School, and the Columbus Metropolitan Library Hilltop Branch.

The Hilltop is home to many parks and recreation facilities. The largest park is Big Run Park (280 acres of parkland), Westgate Park is second largest (47 acres), and Wilson Park is a close third (46.5 acres). The Glenwood Community Recreation Center, Westgate Community Recreation Center, Holton Community Recreation Center, The Boys and Girls Club J Ashburn Center, and the Hilltop YMCA provide recreational and human services in the Hilltop area.

These citations will be documented in proper format in the final document:

Review of Recent Planning Efforts

Greater Hilltop Plan (2001)

Adopted in 2003, the Hilltop Neighborhood Plan considered such issues as economic development, public safety, streetscape improvement, traffic and circulation, and housing. Key recommendations focused on these issues with action steps identified for community stakeholders. The document took the form of a strategic action plan rather than a traditional land use plan and consequently was amended through an effort focusing on development issues.

Greater Hilltop Plan Amendment (2010)

The 2010 Greater Hilltop Plan Amendment built on the 2001 plan with an emphasis on land use and urban design. The plan amendment included recommended land use for all parcels in the area and design guidelines intended for use in reviewing development proposals.
Concurrent Planning Efforts

CelebrateOne (2015 – Present)

In June 2014, the Greater Columbus Infant Mortality Task Force ended its 6-month process with the release of its final report to the residents of Franklin County. In it were eight recommendations to reduce the community’s alarming infant mortality rate by 40 percent and cut the racial health disparity gap in half by 2020.

CelebrateOne was created in November 2014 to carry out the Task Force’s recommendations and ensure Franklin County meets its ambitious goal.

In the Hilltop, CelebrateOne works with residents and businesses in the community to make places where moms-to-be, babies and families live, learn, work and play healthier and safer. The work is driven by Community Connectors who help to reduce infant mortality by increasing the number of women of childbearing age connected to health and social supports within the Hilltop.

Hilltop Community Plan (2019)

The Hilltop Community Plan is a resident-driven planning effort designed to establish a vision for shared prosperity and growth based on the concerns, needs and aspirations of the community. The plan will develop strategies that address the needs of existing residents and businesses and explore opportunities for additional community growth. Areas of consideration include education, safety, housing and economic development.

The Hilltop Land Use Plan is a primary element of Columbus Citywide Planning Policies (for more information, see Table 1.1). Columbus Citywide Planning Policies provide Hilltop with the most up-to-date, best practices for land use and design. These policies and guidelines compliment the Hilltop Community Plan process, and together, these two planning efforts formulate a vision for the future of the Hilltop.
Existing Land Use

Land use describes the type of activity occurring on a site. Land use can generally be categorized as residential, retail, office, institutional, or industrial and is typically consistent with the zoning district assigned to the parcel. Existing land use in Hilltop is illustrated in Figure 1-3.

Combined residential uses comprise 48 percent of the area making it the most predominant land use in Hilltop. The majority of residential uses are single-family homes; however, areas of multifamily exist mixed into the residential neighborhoods east of Wilson Road, west of Georgesville Road, south of West Broad and along Wedgwood Drive south of Sullivant Avenue. The highest single existing land use category is Industrial and Warehouse at 16 percent of the total acreage (1340 total acres). Low Density Residential uses represent the second highest land use in the area at 14 percent of the acreage (covering 1146 acres at 4-6 dwelling units per acre). Big Run Park is the largest park in the area with 280 acres of parkland.
Figure 1-2

Existing Land Use

- Industrial and Warehouse: 14%
- Low Density Residential: 11%
- Very Low Density Residential: 6%
- Commercial: 8%
- Institutional: 9%
- Medium Density Residential: 14%
- Parks and Recreation: 6%
- Vacant: 3%
- Open Space: 4%
- Other: 16%
Hilltop Land Use Plan
Existing Land Use

Figure 1-3
Existing Zoning

The Plan Area includes 41 different City of Columbus zoning districts. The area also consists of parcels zoned by townships, but for the purposes of the plan, only City of Columbus existing zoning are summarized in this section. The M manufacturing district, characterized by industrial (mostly light industrial) and warehouse development, is the most common single zoning district in the area. Collectively, residential districts cover over 68 percent of the area. The most predominate residential zoning district is the R2 residential district; which covers 13 percent of the area. Commercial zoning districts cover 12 percent of the area, with the C4 commercial district being the most common. Commercial zoning is concentrated primarily along West Broad Street, Sullivant Avenue, Wilson Road and Georgesville Road. Pockets of commercial districts also exist in predominately residential areas. See Figure 1-4 and 1-5 for more information.

Commercial Zoning Overlays

The City of Columbus Zoning Code has three types of commercial zoning overlays designed to work in conjunction with underlying zoning districts to improve the character of commercial corridors, facilitate streetscape continuity, and encourage pedestrian-friendly development. The overlays regulate building placement, landscaping, graphics, lighting, parking, and other components of commercial site development and apply to retail, restaurant, and office uses.

The Hilltop Plan Area contains several commercial overlays. In total there are two Urban Commercial Overlay districts (UCO), two Community Commercial Overlay districts (CCO), and one Regional Commercial Overlay district (RCO). All three designations exist along different portions of the West Broad Street corridor. Sullivant Avenue has both the UCO and CCO designation on portions of the corridor. The RCO designation exists on portions of Georgesville Road. For more information on the exact limitations of the commercial overlays please refer to the City of Columbus’ online mapping resource, the Columbus Site Information Resource (http://gis.columbus.gov/csir/). Similar to all zoning regulations, the existing commercial zoning overlays are not affected or altered by the Hilltop Land Use Plan.
General Zoning Categories

- Lower Density Residential: 60%
- Manufacturing: 18%
- Commercial: 10%
- Higher Density Residential: 10%
- Institutional: 2%
Figure 1-5

Hilltop Land Use Plan
Existing Zoning (City of Columbus)
3 – Plan Process
Plan Process Overview

The planning process included existing conditions research, a review of existing plans, staff analysis, and public input. Planning staff engaged with community stakeholders (residents, business owners, and local developers) through area commission meetings, an open house and opens hours at the Hilltop Branch Library, two public open houses held in conjunction with the Neighborhood Design Center for the Hilltop Community Planning effort, online surveys, an interactive webmap, civic association meetings, and social media. After receiving community input, Planning Division staff prepared a draft plan for consideration by the Greater Hilltop Area Commission.

Summary of Public Input

Key areas of community input focusing on land use and urban design issues included the following:

- High density development is desired along the West Broad Street and Sullivant Avenue corridors, with more neighborhood oriented mixed use or commercial development along Sullivant Avenue
- More restaurants, shopping and entertainment uses are desired along the corridors and in the area
- There is a lot of untapped buying power in the area
- Preserving greenspace should be a priority
- Clean up the area – eliminate litter
- Good housing stock in the area
- The real estate prices are very affordable for both residential and commercial
- Home ownership needs to be encouraged more
- A more walkable environment is desired
- Redevelopment is welcome, but the historical character of the neighborhood should be preserved
- Too many used car lots, check cashing places, pawn shops and drive-through carry outs
4 - Recommendations
Recommended Land Use Map

The Recommended Land Use Map provides a land use recommendation for each parcel in the Plan Area and directly corresponds to C2P2 Land Use Policies and Area Specific Policies (pages 36-49). Development proposals within the Plan Area are reviewed for consistency with Columbus Citywide Planning Policies, including the Design Guidelines, Land Use Policies, and Land Use Plan (including the Recommended Land Use Map and Area Specific Policies). The given density ranges are guidelines for future development in an area and are intended to work in conjunction with C2P2 Design Guidelines. Density ranges do not guarantee minimum or maximum densities for development proposals. (For more information on how to use the Hilltop Land Use Plan, see *Using Columbus Citywide Planning Policies: Basic Steps* on page 11.)

For those portions of the Hilltop Land Use Plan that are currently in a township, the Plan’s recommendations would only apply in the event that the property was to be annexed into the city of Columbus.

In the Hilltop Plan Area, within existing residential neighborhoods, there are pockets of zoning districts that permit high or very high density residential but are developed at densities consistent with the existing neighborhood. In these cases, the higher intensity zoning district is generally considered to be an intrusion in a consistently developed neighborhood, and land use recommendations have been provided based on overall neighborhood development patterns.

The map legend corresponds with Table 1.2, which provides generalized descriptions of the land use classifications and density recommendations.
Key Recommendations

The Hilltop Land Use Plan is designed to be used with the C2P2 Land Use Policies and Design Guidelines to review development proposals. Some of the plan's key recommendations are:

**Design Guidelines:** The C2P2 Design Guidelines work with the Hilltop Land Use Plan to encourage high quality design for future development proposals in the Plan Area.

**Proposed Land Use:** The recommended land use map in the Hilltop Land Use Plan provides guidance for every parcel in plan area. Together with the C2P2 Land Use Policies, the map will be used to review development proposals.

**Mixed Use Development and Transit Corridors:** The Hilltop Land Use Plan recommends focused mixed use development on West Broad Street and Sullivant Avenue, as well as portions of Georgesville Road and Mound Street. This is based on the idea that these areas will continue to serve as the Hilltop’s “Main Street” and that these commercial areas represent transit corridors where new or more intense development is most appropriate.

**Protection of Employment Centers:** The Hilltop Land Use Plan designates several large areas with the Employment Center designation, which encourages the protection and expansion of employment related uses.

**Neighborhood Infill:** The Hilltop Land Use Plan supports new single family homes and doubles in the heart of the neighborhood.

**Area Specific Policies:** The Hilltop Land Use Plan provides focused attention on a number of issues. These include the use of commercial overlay standards within areas recommended for mixed use, future consideration of an urban mixed use zoning district along West Broad Street, support for preservation and reuse of contributing commercial and institutional buildings on West Broad Street and Sullivant Avenue, natural resource preservation in the undeveloped area south of Rea Avenue, providing policy guidance on the expansion of commercial uses beyond an alley, and several other topics. See the Area Specific Policies section for further detail.
Note – this map will be broken up into sections for the final document for readability. A larger pdf is available at: https://www.columbus.gov/planning/Hilltop/
# Land Use Classification Table

The Land Use Classification Table provides generalized descriptions of the Land Use Classifications used for existing and recommended land use. It provides examples of development for each classification, but is not all inclusive of the types of development that may occur in a classification. The Land Use Plan is to be used with Design Guidelines to review and comment on development proposals, and the relevant design guideline section for each classification is indicated in the table.

</tbody>
</table>

*Note: Density (gross) is typically measured in terms of dwelling units per acre. The calculation includes the area of the entire site including internal roads and vehicular circulation. Density calculations allow for clustering of units on a smaller portion of the developable site to accommodate natural resource preservation and larger open space designs.*
Hilltop Area Specific Policies

Introduction

Planning staff recognizes that each community has distinct land use situations in which more unique, specific land use guidance may be appropriate. In these cases, staff has developed Area Specific Policies (ASP) to respond to the unique attributes of the Hilltop area.

Area Specific Policy 1 – Mixed Use
Consideration of Commercial Overlays
Commercial and Mixed Use Classifications

Consideration should be given to the development of commercial overlays for areas on the Recommended Land Use Map designated as Commercial and Mixed Use. Until such time overlays are in place for the Hilltop Plan Area, appropriate overlay standards, (guided by the most proximate existing overlay and existing site conditions) should be used along with C2P2 Design Guidelines for areas designated Mixed Use on the Recommended Land Use Map. Priority will be placed on developments providing a mix of uses and hiding parking to the greatest extent possible in areas recommended for Mixed Use.

Commercial overlays that already exist on portions of West Broad Street and Sullivant Avenue are not impacted by plan policy.

Area Specific Policy 2 – Mixed Use
Consideration of Urban Mixed Use Zoning District
West Broad Street

Consideration should be given to establishing an urban mixed use zoning district for use on West Broad Street that would allow a mix of commercial, residential, and institutional uses. Any proposed district should consider incorporating design and parking standards from the Urban Commercial Overlay, permitting building heights over 35’, and including standards to ensure high quality development.

The goal of the district is to support/facilitate urban development on West Broad Street by providing greater flexibility of potential uses while ensuring pedestrian oriented development. Development within this district would not require the review of an appointed board, but would require staff review for consistency with the code and plan guidelines. This district would serve as a model for potential future application in additional commercial districts in Columbus.
Area Specific Policy 3 – Mixed Use
Development and Preservation of Sense of Place
West Broad Street
Sullivant Avenue

Contributing buildings along West Broad Street and Sullivant Ave add to the character of the neighborhood and are building blocks for developing vibrant, livable “main streets” in the Hilltop area. On the other hand, vacant lots and non-contributing buildings take away from the overall appeal of the corridor. The following policy is intended to encourage healthy redevelopment of W Broad Street and Sullivant Avenue, including the reuse, preservation and incorporation of contributing buildings* along these two corridors.

Mixed Use 3 is recommended for sites along W Broad Street. The Mixed Use 3 recommendation (unlimited density) will be supported when development is consistent with C2P2 Design Guidelines and achieves one or more of the following:
- A contributing building(s)* is preserved, adapted, and/or incorporated into new development; or
- A non-contributing building is razed and replaced; or
- Redevelopment of a vacant lot.

Mixed Use 2 is recommended for sites along Sullivant Avenue. The Mixed Use 2 recommendation (<45 du/acre) will be supported when development is consistent with C2P2 Design Guidelines and achieves one or more of the following:
- A contributing building(s)* is preserved, adapted, and/or incorporated into new development; or
- A non-contributing building is razed and replaced; or
- Redevelopment of a vacant lot.

While demolition control is not in place in the Hilltop (or most of the city), Area Specific Policy 3 is intended to encourage reuse and preservation of contributing structures by supporting higher density development where preservation is included in an overall development plan.

Maps indicating the location of contributing buildings along W Broad Street and Sullivant Avenue have been provided for reference only (Figures x.x and k.x – these will be included in the final document). Modifications and/or disrepair can result in a building no longer being considered contributing*.

Analysis of building conditions should be conducted at the time of development review to determine if a building is contributing.

*“Contributing building” is a building determined to exhibit the architectural elements and/or lot position common to the original neighborhood character of the Hilltop area, and arranged in relationships reflective of that character. Although typically found in buildings built before 1950, elements of this neighborhood character may be found in successive generation buildings.
Area Specific Policy 4 – Mixed Use  
Limited Retail  
Parkwick Drive and Georgesville Road

In these areas, a mix of uses are recommended, but retail uses are generally not supported. Retail may be considered when developed as a secondary use in support of residential, office or other primary uses.

Area Specific Policy 5 – Mixed Use  
Employment Center Focus  
West Mound Street and Ryan Avenue

In these areas, a mix of uses are recommended, with a focus on employment center uses. Retail may be considered when developed as a secondary use in support of residential, office or other primary uses. Residential may be considered when part of a large scale redevelopment of the site.

Area Specific Policy 6 – Employment Center  
Residential uses located within the Employment Center classification  
Areas north of West Broad Street, east and west of Wilson Road

Areas recommended for Employment Center may have scattered site residential uses located within the classification. The existing residential uses are supported, however, in the event that a residential site is proposed for redevelopment, the Employment Center recommendation would apply.

Area Specific Policy 7 – Employment Center  
Support for Employment Center in Residential areas  
East side of Big Run South Road (near Deer Path Drive)

In this area, Very Low Density Residential is recommended, with support for Employment Center uses due to the proximity of an existing job center. Employment Center development should include appropriate landscaping, screening and buffering along Big Run South Road and adjacent residential uses, as recommended by the C2P2 Design Guidelines.

Area Specific Policy 8 – Low Density Residential  
Support for Natural Resource Preservation  
North of Indiana & Ohio Railroad, south of Rea Avenue, east of Whitehorne Avenue

In this area, Low Density Residential with natural resource preservation is recommended. Site design for this area should include techniques such as clustering units on a smaller portion of the site and small lots sizes to support preservation of natural areas.
Area Specific Policy 9 – Mixed Use
Commercial and Mixed Use Development beyond an Alley
W Broad Street

W. Broad Street is the most active commercial corridor in the Hilltop and acts as a primary thoroughfare for both local and regional transportation. In order to support a mix of uses, dense residential development, and high-capacity transportation options along the corridor, it may be appropriate in some situations to support expansion of uses beyond an alley and into a residential district.

Consideration for an expansion of uses beyond an alley should be based on the following:

a. The proposed principle use (along the corridor) should be consistent with the adopted land use plan.

b. Proposals should comply with existing commercial overlay standards or be consistent with adjacent commercial overlay standards and C2P2 Design Guidelines.

c. New development should be designed to minimize or mitigate impacts, including noise and light, on the adjacent uses, especially residential uses.

d. Buffering and landscaping should be provided to minimize impacts on the adjacent neighborhood.

e. Proposals should attempt to preserve existing contributing structures along the corridor.
