

# FRANKLINTON Loop TRAIL

The vision of the Franklinton Loop is to provide a walking/cycling route throughout the historic Franklinton neighborhood. The Loop would be a combination of paved paths and on-street cycling facilities with direct connections to attractions, schools, parks, downtown, and over 120 miles of Central Ohio Greenways.

### 1 SOUDER/FRANKLINTON CONNECTION

- Connect to the Scioto greenway trail at Souder Ave. and Dodge Park
- Improve Souder bridge crossing and create a side path along Souder Ave. to Broad St.

### 2 BROAD ST.

- Connect to the future pedestrian and bicycle improvements along Broad St.

### 3 EAST LOOP

- An inner loop would extend trail into East and Central Franklinton just west of State Route 315

### 4 FRANKLINTON LOOP

- Greater loop would extend trail west into Franklinton to West Park Ave.
- Potential for improvements of street islands as park space

### 5 MOUND ST.

- Construct trail on south side of Thomas Ave. with connections under I-70 to Mound St. and future development around Cooper Stadium

### 6 ARTS DISTRICT

- Use levee, old railroad bridge and new trail bridge to create an elevated connection to the Franklinton Arts District

### 7 TRAILHEADS

- Dodge and Confluence Parks would provide north and south trailhead access for the loop

### 8 STREET CONNECTIONS

- Proposed and existing on-street facilities provide further connections from the trail into the community
