THE CITY OF COLUMBUS

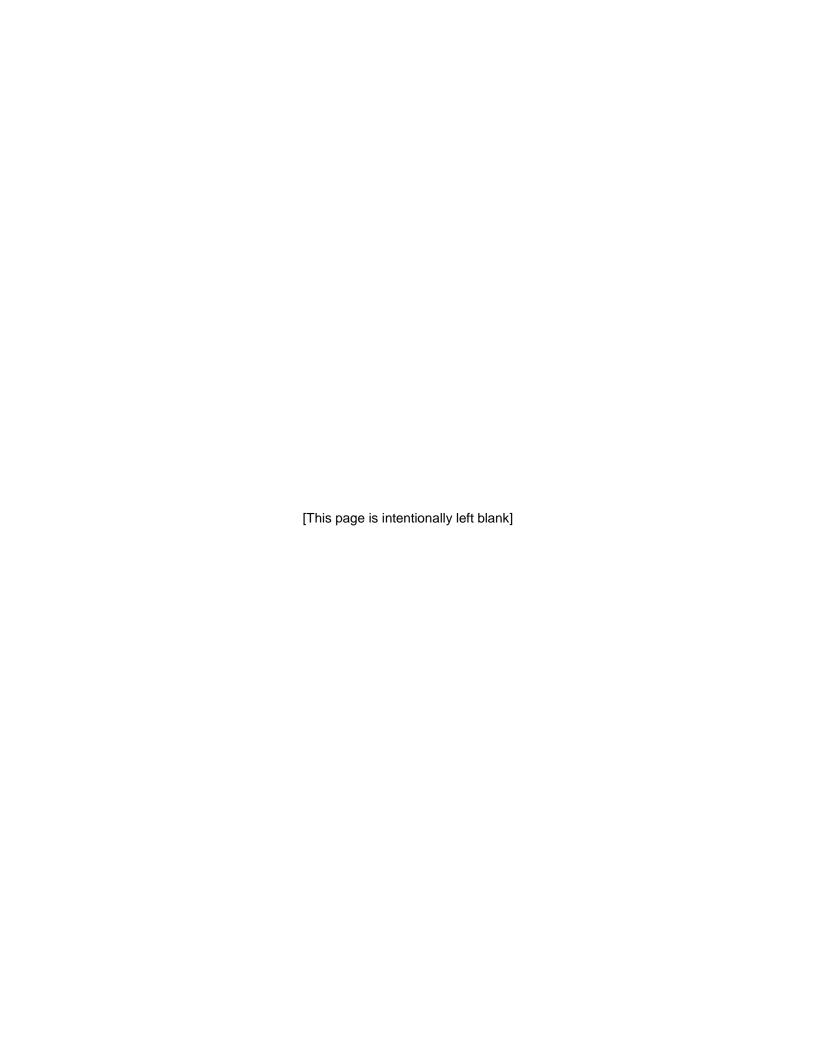

A Report on Its Bonds and Notes Outstanding at June 30, 2018 and June 30, 2019

Issued by
Megan N. Kilgore
City Auditor
July 30, 2019

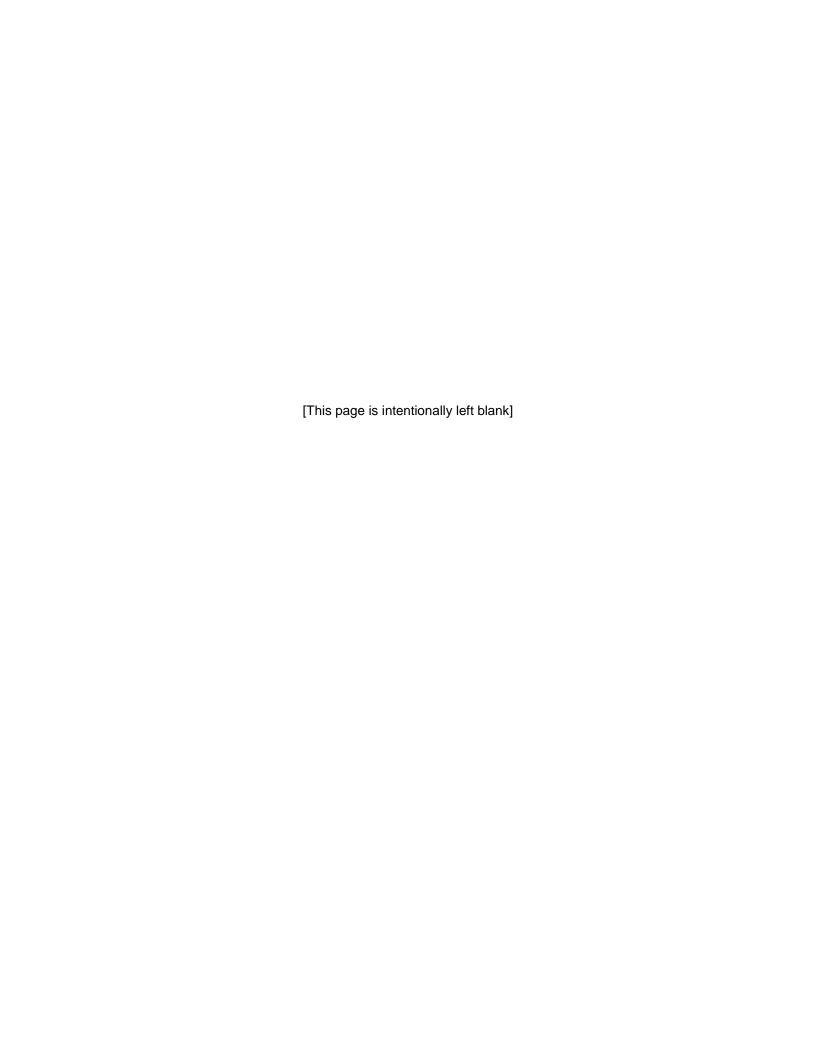

Special Notice

The City intends to go to market in October 2019 with a \$309,410,000 bond sale to support projects within the City's 2019 capital improvement budget. A preliminary list of projects to be financed include the following (subject to change):

Sanitary Sewer Enterprise	\$	77,400,000
Water Enterprise		72,200,000
Transportation		54,220,000
Recreation & Parks		24,370,000
Public Safety & Health		23,150,000
Construction Management		20,580,000
Storm Sewer Enterprise		11,400,000
Information Services		6,135,000
Refuse Collection		5,080,000
City Auditor- Financial Systems		5,000,000
Electricity Enterprise		5,000,000
Development		4,875,000
	<u>\$</u>	<u>309,410,000</u>

The bonds are expected to close on October 16, 2019.

All figures in this report are <u>exclusive</u> of the transaction described above.

RATINGS

The City's bond ratings are shown in the following table. These G.O. ratings were confirmed on September 21, 2018.

		Agency Rating	
Туре	Moody's	Standard & Poor's	<u>Fitch</u>
General Obligation Fixed Rate Bonds	Aaa	AAA	AAA
 2006 Sewer System Adjustable Rate G.O. Bonds 	Aaa/VMIG1	AAA/A-1+	AAA/F1+
 2014 Ref. Sewer System Fixed Rate Revenue Bonds 	Aa1	AA+	AA
• 2015 Ref. Sewer System Fixed Rate Revenue Bonds	Aa1	AA+	N/A
 2008B Sewer System Adjustable Rate Revenue Bonds 	Aa1/VMIG1	AA+/A-1+	AA/F1+

Liquidity needs for the 2008 Sewer System Series B Adjustable Rate Revenue Bonds and 2006 Sewer System Adjustable Rate G.O. Bonds are provided by the City's Treasury Investment Portfolio, which at June 30, 2019 was \$1.991 billion.

SYNOPSIS

- 1. The City continues to meet all legal requirements imposed by state and local statutes regarding its outstanding bonds and notes.
- 2. Financial debt margins for non-enterprise general obligation debt and income tax coverage ratios meet requirements.
- 3. The City continues to meet debt coverage requirements for both revenue and general obligation bonds of the City's enterprises.

The City operates five enterprises: a Water system; a Sanitary Sewer system; a Storm Sewer system; an Electricity system; and two City-owned parking garages. The Sanitary Sewer enterprise has both revenue and general obligation bonds outstanding. The Water, Storm Sewer, and Electric enterprises have only general obligation bonds outstanding. The Garage enterprise has only general obligation notes outstanding. The Water, Sanitary and Storm Sewer enterprises have loans outstanding administered by the Ohio Water Development Authority (OWDA).

4. Remaining unissued amounts and purposes of debt authorized by voters in 2008, 2013, 2016 and 2019 are shown in the following table.

^{*}The City expects to hold a new money sale in October 2019. Please see the special notice in the front of this report.

5. Of the City's general obligation bonds and long-term notes outstanding at June 30, 2019, \$2,105.0 million, or 73.01% of the total of \$2,883.1 million, matures within 10 years¹.

Of the revenue bonds outstanding at June 30, 2019, \$132.3 million, or 32.50% of the total of \$407.2 million, matures within 10 years².

Of the City's total outstanding bonds and long-term debt outstanding at June 30, 2019, 68.00% matures within 10 years^{1, 2}.

Please see the following tables for more detailed information on the City's bond principal 10-year payout and percentage of voted (unlimited) and unvoted (limited) general obligation bonds outstanding.

(1) Excludes Parking Garage short-term general obligation notes (\$2,500,000)

⁽²⁾ Excludes Component Unit (RiverSouth) lease revenue bonds (\$63,310,000); Notes (TIFs)- long-term fixed (\$5,520,350); OWDA/EPA Water loans (\$257,673,303); OWDA/EPA Storm loans (\$790,830) and OWDA/EPA Sewer Loans (\$967,170,059).

City of Columbus, Ohio Legal Debt Margins General Obligation Bonds and Notes

The following explanation of "Debt Limitations" has been extracted from the City's Official Statement dated October 17, 2018.

Direct Debt Limitations

Section 133.05, Ohio Revised Code, provides that the net unvoted general obligation debt of the City, excluding certain "exempt debt," (as further discussed below) shall never exceed five and one-half percent (5.50%) of the total value of all property in the City as listed and assessed for taxation. Section 133.05 further provides that the net general obligation debt of the City, including all voted and unvoted general obligation debt, but excluding exempt debt, shall never exceed ten and one-half percent (10.50%) of such total assessed valuation. The two limitations, referred to as the "direct debt limitations" may be amended from time to time by the General Assembly.

Ohio law provides that certain forms of municipal debt are exempt from the direct debt limitations ("exempt debt"). Exempt debt includes, among others, general obligation debt, to the extent that such debt is "self-supporting" (that is, revenues from the facilities financed are sufficient to pay applicable operating and maintenance expenses and related debt service and other requirements); bonds issued in anticipation of the collection of special assessments; revenue bonds; unvoted debt to the extent that the authorizing legislation includes covenants to appropriate annually from lawfully available municipal income taxes in amounts necessary to pay debt service charges on the obligations; notes issued in anticipation of the collection of current revenues or in anticipation of the proceeds of a specific tax levy; notes issued for certain emergency purposes; and bonds issued to pay final judgments. Notes issued in anticipation of such bonds are also exempt from the direct debt limitations.

Indirect Debt Limitations: The Ten Mill Tax Limitation

Ohio law requires that general obligation bonded indebtedness cannot be incurred or renewed unless provision is made in the legislation authorizing such debt for the levy of an *ad valorem* property tax in an amount sufficient to pay the principal of and interest on such indebtedness when due. Ohio law also provides that the aggregate amount of such taxes that can be levied for all purposes without a vote of the electors cannot exceed ten mills per one dollar of assessed valuation.

With respect to unvoted general obligation debt, these two requirements — the requirement that provision be made for the levy of taxes to support such debt and the requirement that the total amount of unvoted property taxes which can be levied cannot exceed ten mills per one dollar of valuation — have been construed by the Ohio Supreme Court to create an indirect debt limitation on the issuance by a political subdivision of unvoted general obligation debt.

The ten mills, which may be levied without a vote of the electors, are allocated among the overlapping political subdivisions of the State pursuant to a statutory formula. This "inside" millage allocated to each political subdivision is required to be used first for the payment of debt service on unvoted general obligation debt of the subdivision, unless provision has been made for payment of the debt from other sources; second for partial police and fire pension requirements; and, the balance for other general fund purposes. To the extent this millage is required for debt service, the amount that would otherwise be available for general fund purposes is reduced.

A subdivision's allocation of inside millage can be increased by action of the County Budget Commission pursuant to statute only in the event additional millage is required for the payment of debt service on its unvoted general obligation debt and, in that case, the inside millage allocated to the other overlapping subdivisions would be reduced to bring the aggregate levies of inside millage within the ten mill limitation.

The ten mill limitation applies even if the debt service on tax-supported obligations is expected to be paid from special assessments, utility earnings or other sources. However, revenue bonds and notes, payable solely from specifically pledged revenues, are not included in calculating debt subject to this limitation since neither the general revenue nor the full faith and credit of the issuer is pledged for their payment.

In determining whether or not unvoted general obligation debt to be issued by the City is within the ten mill limitation, it is first necessary to determine how much millage has already been committed for the outstanding unvoted general obligation debt of the City and how much millage has been committed by each overlapping political subdivision for its outstanding unvoted general obligation debt. The amount of such committed millage for each political subdivision is that which will be required for all of such subdivision's outstanding unvoted general obligation debt for that fiscal year in which the debt service charges of that subdivision for such debt will be the highest. In the case of notes issued in anticipation of bonds, the debt service requirements estimated for the bonds anticipated by the notes are used to calculate the millage required.

The City overlaps several political subdivisions and it is therefore necessary to determine, with respect to each such subdivision, how much millage that subdivision has committed for its outstanding unvoted general obligation debt. The aggregate millage that has been committed by that combination of overlapping subdivisions that yields the highest total of committed millage thus determines the millage within the ten mill limitation which is available and can be committed to service additional unvoted general obligation debt.

Such determinations are made by the County Auditor who has certified to the City that there is sufficient uncommitted millage within the ten mill limitation to service the City's unvoted general obligation debt.

The Indirect Debt Limitation

Computation of Direct and Overlapping Debt

Debt of the City, authorized by the Council but not by a vote of the electors, is subject to overlapping restrictions with each respective county and school district. Limitations apply to each county total and should not be considered cumulatively. Total debt service charges for any one year of all overlapping debt must not exceed ten mills (1%) of the assessed property value. This determination is made by the respective county auditors each time a subdivision proposes to issue unvoted debt.

The following table represents the estimated inside millage requirements for the City and its overlapping subdivisions as of June 27, 2019 for Franklin County, Fairfield County, and Delaware County. Other political subdivisions within Franklin, Fairfield or Delaware County may issue unvoted general obligation debt which would cause the requirements below to change. However, any such issues, including those of the City, will not exceed the indirect debt limit under Ohio law.

	Mills Required (1)			
Political Subdivision of State of Ohio	Franklin County	Fairfield County	Delaware County	
Direct				
City of Columbus	3.0641	4.3488	4.3487	
Overlapping				
County	0.7448	1.6242	0.4451	
School District	2.5465	-	0.2118	
Joint Vocational School District	-	0.0430	-	
Solid Waste Authority of Central Ohio	0.2544	0.2546	0.2573	
Township	2.0330	-	-	
Total Millage Required	8.6428	6.2706	5.2629	
Maximum Millage Permitted	10	10	10	
Remaining Millage Capacity	1.3572	3.7294	4.7371	

The City does not pay general obligation debt service from property taxes. General obligation debt service relating to enterprise funds is paid from the respective enterprise fund. All other general obligation debt service is paid from income taxes, certain charges for services, payments in lieu of taxes designated by the City for that purpose, and from special assessments.

(1) Mills required to pay debt service (principal and interest) for highest year during life of bonds. For Franklin County, the highest year for debt charges is 2025. For Delaware and Fairfield Counties, the highest year is 2020.

City of Columbus, Ohio Financial Debt Margins General Obligation Bonds and Notes

Debt service on the City's non-enterprise general obligation bonds and notes, both voted and unvoted, is primarily paid from income tax. Other lesser resources, special assessments, a portion of recreation fees, and certain Internal Service Fund resources also provide debt service monies for certain general obligation bonds.

General obligation bonds and notes are legally supported by property taxes, either those taxes already levied (for unvoted debt) or those taxes that the City has authority to levy (for voted debt) but has assured the taxpayers that it will not do so. Property taxes presently levied by the City are used to support general fund operations. Therefore, in order to avoid reducing general fund resources and/or imposing additional property taxes it is not only prudent, but also very important that we maintain income tax debt service coverage ratios that will withstand the volatility of all the assumptions that go into projecting debt service needs 10 to 20 years into the future. These coverage ratios are, therefore, self-imposed disciplines.

The City maintains a minimum coverage ratio within its income tax debt service fund of 1.5 X debt service and other expenditure requirements for non-enterprise general obligation bonds. Coverage is defined as estimated incoming resources during a current year less estimated outgoing resources of the current year added to the available resources at the end of the previous year then divided by the debt service and other expenditure requirements.

The City projects the resources and planned debt activity over a ten-year period and maintains the coverage requirement throughout the projected period. The City recognizes that debt service requirements are fixed in place for many years, whereas, income tax collections can vary with economic cycles. Also, the income tax rate cannot be increased beyond its present rate of 2.5% without a vote of the City's electorate.

City voters approved an income tax rate increase from 2.0% to 2.5% in a special election held on August 4, 2009. The new rate became effective on October 1, 2009.

The City borrowed a total of \$29,500,000 through the issuance of bond anticipation notes in 2009, of which \$2,500,000 remains currently outstanding (maturing June 26, 2020). The proceeds were used to acquire and construct an approximately 770-space parking garage located at the corner of Rich and Front Streets and an approximately 679-space parking garage located at the corner of Fourth and Elm Streets. The City pays debt service on these bonds from (i) special assessments which have been levied in order to pay a portion of the cost of the Fourth and Elm Garage, (ii) TIF revenues generated in the downtown area to pay a portion of the cost of the garages; and (iii) parking revenues received from the operation of the garages.

City of Columbus, Ohio Financial Debt Margins Revenue Bonds

The City operates five enterprise activities: a Water system, a Sanitary Sewer system, a Storm Sewer system, an Electricity system, and two City-owned parking garages. Only the Sanitary Sewer Enterprise has revenue bonds outstanding. Water, Sanitary Sewer and Storm Sewer Enterprise systems have loans outstanding administered by Ohio Water Development Authority (OWDA).

The City is in compliance with all requirements contained in the enterprises' bond indentures.

Revenue bonds of the Sanitary Sewer Enterprise are supported solely by user charges, excluding assessment bonds and notes which are supported by respective assessments. Tax revenues are not used. As indicated in the past, the higher the debt, the higher the user rates.

TOTAL

Total outstanding bonds and notes of the City of Columbus at June 30, 2019 were:

FOUR BILLION FIVE HUNDRED EIGHTY-SEVEN MILLION DOLLARS

In 2018, approximately TWENTY-THREE CENTS (22.86%) of every dollar of the City's total revenue was directed toward payment of principal and interest on debt.

The weighted average interest rates⁽¹⁾ of the City's total outstanding bonds and loans were:

Bond Type	<u>6/30/18</u>	<u>6/30/19</u>
General Obligation	4.0001%	4.0517%
Revenue	3.2966%	3.1968%
Combined	3.7403%	3.7340%

Following is additional current and ten-year historical data on the City's TOTAL outstanding bonds and notes.

^{(1) (}Face) or (coupon) rates; not reflecting the benefit of premium received.

Total				
Amount Outstanding	\$ 2,386,510,000	\$	496,554,945 (1)	\$ 2,883,064,945
Percentage (%)	82.78%		17.22%	100.00%

⁽¹⁾ Excludes Parking Garages Enterprise (\$2,500,000) short-term general obligation notes.

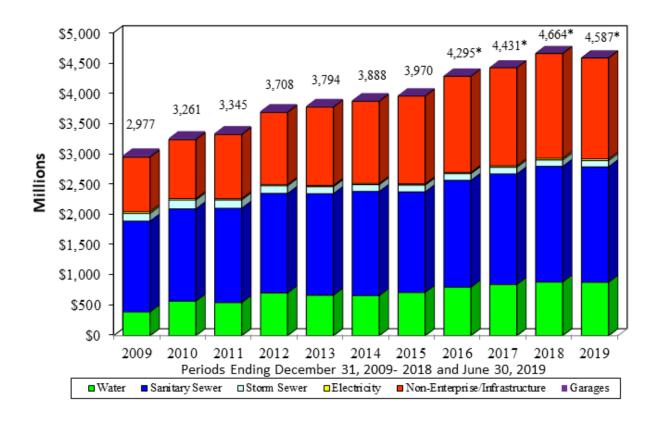

City of Columbus, Ohio

Percent of Total Revenues Directed Towards Debt Service For the Years Ended December 31 (in thousands, except %)

	Revenues (1)	Debt Service (2)(3)	% of Revenues Directed Towards <u>Debt Service</u>
2009	\$ 1,452,752	\$ 324,562	22.34%
2010	1,637,123	338,410	20.67
2011	1,704,416	335,371	19.68
2012	1,733,457	361,934	20.88
2013	1,753,583	376,808	21.49
2014	1,769,706	389,039	21.98
2015	1,817,892	431,300	23.73
2016	1,878,314	428,923	22.84
2017	1,989,414	450,729	22.66
2018	2,037,921	465,936	22.86

- (1) Above revenues represent revenues of the City's General, Special Revenue and Debt Service funds and operating and non-operating revenues of the Enterprise funds. Internal Service funds revenues, since they are derived from other funds of the City, Capital Projects funds and Fiduciary funds are excluded.
- (2) The above debt service represents all funds of the City and includes, therefore, debt service expenditures from the Governmental funds; also interest expense, interest capitalized and principal payments on bonds and loans in the proprietary funds.
- (3) Debt service in 2018 includes \$327.889 million principal and \$138.047 million interest.

City of Columbus, Ohio Total Outstanding Bonds and Notes

^{*} Years prior to 2016-Excludes \$10 million special obligation notes and bonds limited to revenues from three TIFs and only if such revenues are available.

 - B-Bond
 - STN Short Term Note
 - LTN Long Term Note

- Weighted average interest rate on the outstanding principal.
- ** The interest rates identified above are calculated using the actual coupon rates on each series of bonds or notes. The rates are not representative of the true interest costs to the City. As a result of low interest rates, the market for the sale of the City's bonds and notes has frequently produced bids at a stated coupon rate with a premium payable upon the sale of the securities, which creates a true interest cost (TIC) substantially less than the coupon rate.

Subtotal Sanitary Sewer

\$ 937,157,482

^{*} Weighted average interest rate on the outstanding principal.

Legend

- D T Debt Type
 - L Limited
 - U Unlimited
 - R Revenue
 - A Assessment
- D F- Debt Form
 - B Bond
 - STN Short Term Note
 - LTN Long Term Note
- ** The average interest rate for the Series 2008B Adjustable Rate Sewer Revenue bonds for the first six months of 2019 was 1.6181% and 0.5311% since their inception. The average interest rate for the 2006 Sanitary Sewer G.O. Adjustable Rate bonds for the first six months of 2019 was 1.6181% and 0.8686% since their inception.
 - The interest rates identified above are calculated using the actual coupon rates on each series of bonds or notes. The rates are not representative of the true interest costs to the City. As a result of low interest rates, the market for the sale of the City's bonds and notes has frequently produced bids at a stated coupon rate with a premium payable upon the sale of the securities, which creates a true interest cost (TIC) substantially less than the coupon rate.

Legend

D T - Debt Type

- L Limited
- U Unlimited
- R Revenue
- A Assessment

D F- Debt Form

B - Bond

STN - Short Term Note LTN - Long Term Note

Weighted average interest rate on the outstanding principal.

The interest rates identified above are calculated using the actual coupon rates on each series of bonds or notes. The rates are not representative of the true interest costs to the City. As a result of low interest rates, the market for the sale of the City's bonds and notes has frequently produced bids at a stated coupon rate with a premium payable upon the sale of the securities, which creates a true interest cost (TIC) substantially less than the coupon rate.

- * Weighted interest rate on the outstanding principal.
- ** The interest rates identified above are calculated using the actual coupon rates on each series of bonds or notes. The rates are not representative of the true interest costs to the City. As a result of low interest rates, the market for the sale of the City's bonds and notes has frequently produced bids at a stated coupon rate with a premium payable upon the sale of the securities, which creates a true interest cost (TIC) substantially less than the coupon rate.

PARKING GARAGES

Outstanding notes attributable to the PARKING GARAGES Enterprise at June 30, 2019 were:

TWO MILLION FIVE HUNDRED THOUSAND DOLLARS

The interest rate of the outstanding note in the Garage Enterprise is:

Note Type	6/30/18	6/30/19
General Obligation	2.2400%	1.6500%

The City intends to pay debt service on these notes from (i) special assessments levied in order to pay a portion of the cost of the Fourth and Elm Garage; (ii) TIF revenues generated in the downtown area to pay a portion of the cost of the garages; (iii) and parking revenues received from the operation of the garages.

Legend

D T - Debt Type

L - Limited

U - Unlimited

R - Revenue

A - Assessment

D F- Debt Form
B - Bond
STN - Short Term Note
LTN - Long Term Note

- * Weighted average interest rate on the outstanding principal.
- ** The interest rates identified above are calculated using the actual coupon rates on each series of bonds or notes. The rates are not representative of the true interest costs to the City. As a result of low interest rates, the market for the sale of the City's bonds and notes has frequently produced bids at a stated coupon rate with a premium payable upon the sale of the securities, which creates a true interest cost (TIC) substantially less than the coupon rate.
- The City has a blended component unit (The RiverSouth Authority). Rental payments from the City to RiverSouth are due pursuant to certain lease agreements. These payments equate to the debt service requirements of RiverSouth's lease revenue bonds. Rental payments are subject to annual appropriations of City Council. See Note A and Note Q of the City's 2018 Comprehensive Annual Financial Report for further information.

Legend

D T - Debt Type L - Limited

U - Unlimited

R - Revenue

A - Assessment

D F- Debt Form B - Bond

STN - Short Term Note

- * Weighted average interest rate on the outstanding principal.
- ** The interest rates identified above are calculated using the actual coupon rates on each series of bonds or notes. The rates are not representative of the true interest costs to the City. As a result of low interest rates, the market for the sale of the City's bonds and notes has frequently produced bids at a stated coupon rate with a premium payable upon the sale of the securities, which creates a true interest cost (TIC) substantially less than the coupon rate.

- * Weighted average interest rate on the outstanding principal.
- The interest rates identified above are calculated using the actual coupon rates on each series of bonds or notes. The rates are not representative of the true interest costs to the City. As a result of low interest rates, the market for the sale of the City's bonds and notes has frequently produced bids at a stated coupon rate with a premium payable upon the sale of the securities, which creates a true interest cost (TIC) substantially less than the coupon rate.

Appendix A

The following document details the flow of funds necessary to ensure the timely payment of debt service for the City's various debt obligations. The City Auditor's Debt Management System currently maintains hundreds of separate debt issues which require an array of processes to properly account for the debt.

It is imperative that we continue the prompt and timely payment of the City's debt obligations, as this is a significant factor in the City's top general obligation bond rating from S&P Global Ratings, Moody's Investors Service, and Fitch Ratings, AAA, Aaa, and AAA, respectively.

The following are cash	flow procedures for the <u>Obligation</u> Bonds.	he payment of <u>General</u>

General Obligation Bonds

The City's general obligation bonds take form in two categories.

- (1) Bearer bonds the last general obligation bearer bonds issued by the City were dated June 1, 1983. Bonds may no longer be issued in bearer form.
- (2) Book-entry only bonds the ownership of bonds is recorded electronically by a central depository. The Depository Trust Company ("D.T.C.") serves as the securities depository for all of the City's outstanding general obligation book-entry bonds.

It is the City's intention to continue to issue its bonds exclusively in book entry only form.

Effective July 1, 2015, the City Auditor's Office now serves as the authenticating agent, registrar, transfer agent, and paying agent for the City's general obligation bonds. Prior to this date, the City's Sinking Fund, a commission established by the City Charter, performed these duties. Pursuant to a review of the City's Charter by the City's Charter Review Commission, recommendations were submitted to the Mayor and City Council proposing amendments to the City's Charter, including but not limited to, the repeal of the City's Sinking Fund, effective July 1, 2015. A special election was held on November 4, 2014 to approve these amendments; the amendments passed.

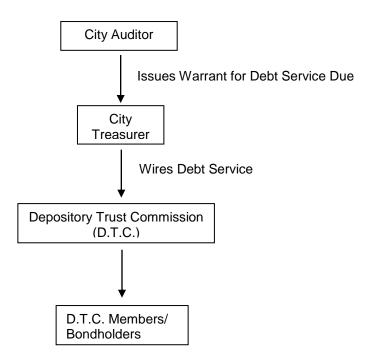

The exhibit on the next page illustrates the flow of funds (effective July 1, 2015) to pay debt service for the City's outstanding general obligation bonds.

The process begins when the City Auditor's Office verifies the invoice provided by the D.T.C. Once approved, the City Auditor's Office generates an internal debt service billing for an upcoming debt service payment date. A voucher is then created and processed. An auditor's warrant is issued to The Depository Trust Company. The City Auditor's Office presents this warrant to the City Treasurer to be wired to D.T.C.

Actual payment of principal and interest of bonds described in the above categories proceeds as follows.

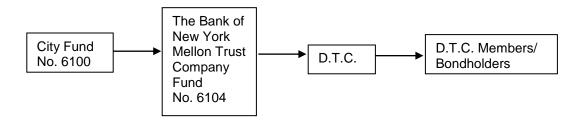

(1) **Bearer bonds** – The City Auditor verifies the authenticity of matured bearer instruments when they are presented either by mail, messenger or in person. The City Auditor will prepare a voucher to be issued to the presenter, process the voucher, and will provide a warrant to the City Treasurer within one working day. The City Treasurer will then make payment by either wire or check. As of June 30, 2019, bearer bonds with their accompanying coupons remain outstanding in the amount of \$861,637.91.

(2) **Book-entry only bonds** – The City Auditor provides the City Treasurer with dates, amounts and the D.T.C. reference information for the payment of all principal and interest for book-entry bonds. The City Auditor authorizes, via a warrant, the City Treasurer to make such payment. The City Treasurer then wires, on the appropriate date, book-entry <u>principal</u> and <u>interest</u> payments to D.T.C.

SERIES 2006-1 SANITARY SEWER ADJUSTABLE RATE UNLIMITED TAX REFUNDING BONDS

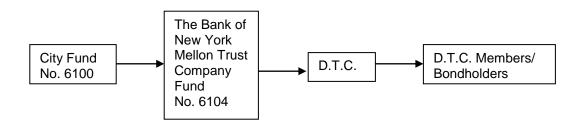

Effective February 11, 2019, the City Auditor's Office appointed The Bank of New York Mellon Trust Co., N.A., as bond registrar and paying agent for the above-referenced bonds. These bonds are variable interest rate bonds with monthly interest payments and have mandatory redemptions of \$4,000,000 on December 1 every year until 2026. The debt service is payable by the City Treasurer, pursuant to a warrant from the City Auditor's Office, to the paying agent, The Bank of New York Mellon Trust Company, on the last business day of the month. The amount is verified by the City Auditor with the paying agent the previous day. The amount due is calculated by using weekly variable interest rates as provided by JPMorgan, as remarketing agent. The City Treasurer then wires the appropriate amount to The Bank of New York Mellon Trust Company. The paying agent then wires the funds to D.T.C., who will then remit the interest due to the members/bondholders.

The following are cash flow procedures for the payment of Revenue Bonds.

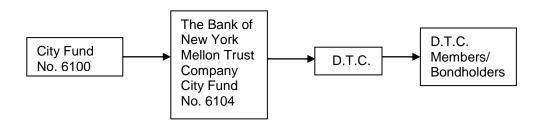

SERIES 2014 AND SERIES 2015 (REFUNDING) SANITARY SEWER FIXED RATE REVENUE BONDS

The Series 2014 Sanitary Sewer Revenue Refunding Bonds and the Series 2015 Sanitary Sewer Revenue Refunding Bonds are fixed rate bonds which require the City Treasurer, with a warrant from the City Auditor's Office, to remit one sixth of the next interest payment along with one twelfth of the next principal payment on the last business day of each month to the trustee, The Bank of New York Mellon Trust Company. When the interest and/or principal due dates arrive, the trustee remits the debt service to D.T.C., who then makes payment to its members/bondholders. These bonds mature on June 1, 2032.

SERIES 2008B SANITARY SEWER VARIABLE RATE REVENUE BONDS

The Series 2008B Sanitary Sewer Revenue Bonds are variable interest rate bonds which have monthly interest payments, but no principal payments until the years 2029, 2030, and 2032. The monthly interest payment is payable by the City Treasurer, pursuant to a warrant from the City Auditor's Office, to the trustee, The Bank of New York Mellon Trust Company, on the last business day of the month. The amount is verified by the City Auditor with the trustee the previous day. The amount due is calculated by using weekly variable interest rates as provided by JPMorgan, as remarketing agent. The City Treasurer then wires the appropriate amount to The Bank of New York Mellon Trust Company. The trustee then wires the funds to D.T.C., who will then remit the interest due to the members/bondholders.

The following are cash flow procedures for the payment of other outstanding debt obligations.

OTHER OUTSTANDING DEBT OBLIGATIONS

Listed below are other outstanding debt obligations along with a brief description of how the debt is retired.

OWDA LOANS

This debt consists of loans payable to the Ohio Water Development Authority (OWDA) which were incurred to help finance water, storm and sanitary sewer improvements. Some of these loans originated with OWDA. Other loans originated with the Ohio Water Pollution Control Loan Fund (OWPCLF) and are administered by OWDA. An amortization schedule for each loan is maintained by the City Auditor's Office and confirmed annually with OWDA. OWDA is paid twice a year (January 1 and July 1). An invoice for each required loan payment is sent to the Auditor's Office from OWDA. A voucher is written by the Auditor's Office from the sewer operating fund (6100) for loans applicable to the sanitary sewer system and a voucher is written by the Auditor's Office from the water operating fund (6000) for loans applicable to the water system. A voucher will be written by the Auditor's Office from the storm operating fund (6200) for loans applicable to the storm sewer system. Funds are then wired by the City Treasurer.

Payments to prospective contractors building the facilities, water and sewer lines are typically made directly by OWDA to the contractor. Engineering fees, paid initially by the City, are typically reimbursed to the City by OWDA. The City will record a corresponding liability to OWDA at the time of these payments.

OPWC LOANS

The Ohio Public Works Commission (OPWC) extends loans to the City for infrastructure and storm sewer improvements. These loans are non-interest-bearing and have serial maturities. An amortization schedule for each loan is maintained by the City Auditor's Office. OPWC is paid twice a year (January 31 and July 1). An invoice for each required loan payment is sent to the Auditor's Office from OPWC. A voucher is written by the Auditor's Office from the special income tax fund (4430). Funds are delivered via warrant.

STATE INFRASTRUCTURE BANK (SIB) LOANS

The City currently has one SIB loan administered and funded by the Ohio Department of Transportation. The loan provides funds for road reconstruction, replacement and construction of a bridge and accompanying infrastructure. An invoice for each required loan payment is sent to the Auditor's Office from the SIB. A voucher is written by the Auditor's Office from the special income tax fund (4430). Funds are then wired by the City Treasurer.

General Obligation and Revenue Debt Service (July 1, 2019- June 30, 2020)

Appendix B

City of Columbus, Ohio

Guidelines for Debt Issuance

Recommended by Columbus City Auditor

Revised July 2019

INTRODUCTION

These recommended guidelines, while not a statute, enjoy permanent communication status with the City's

legislative body, the City Council, for acknowledgement.

Debt issued by the City of Columbus (the "City"), whether bonds or notes, will be governed by all applicable

laws and regulations of the United States of America, the State of Ohio, and the City of Columbus, Ohio; in

particular, the Uniform Public Securities Act (Chapter 133) of the Ohio Revised Code (ORC), and the Charter

and ordinances of the City of Columbus.

Uses of bond or note proceeds will also be governed by their stated purpose clauses.

The City shall borrow monies for capital purposes only. The City shall not borrow monies for operating

purposes.

Where appropriate, the City should consider funding capital improvements with existing cash. Adequate

reserve levels, debt service coverage and other financial metrics, including credit rating metrics, must be

considered when assessing an appropriate amount of cash to be held in reserves. Considerations for the

appropriate mix of cash and debt funded projects can include: credit ratings metrics, tax or rate payer

affordability, and other considerations related to prudent financial management of the City's debt program.

The debt, where applicable, will also be developed to comply with all applicable IRS regulations.

DEBT ISSUANCE GUIDELINE OBJECTIVES

A major goal of these guidelines will be, where possible, to protect and maintain the City's enviable AAA credit

ratings. These enviable ratings will result in lower interest rates to the taxpayers and utility rate payers of our

community.

-1-

CITY DEBT PROGRAM

As detailed more fully herein, the City's debt program includes general obligation debt supported by City income taxes (paid from the Special Income Tax fund), general obligation debt supported by enterprise fund revenues, and enterprise revenue supported debt.

VOTER AUTHORIZATION – GENERAL OBLIGATION DEBT

The City should continue its practice of seeking voter approval for issuances to be backed by the City's general obligation pledge, applicable primarily for projects planned through the City's capital improvement plan. This process should take place at intervals of every three to five years.

LIMITATIONS

The City must comply with all legal debt limitations. Limitations include: the total general obligation net debt (as defined in the ORC) limit of 10.5% of all property in the City as listed and assessed for taxation; the net debt limit of 5.5% for unvoted general obligation debt; and the "ten mill" limitation applicable to the highest year of unvoted general obligation debt service (principal and interest) of overlapping jurisdictions.

The ten mill limitation on unvoted debt service, both principal and interest, can be impacted by the debt issuances of other governmental entities within the respective counties in which Columbus lies; presently, Franklin, Fairfield, and Delaware. Clearly, other overlapping political subdivisions can negatively impact this formula. In order to recognize the need to allow for emergencies the City should be very cautious in issuing unvoted general obligation debt that would result in inside millage of the City and overlapping subdivisions exceeding nine mills at the time the debt is issued. Unvoted, or limited, general obligation debt, because of the usual magnitude of utility projects, should not, to the extent possible, be used for enterprise activities.

An additional self-imposed limitation is applied to debt supported by the City's income tax.

Non-enterprise capital projects such as parks, playgrounds, streets, fire stations, police stations, heavy fire equipment, certain development projects, etc., are primarily supported by the City's income tax debt service set aside. Projections of income tax collections and other funds available for such debt service over a future ten year period must exceed projected debt service and other applicable costs <u>by a coverage of not less than 1.5 times (1.5x)</u>.

Coverage for income tax supported debt is defined as available funds at the end of the previous year added to the estimated collections of the current year divided by debt service requirements and other applicable costs of the current year. Coverage should never fall below a ratio of 1.5 times.

Added coverage allows the City to continue using its property tax collections (inside millage) for General Fund operating purposes rather than dedicating part of such collections to the payment of debt service on unvoted (limited) general obligation debt.

The added coverage also allows the City to avoid levying the "outside" millage approved by voters for debt service on voted (unlimited) general obligation debt.

From the bond holder's perspective, the voted, but unlevied, debt service millage provides additional coverage for unlimited general obligation debt.

Enterprise fund debt (water, sanitary sewer, storm sewers, electricity and City-owned parking garages) is to be supported by user rates sufficient to maintain operations and debt service of the respective enterprise.

Enterprise fund debt may likely be a combination of unlimited general obligation debt (limited general obligation debt should be used sparingly in enterprises) and revenue-type debt including Ohio Water Development Authority administered debt. Adjusted net revenues of an enterprise should never fall below 1.5 times (1.5x) total debt service of the enterprise. Adjusted net revenues are defined as gross revenues less operation and maintenance (O&M) expenses, exclusive of depreciation and amortization, plus the enterprise's unrestricted cash at the end of the prior year in both its operating fund and reserve funds, net of 10% of the previous year's O&M.

TYPES OF DEBT

Bonds and notes should be in the form of general obligation debt for non-enterprise capital projects, but may be general obligation or revenue bonds when considering enterprise activities and certain unique revenue-dependent issues. Enterprise activities such as Sanitary Sewer, Water, and Storm Sewer may find their most advantageous funding sources for the City to be loans administered through the Ohio Water Development Authority (OWDA).

The City must always be cognizant of researching available interest rates from multiple sources of funding, and should be aware that unlike most City-issued bonds, OWDA loans are not callable. In a significantly declining interest rate environment the City would not have the opportunity to refund the OWDA administered loans.

The type of debt issued by the City will be determined by the City Auditor in consultation with the City's municipal advisor. Such debt may be in the form of short term or long term, general obligation or revenue (special obligation) debt.

Short term notes providing cash flow needs for the City's operations should not be utilized. The City's relatively stable and even cash collections cycle should eliminate the need for consideration of any short term borrowing for operating purposes.

The use of short term debt for capital purposes in the form of bond anticipation notes (BANs) and/or variable rate demand obligations (VRDOs), bonds or notes, should also be limited in their use. The outstanding amount of BANs and/or VRDOs shall not exceed 25% of the City's total outstanding bonds and notes and shall be not more than 25% of the debt of each of the City's major utilities or income tax supported debt.

The use of interest rate swaps or any form of derivatives is PROHIBITED.

DEBT STRUCTURE CONSIDERATIONS

Debt may pay interest in a fixed rate mode or a variable rate mode. Debt should, preferably, be structured with level principal repayments. Level debt service repayments, or any legal variation may, however, be considered where appropriate. Special obligations may include amounts for capitalized interest in the initial period(s).

Generally, it will be advantageous to the City for debt to have call provisions. The call date should not exceed ten and a half years from the issuance date. Shorter call dates should be evaluated on an issue-by-issue basis. In the case of certain variable rate debt, put provisions may be considered.

DEBT REFINANCING

The City must always be cognizant of refunding opportunities that would reduce the cost of existing debt. Debt refinancing may include current refundings or advance (defeasances) refundings. After the passage of the Tax Cuts and Jobs Act (effective January 1, 2018), issuers may no longer issue tax-exempt bonds to advance refund prior tax-exempt bonds. Taxable Bonds can be issued to advance refund previously issued tax-exempt debt. The City should expect a present value savings resulting from advance refundings (defeasances) of a minimum of 3%, preferably more, of debt service on the bonds being refunded. Refunding efficiency metrics can be considered on an issue-by-issue basis to assess the benefit of an advance refunding relative to other alternatives, including a current refunding at the call date. Appropriate escrow securities for a defeasance escrow should be determined on an issue by issue basis, subject to relevant legal and/or bond indenture limitations.

MATURITIES

As indicated earlier, all City bonds and notes are subject to the Uniformed Public Securities Act (Chapter 133) of the Ohio Revised Code (ORC) which includes a recitation of the maximum years of debt life allowed for

various capital projects. Preferably the maximum life for any City project when considering debt issuance is not more than 20 years. There may be resulting assets (e.g. public utilities) where a 25-year life may be allowed. Under no circumstances shall the maximum maturity of the debt be longer than that allowed in the ORC or the estimated useful life of the asset(s) to be acquired as determined by the City Auditor, whichever is shorter.

BOND SALE METHOD

The process of borrowing money, selling of bonds and notes, can be conducted through nationally advertised competitive sales or through negotiated placement. The method chosen in the past has been determined by the complexity of the respective bond issue. The more complex issues usually lend themselves toward a negotiated sale where more simple issues lend themselves toward a competitive sale. Considerations for type of sale should include: volatility of market conditions, size of the bond sale, components of transaction (new money and/or refunding), complexity of tax status (tax-exempt and/or taxable), source of security for the bonds, and the goals for syndicate composition (i.e., working with local, MBE/WBE, veterans or other firms given policy considerations). Where most cost effective and/or efficient from an execution standpoint, privately placed debt (i.e. debt directly purchased by a bank) may be considered. Privately placed debt may be most applicable for unique and relatively small bonds or notes, such as special assessments.

SELECTION OF BOND PROFESSIONALS

In order to meet all of the above objectives, it is necessary for the City to engage professional bond counsel, municipal advisor, and tax counsel, including counsel to assist the City with arbitrage and rebate compliance. Bond counsel, municipal advisor, tax counsel, and other professional service providers should be chosen based on their demonstrated skills and knowledge of the City of Columbus. The City must insist that fees for professional services be competitive in the industry. When selecting service providers, prioritization must be given for the quality, experience, and expertise of the providers. All professional advisors will be continually monitored for quality of services and competitive fee structure.

CREDIT RATINGS

The City should seek credit ratings on its bond issues from the major rating agencies except where such ratings are deemed unnecessary, such as for relatively small assessment bonds, as determined by the City Auditor in consultation with the municipal advisor. The City should seek a rating or ratings on its note issues when considered advantageous to the City for financial or other reasons as determined by the City Auditor in consultation with the municipal advisor.

The credit rating agencies include quantitative analyses as part of the credit ratings process. When preparing for an issuance of debt or no less than annually, the City should evaluate certain key credit rating metrics.

Working with the municipal advisor, the City Auditor shall conduct a review of Moody's Investors Service's (Moody's) Scorecard Analysis with respect to the City's general obligation bonds. Also, the municipal advisor should analyze Moody's Financial Ratio Analysis (MFRA) data of the City compared to medians provided by Moody's as well as peer cities.

Metrics that the City and municipal advisor should monitor include:

- Direct Debt to Population Direct Net Debt Outstanding divided by Population
- 10-year principal payout Principal paid within 10 years

The City should maintain on-going relationships with the credit rating analysts responsible for analyzing its credit ratings, providing updates on significant financial events and trends on a timely basis. The City Auditor will manage the City's relationship and communications with the rating agencies.

CREDIT ENHANCEMENT

Credit enhancements may be considered. However, by maintaining its enviable credit ratings on both general obligations and user-rate supported special obligations of its enterprises, credit enhancements of the City's debt should not be necessary. When issuing VRDOs, bank letters of credit (LOC) or standby bond purchase agreements (SBPA) may be considered. The City's offerings of its own liquidity capability through City Code Section 325.05 should result in a lower cost of borrowing in the case of VRDOs to the City. This lower cost of borrowing should be considered and balanced in consideration of the opportunity costs associated with potential alternative investments of City funds. When considering the issuance of VRDOs, all costs must be recognized, including: anticipated interest rates, remarketing fees, LOC or SBPA (if used) fees, tender agent fees, annual rating agencies maintenance fees and other costs that may apply.

CREDIT SUPPORT

The City should NOT lend its own credit as support or enhancement for the debt of others, public or private. Only when there exists a statutorily imposed tax or project generated revenue specifically designated for (and in sufficient amounts) to service such debt, both principal and interest, should the City consider enhancing another public entity's debt. In the case of projects supported by project generated revenue, the City should rely on independent third party market analyses, from industry recognized professionals, to ascertain the viability of the revenues' sufficiency to pay debt service. The City should never consider enhancing the debt of private entities.

INVESTMENT OF DEBT PROCEEDS

Investment of debt proceeds shall be governed by City Code Sections 321 and 325 and, where applicable, provisions of trust agreements in conjunction with special obligation bonds. Such trust agreements must,

however, be in accordance with City Code Sections 321 and 325 and/or the Ohio Revised Code. Investments by trustees will be monitored by the City Auditor.

DISCLOSURE

Preliminary Official Statements (POSs) which neither contain material misstatements nor fail to state material facts, must be prepared and distributed prior to the actual sale of the bonds. Likewise, Official Statements (OSs) must be issued after their sale. POSs and OSs should be prepared and issued for the City's notes whenever market conditions indicate such issuances will be advantageous to the City.

POST-ISSUANCE ACCOUNTING

The accounting for all bond and note proceeds must be clearly identified and maintained by the City Auditor for each capital project recited in the authorizing ordinances and amendments thereto. While accounting records are maintained by the City Auditor, the Department of Finance and Management maintains certain records for the purpose of "check and balance" accuracy.

Additional requirements imposed by the IRS are devoted to IRS Post-Issuance Compliance Requirements and must be adhered to.

REPORTING

In addition to the City's Comprehensive Annual Financial Report (CAFR), it is recommended that the City continue to provide as a public disclosure document, the Bond and Note Report of the City which now is being reported as of mid-year by the City Auditor. The City must comply with all initial and continuing disclosure requirements of all applicable regulatory bodies such as the Municipal Securities Rulemaking Board (MSRB) and the Securities and Exchange Commission (SEC).

INVESTOR RELATIONS

The City should ensure key financial data (audited financial statements, credit rating information, etc.) is frequently updated and easily accessible to potential investors on the City's website or information repository. The City, in consultation with bond counsel and the municipal advisor, should regularly assess the need for investor presentations, tours, or other coordinated communications.

RECORDS RETENTION

All documents related to bond and/or note issues shall be retained in compliance with the City's official Record Retention schedules and the Post-Issuance Compliance Requirements of the IRS.

OTHER

The environment of borrowing and investing money changes nearly constantly. New products will continue to emerge. The paramount consideration should always be protection of the City's resources. The City should never succumb to chasing higher investment yields or lower borrowing rates by assuming inappropriate risks. Every precaution must be taken in the City's borrowing and investing activities to maintain the City's strong fiscal foundation.
