Southerly Wastewater Treatment Plant  
6977 South High Street, Lockbourne, OH 43137  
Ohio NPDES Permit # OH0024741

### SAFETY INFORMATION

Com-Til Products are organic fertilizers and soil conditioners that are safe when used as recommended on vegetables, fruits, trees, shrubs, grass and flowers. They will provide valuable nutrients to the soil and plants. Personal hygiene, wearing gloves and washing hands, should always be a part of using any fertilizer. Com-Til products meet the exceptional quality standards of the state/federal 503 regulations. (These standards apply to the use or disposal of sewage sludge. In the case of Com-Til products, they are composted and monitored so the temperatures reach levels which will kill most pathogens.) Com-Til products are safe products produced under strict engineered controls and we believe they are as safe as any compost or other soil product.

Michael B. Coleman,  
Mayor
