POLICY FORUM INTRODUCTIONS AND DISCUSSION

Tonight's Focus: YOUTH EMPLOYMENT

According to a recent Bureau of Labor Statistics survey the percentage of American youth aged 16 to 24 working has been trending down since the early 1990s. The 2005 rate was the lowest for July since 1965. A national survey of youth found that six in ten high school students did not participate in school to work programs.

Tonight we focus on how we put the passion, skill and creativity of our City's young people to work, why some students cannot find employment, what barriers stand in their way, and who are the partners we need to make any initiative we have in addressing youth employment successful.

ADJOURNMENT
