SA001089 - RFI Hydrogen Sulfide Control Chemical

THE CITY BULLETIN
BIDS WANTED - PURCHASING OFFICE AND OTHER DIVISIONS

RFI FOR HYDROGEN SULFIDE CONTROL CHEMICAL

REQUEST FOR INFORMATION (RFI)
CITY OF COLUMBUS
DEPARTMENT OF PUBLIC UTILITIES
DIVISION OF SEWRAGE AND DRAINAGE
WASTEWATER TREATMENT SECTION
HYDROGEN SULFIDE CONTROL CHEMICAL

The City of Columbus, Ohio Department of Public Utilities is hereby soliciting this Request for Information from suppliers of odor control chemicals for the supplying of a hydrogen sulfide-controlling chemical to the Southerly Wastewater Treatment Plant (SWWTP) to be used to reduce the in-plant liberation of hydrogen sulfide by the primary sludge dewatering process, in order to provide a less odiferous and less corrosive atmosphere for the Plant. Information will be accepted until 12:00 AM Friday April 2, 2004.

GOALS

1. To have a supplier provide a chemical in an injectable liquid form that can beneficially replace the zinc chloride currently being used for odor control at the Plant
2. To further reduce the amount of gaseous hydrogen sulfide at the Plant
3. To further reduce the amount of hydrogen sulfide in the dewatering centrate at the Plant
4. To allow for a better environment and a less corrosive atmosphere at the Plant
5. To further reduce the amount of zinc in the dewatered primary sludge and other Plant by-products.

OBJECTIVE

The supplier would provide a product compatible with a tank-based system for the on-site receiving and storage of its chemical, delivered regularly by tanker truck to SWWTP and piped into the tank wherever it is placed on the premises. The chemical would be applied by a digitally-controllable metered pump-style delivery system that pumps the chemical through Tygon plastic tubing into the Primary Sludge Transfer Pumps at flows metered to coincide with the flow of Primary Sludge being fed into the Plant's dewatering centrifuges. If necessary, feed water from the Plant, in the form of Plant Flushing Water, would be available to facilitate enhanced flowable injection of the chemical.

The chemical to be supplied must be compatible with the safety, safe handling and safe storage requirements of SWWTP for use in the reduction of the on-site generation of hydrogen sulfide. Some of the compounds that are NOT acceptable for odor control are the following:

- Hydrogen Peroxide
- Potassium Permanganate
- Iron Salts (ie. ferric or ferrous chlorides, sulfates, etc.)
- Chlorine Gas or Hypochlorite
- Any compound capable of introducing a metal or other chemical of concern as a residual
- Any masking agents

THE CITY BULLETIN
BIDS WANTED - PURCHASING OFFICE AND OTHER DIVISIONS

BACKGROUND

The City of Columbus, Ohio is preparing to open a new dewatering facility at the SWWTP. In the past, the Plant has incorporated Zinc Chloride as a control agent to reduce the amount of hydrogen sulfide gas stripped from the primary sludge in the dewatering centrifuges. However, zinc has become a metal of increasing concern in the wastewater treatment field and the Environmental Protection Agency has considered lowering the residual amount of zinc allowable in the by-products of the wastewater treatment process. Because of this increased regulation, the lower amount of zinc chloride that can be applied to a per unit amount of primary sludge to be dewatered is no longer sufficient to completely eliminate the effusion of hydrogen sulfide gas during the dewatering process.

Therefore, with a new dewatering facility about to come on-line, the Plant is seeking a new chemical that is better-suited to completely eliminate the hydrogen sulfide than the zinc chloride that has been used in the past. This control of hydrogen sulfide is advantageous to avoid the oxidation damage caused to Plant equipment, both new and old, from the corrosive effects of hydrogen sulfide gas.

REQUIREMENTS

Respondents are requested to include any information regarding the specifics of the supplier's chemical product and any requirements for its delivery, storage and application. Respondents are also requested to include the Material Safety Data Sheet for each chemical compound product that is submitted for review and consideration. Submission of a chemical sample for testing may be required.

This is not a bid. However, the City is requesting pricing estimates for budgetary purposes.

If your product is currently in use by some other municipality, please provide a listing of municipalities where your product is currently being used along with accurate contact information.

Discuss in your response an estimated timetable for implementing your chemical and its delivery. Also discuss any City responsibilities, application-related security and any license requirements.

Responses with Information will be accepted at the following address until midnight, 4/2/04:

SA001075 - RFP FOR FLEET MGMT OPERATIONS ANALYSIS

THE CITY BULLETIN
BIDS WANTED - PURCHASING OFFICE AND OTHER DIVISIONS

City of Columbus
Public Service Department

REQUEST FOR PROPOSAL
For

An Analysis of Fleet Management Operations
and Recommendations for a Centralized Fleet Management Structure

I. OBJECTIVE

The City of Columbus Public Service Department Director's Office wants to engage the services of a qualified professional services contractor (henceforth the Offeror or the Consultant) to conduct a study of the City's fleet management's operations, policies, and practices and make recommendations as appropriate for a centralized fleet management operation. The study is to include the fleet management policies and practices of all City departments and divisions as well as those of the Fleet Management Division. The existing Fleet Management Division is largely one in name; in practice it functions as a fleet maintenance division and does not involve itself to any significant degree in the management of the City's fleet. Management controls are left to individual divisions and departments. Fleet management is inconsistent citywide. To bolster this traditional role, the Mayor issued a November 2003 executive order that outlines several new policies governing fleet acquisition, maintenance, use (including take home vehicles) and disposal.

When complete, the Consultant's findings and recommendations are to be reduced to writing and ten (10) hard copies (and an electronic copy) are to be submitted to the City of Columbus Public Service Director. Oral presentations may also be expected.

VIII. PROPOSAL FORMAT

Each offeror shall adhere to the following format when submitting their proposal. Failure to do so will eliminate proposals from consideration.

- a. Consultant shall limit their proposal to no more than twenty (20) total pages. No appendices or additional information are acceptable. Proposals exceeding this page limitation will be rejected immediately. Minimum font size to be 11.
- b. Provide information requested below in the order presented. Provide a single cover sheet (not included in the 20 page count) to each section in the proposal. USE THIS FORMAT. Each section shall be designated as follows:

REQUEST FOR STATEMENTS OF QUALIFICATIONS FOR PROFESSIONAL SERVICES

The City of Columbus, Ohio is inviting professional engineering consulting firms to submit Statements of Qualifications to furnish professional services for the City of Columbus, Department of Public Utilities, Division of Sewerage and Drainage for the VARIOUS SANITARY SEWER SYSTEM INFLOW AND INFILTRATION (I/I) REMEDIATION PROJECTS AS LISTED BELOW.

The Director of Public Utilities of the City of Columbus wishes to receive sealed Statements of Qualifications from professional engineering firms interested in, and qualified for, furnishing professional services for the following Capital Improvement Projects:

CIP 405.7 - Sewer System I/I Remediation - NW Alum Creek Basin

CIP 405.8 - Sewer System I/I Remediation - Early Ditch Relief Area

CIP 405.9 - Sewer System I/I Remediation - West 5th Avenue

CIP 405.10 - Sewer System I/I Remediation - Barthman /Parsons

CIP 405.11 - Sewer System I/I Remediation - Livingston/James

General Description

The City of Columbus, Ohio operates a collection system made up of separate-sanitary and combined sewers. The Sewer System Engineering Section has identified several areas within the City, in both the separate-sanitary and combined sewer areas that experience street, yard, and basement flooding; sewerage system surcharging; and sewage overflows out of manholes and designed sanitary relief (DSR) points. It is desired that detailed studies be conducted in each of these areas to identify the causes of these occurrences as they relate to the sewerage system and recommend specific remediation strategies to eliminate and/or mitigate these occurrences and generally restore capacity to the sewerage system.

To that end, the City is seeking to hire a professional engineering consulting firm or firms to carryout such engineering studies. The qualifying firm or firms shall have extensive experience in investigating and modeling sewerage collection and storm sewer systems to identify and quantify direct and indirect sources of I/I. This extensive knowledge and experience is necessary in order to determine and apply the appropriate strategies from among the technologies derived to date in eliminating and/or mitigating those I/I sources found within the study area.

It is expected that each of the projects (or areas) noted above shall be assigned to a different firm. Each investigation is to be a distinct and separate project; conducted according to its own parameters; prosecuted under its own schedule; and carried out by its own agents. Significant coordination with the City's ongoing Capacity, Maintenance, Operations, and Management (cMOM) Program and Long Term Control Plan (LTCP) project is required.

The goal of each of these projects is to produce a list of extensive and detailed recommendations for the rehabilitation and augmentation of existing storm, sanitary, and combined sewerage correlated with extensive and detailed maintenance recommendations. The resulting report(s) shall be of some length and

THE CITY BULLETIN
BIDS WANTED - PURCHASING OFFICE AND OTHER DIVISIONS

shall be accompanied by the appropriate graphs, details, flow charts, maps, and schedules to fully document and explain the investigation, its findings, its methodology and all recommendations. All such work shall be required to identify and quantify direct and indirect sources of I/I; causes of water-in-basement occurrences (WIBs); and sewer system overflows (SSOs).

To that end, the Consultant shall have demonstrated experience with I/I-related field investigations, maintenance and records investigations, sewerage system cleaning, Closed Circuit Television Inspection (CCTV) work, storm sewer, sanitary sewer, and combined sewer design and evaluation, computer modeling using US EPA SWMM, and sewerage rehabilitation and replacement via both standard open cut, and tunneling methods. The Consultant shall be thoroughly experienced in determining the most feasible and economical methods for sewer replacement, repair, rehabilitation, and relief to mitigate I/I.

The Consultant will be required to perform extensive field and maintenance investigations of sanitary, combined, storm, and lateral sewers including site surveys, smoke and dye testing, rainfall simulation testing of downspouts and drains, CCTV inspections of sanitary, storm, and home laterals, and possible interior home plumbing investigations. Intensive flow monitoring programs of sanitary, combined, storm, and lateral sewers will be included to augment and calibrate computer model simulations and aid in quantification estimates. Radar-assisted rainfall estimates may also be included.

Access to all existing video, reports, plans, investigations, models, and the like, the City has acquired for sewers in the study area will be provided to the Consultant for their review and copy. Any video taken by the Consultant; all reports, plans, investigations, models, and the like produced or augmented by the Consultant for the project shall be provided to the City at the close of the project.

Other duties are expected to include, but are not limited to, the performance of research of existing sewer records of varying kinds, interviews with maintenance and engineering personnel; research of existing adjacent utilities; modeling of pertinent existing sewerage systems; participating in and/or conducting public information programs; coordinating with cMOM and LTCP consultants; and preparing a design report that outlines the methodology of the investigations undertaken, conclusions drawn, and a comprehensive set of recommendations designed to eliminate and/or mitigate I/I and correlated DSRs, SSOs, and/or WIBs.

The City may wish to modify the Consulting Design Services Contract to provide for other duties that could include preparation of construction drawings, job-specific supplemental specifications, and bid documents; provision of Construction Administration and Construction Inspection Services and record plan drawings.

Because investigative information on active sewers must be provided, the Consultant must have experienced personnel and equipment for performing confined space entries as outlined in the OSHA standard found in the Code of Federal Regulations, Part 1910.146.

Selection Process

The Statements of Qualifications (SOQ's) will be reviewed by the City and a minimum of three firms will be selected to receive a Request for Proposal (RFP) for each project. Selection of the firms will be based on the firm's SOQ. The firm shall indicate on which of the above listed projects they wish to be considered, which may include any or all projects listed.

Selection of professional services for this work shall conform to all applicable requirements of Columbus City Codes, 1959, particularly Title 39 and Section 329.13 thereof. All offerors and all subcontract entities

- (1) The Committee shall make nominating petitions available at one or more locations designated by the Committee, beginning at least ten weeks before Election.

- (2) A potential candidate for election to the CAC shall obtain petitions from the designated places, and shall at the time of receipt of the petitions, place on file his or her name, signature, residence address, CAC District, and telephone number. Any attempt to deceive in providing the above information may result in a disqualification by the Committee for that election.
- (3) A potential candidate shall personally circulate the petition(s) for his or her candidacy. The Committee may grant an exemption to this requirement if the potential candidate demonstrates that he or she has a disability which would make it a hardship for the potential candidate to personally circulate his or her petitions. In this case, the candidate shall designate a circulator for gathering signatures for the candidate's candidacy.
- (4) Each potential candidate, or, in the case of a potential candidate granted a disability exemption, each circulator, must complete and execute the affidavit at the end of the petition before its submission to the Committee at the location specified by the Committee.
- (5) Each potential candidate must submit a petition containing valid signatures of at least fifty qualified voters (as described below) who reside in the potential candidate's District.

B. Validation

- (1) The Committee shall check the validity of the petition signatures for each potential candidate by attempting to contact a representative number of petition signers by telephone.
- (2) If any of discrepancies or possible improprieties are discovered from these contacts, the Committee shall check all signatures for that potential candidate for validity in a like manner until either fifty valid signature are found or the potential candidate's petition is ruled invalid for lack of sufficient signatures.
- (3) The determination of the Committee shall be announced within five days of the receipt of the petition.

VII. Write-in Procedures

A person who wishes to qualify as a Write-In Candidate shall so notify the Committee no later than the sixteenth day before Election Day. The application shall be in writing, and shall include the candidate's printed name, signature, residence address, CAC District number, telephone number, and, if requested by the Committee, other evidence that the residence and other candidate qualifications are met. The Committee shall determine whether the candidate meets the eligibility requirements other than timely filing of nomination petitions, and if the result is affirmative, shall certify that the applicant qualifies as a Write-In Candidate, no later than the fourteenth day before Election Day. The Committee shall immediately notify any Petition Candidate of the existence of a Write-In Candidate in the same District.

VIII. Ballots, Regular and Absentee

- A. The Committee shall record the total number of ballots reproduced for each District.
- B. Each ballot shall prominently display the identifying number for the respective District of the candidates listed.
- C. Each ballot shall carry a list, headed "Vote for One", of the names of Petition Candidates certified by the Committee as meeting Candidate Qualifications for that CAC District, with a "(" preceding each name.
- D. The order of listing candidate's names on the ballot of the respective area Districts shall be determined randomly.
- E. Each ballot in which there is a certified Write-In Candidate shall conclude with a blank line, preceded by a "("", for use in the event voters wish to write in the name of a Write-In Candidate.
- F. No Write-In Candidates are to be listed on the ballots.
- G. The absentee ballot shall be identical to the in-person ballot.
- H. No political party or other organization shall be named on the ballot in association with a candidate's name.

IX. Voter Qualifications

- A. Each voter must be at least eighteen years of age on Election Day.
- B. Each voter must reside in the Clintonville Area Commission District for which an election is being held.
- C. Each voter shall vote only upon the ballot pertaining to the election of a candidate in the District in which the voter resides.
- D. The voter need not be a registered voter on the rolls of the Franklin County Board of Elections.
- E. No voter shall cast more than one ballot.

X. Polling Procedures

- A. The Committee shall provide for both Absentee voters who will be absent or otherwise not voting in person at the polls on Election Day and for in-person voters at the polls on Election Day.
- B. Absentee Voting:
 - (1) A voter may request an absentee ballot by applying in writing to the Absentee Ballot Supervisor (ABS). The request shall include the applicant's signature, printed name, residence address, residence telephone number, and date of birth. The request shall include a self-addressed stamped envelope. The request may be mailed or may be delivered by hand.
 - (2) The deadline for request of an absentee ballot shall be the fifth day before Election Day.
 - (3) Upon timely receipt of an absentee request, the ABS shall verify that the voter is qualified, and if so, the ABS shall immediately mail one absentee ballot to the applicant by first class mail.
 - (4) For the vote to be counted as valid, the marked absentee ballot must be received at the delivery place designated by the ABS by 6:00 p.m. on the day before Election Day.
 - (5) The returned ballot shall be sealed in an envelope bearing the voter's name and residence address clearly printed on the outside. Failure to provide the voter's name and address on the envelope for possible later crosschecking to the polling place voter register will invalidate the vote.

- (6) It is advised that the voter's signature appear across the seal of the envelope, to assist maintenance of ballot anonymity.
- C. Direct in-person voting at the polls:
- (1) During voting hours, each polling place shall be staffed by at least two people at all times.
 - (2) Each voter shall present a photo identification with current address and age, or a photo identification with another piece of identification with the voter's current address and age to a polling place election staff member designated by the Committee for that purpose. If a voter does not have such identification materials at the polling place, the voter must sign a statement that he or she is eighteen years of age or older and currently resides at a stated address within the election District in which he or she is voting. A poll worker shall staple the statement to the ballot so that any person may challenge the residency of the voter. Any candidate, candidate's witness, Rules Committee member, CAC member, or poll worker may review the residency statement. Any disputes related to the veracity of a residency statement shall be resolved under the Complaints/Challenges section of these Rules.
 - (3) Upon such verification, the voter shall register in the poll book, entering signature, and residence address.
 - (4) The voter shall be provided with a single ballot, and shall cast a vote by marking the ballot and depositing it in a sealed ballot box provided for that purpose.
 - (5) No person shall engage in any campaigning on the premises of the polling place during the time the poll is open on Election Day.
 - (6) At the appropriate polling place, a witness may represent a candidate or an individual or group supporting or opposing any issues or candidate on the ballot. No witness shall directly or indirectly campaign for issues or candidates on the premises of a polling place. A candidate shall not serve as a witness to the voting. No witness shall serve as a poll worker.
 - (7) The polling staff shall deliver the sealed ballot boxes to the Committee immediately upon the closing of the polls.

XI. Counting of Ballots

- A. Ballot boxes shall remain sealed until the counting begins.
- B. List of absentee voters shall be checked against poll book to insure no duplicate voting took place.
- C. Immediately following the conclusion of all voting and the transportation of all ballots to the headquarters, the Committee shall count the ballots.
- D. No ballots for a non-certified write-in candidate shall be counted.
- E. Blank ballots shall be counted to insure integrity of election results.
- F. Any person may witness the counting.

XII. Security of Ballots

- A. All voted ballots for each District shall be placed in a sealed container after counting has been completed.
- B. The sealed containers shall be kept in a secure place until two weeks after the election or until any formal election complaint is resolved, whichever is later, at which time they may be destroyed under the supervision of the Committee.
- C. Ballots not used in the election shall be handled in the same manner as voted ballots.

XIII. Results

- A. The candidate in each District receiving a plurality of valid votes cast shall be the winner of his or her District.
- B. In the event of a tie vote, the relevant ballots shall be recounted, and if the tie vote is verified, the winner shall be decided by a random method determined by the Committee.
- C. The Committee shall informally notify the candidates and the CAC Chairman of the uncertified election results within twenty-four hours of the close of the polls.
- D. The committee shall certify the election results, including the votes, in writing to the CAC Chairman after six days but within ten days following Election Day. The CAC Chairman shall, on behalf of the CAC, certify the elected candidates to the Office of the Mayor of the City of Columbus, in writing, within thirty days of receipt of certification from the Committee.
- E. Only a person who has, before the election, been certified as a qualified candidate by the Committee may be certified as the winner of an election.

XIV. Complaints/Challenges

A person who believes that a violation of these rules has occurred may file a written complaint, specifying the alleged error, with the CAC Chairperson no later than seven days after the election. The CAC, excluding any member whose election is the subject to the complaint, and the Committee shall hold a joint special meeting to hear the complaint within ten days of receiving the complaint. Each member of the Committee and the CAC in attendance shall have one vote. A majority of those voting yea or nay shall determine any vote. The joint meeting of the CAC and the Election Committee shall issue a written decision on the complaint within seven days after hearing the complaint.

The resolution of any election-related dispute by the joint meeting of the CAC and the Committee is final.
