SA002027 - RFP-Sewer System Capacity Model

THE CITY BULLETIN
BIDS WANTED - PURCHASING OFFICE AND OTHER DIVISIONS

REQUEST FOR PROPOSALS
FOR PROFESSIONAL SERVICES FOR
SEWER SYSTEM CAPACITY MODEL - UPDATE 2006

The City of Columbus, Ohio is inviting professional engineering consulting firms, or teams including such firms, to submit Proposals to furnish professional services for the City of Columbus, Department of Public Utilities, Division of Sewerage and Drainage (DOSD), for an update of the City's SEWER SYSTEM CAPACITY MODEL (SSCM).

GENERAL PROGRAM DESCRIPTION

The City of Columbus, Department of Public Utilities, Division of Sewerage and Drainage operates and maintains an existing sewer system, which serves 22 municipalities, portions of Franklin County and the City of Columbus. DOSD operates and maintains two wastewater treatment plants, pump stations, two stormwater storage facilities and many control structures and devices.

The City of Columbus, initiated the Columbus Sewer Capacity Study (CSCS) over four phases (Phase I, Phase II, Phase III and the Sewer System Capacity Model (SSCM) Model Update) to evaluate the capacity of sanitary and combined sewerage systems and to investigate system performance using modern modeling techniques

Phase I - Performed desktop flow calculations for sanitary and combined sewers in the Scioto River Basin representing year 1988 conditions; paving the way for the hydraulic computer modeling techniques to follow

Phase II - Started development of the first SWMM model for sanitary and combined sewers; first in the Scioto basin and later for sewers in the Big Walnut basin representing system configurations up to year 1988 conditions

Phase III - Updated the SWMM model to year 1994 conditions

SSCM Model Update - Updated the SWMM model to year 2000 conditions

After completion of the SSCM, the City of Columbus, Ohio entered into two consent orders with the State of Ohio to address the capacity of the separate and combined collection systems and wastewater treatment plants including the operation, maintenance, management, capacity, and improvements of the City's collection systems and wastewater treatment facilities. Under these orders, the first Wet Weather Management Plan (WWMP) dated July 1, 2005, has been prepared. The SSCM was an integral part of the Plan.

The WWMP includes a large program of capital improvements, of which a portion must begin immediately and be completed in 2010. Annual updates to the WWMP are required to report the status of program elements and evaluate Plan recommendations in light of program achievements and improvements in technology.

To assist with the WWMP evaluation, the continual updating of the SSCM is required. To that end and to further refine our estimations of flows from future development, the City seeks to hire an experienced
