

# WHOOPING COUGH SOUNDS SCARY...

**PROMISE ME  
YOU'LL GET  
VACCINATED.**

**IF YOU HAVE A BABY IN YOUR LIFE...**

You need the Tdap vaccine to protect your little one from whooping cough (pertussis), which can be a deadly disease for babies.

Studies show that up to 96% of infants with whooping cough got it from a family member.

#### **GET YOURSELF VACCINATED TODAY!**

Tdap is recommended for children 11 years of age and older and for parents and care givers of children under 2 years old.

For vaccine availability, contact your:

- Healthcare provider
- Local retail pharmacy clinic
- Local health department
