

STOP SHIGELLA

Shigella is a germ that causes a diarrhea illness. Right now in our community, many young children and the people caring for them are getting sick with this. They may get so sick that they need to go to the hospital. You can take steps to stop it.

Wash hands often with soap and warm water.

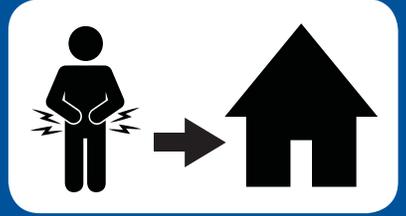

After changing diapers, wash your hands.

See a doctor for lab test and care.

Stay home when sick.

For more information, call 614-645-1474, option 2
