

1145.05 SEWER DESIGN AND CONSTRUCTION SPECIFICATIONS

(A) All new sewers and connections to the treatment works must be properly designed and constructed in accordance with the City of Columbus Construction and Specifications Manual, Columbus City Codes, Chapter 1131 through 1143 inclusive.

(B) Whenever required by the Division of Sewerage and Drainage, the User of any property serviced by a sewer carrying nonresidential wastewater shall install separators, as necessary, for the proper handling of liquid wastes containing grease, sand, oil or any other materials that may violate the provisions of this Chapter. The design of any required separator shall be submitted for review and approval by the Director prior to installation.

(C) Whenever a plumbing permit is required by Columbus City Code Chapter 4113, and grease separation is required, the applicant shall install grease interceptor(s) immediately outside the building where there is easy access for cleaning. If the applicant demonstrates that installation of an outside interceptor is impractical to the satisfaction of the City, installation of grease trap(s) shall conform to all applicable regulations.
