THE CITY OF
COLUMBUS
ANDREW J. GINTHER, MAYOR

DEPARTMENT OF
PUBLIC UTILITIES

City of Columbus Stormwater NPDES Permit

January 1, 2015 – December 31, 2015
(Ohio EPA Permit Number: 4PI00000*CD)

ANNUAL REPORT

CITY OF COLUMBUS ANNUAL REPORT

AUTHORIZATION TO DISCHARGE UNDER THE NPDES (NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM)

In compliance with the provisions of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et. seq.) and the Ohio Water Pollution Control Act (Ohio Revised Code Section 6111), the City of Columbus is authorized by the Ohio Environmental Protection Agency, to discharge from all portions of the City of Columbus municipal separate storm sewer system, to waters of the State in accordance with the approved Storm Water Management Program, monitoring requirements, and other conditions specified in the permit.

January 1, 2015 through December 31, 2015: Ohio EPA Permit No. 4PI00000*CD

CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

John Newsome, P.E.

Administrator

Division of Sewerage and Drainage

SECTION 1 – NARRATIVE SUMMARY

1.1 Annual Report Format and Content

On March 17, 2012, the Ohio EPA issued permit No. 4PI00000*CD to the City in which conditions for the City's Stormwater Management Program were defined. Permit No. 4PI00000*CD became effective on May 1, 2012 and will expire on April 30, 2017. Program activities conducted from January 1, 2015 through December 31, 2015 under permit No. 4PI00000*CD are summarized in the following report.

1.2 Overview

The City of Columbus (City) owns and operates the municipal separate storm sewer system (MS4) defined as a system of conveyances and controls designed or used for collecting, conveying, and controlling stormwater runoff. The MS4 has been constructed since the founding of the City with the primary purpose of conveying and controlling drainage from developed areas such that standing water or flooding does not result from frequent storm events. As the City has developed and regulatory requirements have changed, the MS4 has grown to consist of drainage related appurtenances including storm sewers, catch basins, curb inlets, junction chambers, manholes, culverts, headwalls and endwalls, stormwater pump stations, ditches, manmade channels, detention facilities and post-construction water quality capture facilities. The MS4 discharges to Big Walnut Creek, Alum Creek, the Olentangy River, the Scioto River, Hellbranch Run, Rocky Fork Creek, lesser named creeks, and unnamed tributaries to each.

A Table of Organization that summarizes the program elements and the responsible party for each element under the City's SWMP (Stormwater Management Program) is provided in Appendix A.

1.3 Description of Evaluation Process

The effectiveness of the City's stormwater management program is assessed primarily through tracking BMP implementation. The department verifies or tracks BMP implementation and determines how a management program is being implemented. It is the primary tool for developing most of the City's measurable goals.

In preparation of the Annual Report, the City compiles tracking information to provide quantitative evidence of the extent of implementation of the various program elements. Data analysis for this type of monitoring consists of an annual summary of the program data and evaluation of trends as appropriate.

1.4 Major Findings, Areas of Accomplishment, Areas Needing Improvement, and Future Direction

Table 1 summarizes the major findings, areas of accomplishment, areas of the stormwater program needing improvement and actions the City intends to take as part of its SWMP. More specific information about activities conducted during the 2015 reporting period is provided in Section 2.

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
Administrative	The City of Columbus annexed approximately 216 acres into the City's corporation limits in 2015.	1. Approximately 59 acres of land were annexed into the City of Columbus in 2014. Evaluation of these areas identified no home septic treatment systems, one stormwater outfall, no industrial facilities, and no post-construction BMPs that were incorporated into the City's MS4 program.		1. Evaluation of areas annexed in 2015 to identify additional Home Septic Treatment Systems (HSTS), stormwater outfalls, post-construction BMPs, and industrial locations will be conducted in 2016. 2. The Stormwater Drainage Manual and Erosion and Sediment Pollution Control Regulations will be reviewed and revised.
Public Education and Public Involvement	1. The City's partnerships with local agencies, watershed groups and businesses continue to contribute to the success of our stormwater education	1. The City secured a contract with MKSK to design an interactive stormwater demonstration area at the Audubon Center, located in the	1. We continue to look for ways to measure the effectiveness of our stormwater education programs and the ways in which individual behaviors change as	1. In 2016 the residential target themes / audiences continue to be: pet waste / dog owners, yard maintenance / homeowners, lawn care businesses,

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
	<p>program.</p> <p>2. Targeted campaigns and materials are aimed at specific stormwater quality issues and changing behaviors. In 2015, the PUP campaign continued to focus on informing pet owners on how pet waste can impact stormwater quality; the City partnered with Franklin Soil and Water Conservation District to develop a lawn care program; new materials on proper power washing methods were developed and distributed.</p>	<p>heart of the urban center. Partners include Grange Insurance Audubon Center and Metro Parks.</p> <p>2. Residents learned about onsite stormwater management through the use of green infrastructure as outreach on Blueprint Columbus continued through 2015.</p> <p>3. As part of a newly developed campaign, Stormwater Investigators began distributing a new flyer that informs residents and newly hired City employees so that they K.N.O.W to call 645-STREAM to</p>	<p>a result of our outreach.</p> <p>2. The City issued the first stormwater fee credit for green infrastructure and will continue to promote adoption of these practices.</p>	<p>garden centers; methods of keeping stormwater onsite/homeowners, landscapers, garden centers.</p> <p>2. 2016 industrial target themes / audience continue to be: methods of keeping stormwater onsite / water quality impacts associated with land development; Importance of good housekeeping / those who power wash, sweep surfaces and perform other outdoor cleanup activities; Fats Oil and Grease / Restaurants, businesses and manufacturers whose byproduct or waste</p>

Table 1
Summary of Major Findings, Areas of Accomplishment,

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
		report stormwater pollution.		includes fats, oil or grease.
Illicit Discharge	<ol style="list-style-type: none"> 1. Columbus Public Health (CPH) found 103 violations during the HSTS characterization project performed in 2015. 2. CPH performed a study to evaluate the performance of discharging HSTS within the City. Of the 37 systems that were sampled, 60% were found to not meet the regulatory limit for fecal coliform. 	<ol style="list-style-type: none"> 1. In 2015, fourteen applicants received loans through the Septic Tank Elimination Program (STEP) to successfully abandon their HSTS and tie into the City's sanitary sewer system. 2. The Department of Public Utilities and Columbus Public Health completed the effort to characterize the type and points of discharge for approximately 1,600 HSTSs within the City. 3. Conducted 15 half-day Food Service Programs to educate 		<ol style="list-style-type: none"> 1. The City continues to promote its STEP program in an effort to assist qualifying homeowners with abandonment of their HSTSs. 2. Columbus Public Health (CPH) will continue to issue tap orders to HSTS owners located near an accessible sanitary sewer. 3. CPH will follow-up on all outstanding violations discovered during the HSTS assessment project. 4. The Division of Sewerage and Drainage will be completing the prioritization process

Table 1

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
		<p>restaurant employees about prevention of illicit discharges during parking lot and dumpster cleaning, and conducted 57 full-day Food Service Program training sessions. These programs were attended by 1,410 restaurant employees.</p>		<p>that will guide the installation of central sanitary sewers throughout the City to eliminate HSTSs where feasible.</p>
<p>Construction</p>	<p>Inspections were down 25% in 2015 due to being down one Inspector.</p>	<p>1. Since adding two inspectors (for a total of 4) to the SWP3 Program in 2007, a total of 40,129 site specific sediment and erosion control construction inspections have been performed in the City of Columbus. The average SWP3</p>		<p>1. The City plans to hire one additional inspector in 2016. 2. Pursue electronic data input devices, i.e., tablets, cloud-based applications, and storage options.</p>

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
		inspections per year for these nine years is 4,458. 2. Inspectors were issued smartphones.		
Post Construction	The City completed a review of approved construction plans dating back to 2004 so that a complete inventory of BMPs could be populated.	1. In 2015, 137 maintenance information packets were distributed to owners/management companies responsible for maintaining post-construction BMPs. 2. The City's utilized a private vendor to perform maintenance work at 84 city-owned bioretention facilities. 3. The City hired a full-time inspector.	The City continues to work with BMP owners and inform them of the requirement to submit annual reports as required by the SWDM.	The City will advertise a contract for assistance in completing the BMP inventory with drainage areas of individual BMPs.
Good Housekeeping/Pollution Prevention	Using the Department of Public Utilities' Environmental Management System	Under this city-wide EMS initiative, the design of upgrades to City facilities with	1. City facilities with SWPPPs based on an outdated version of the SWPPP template	Institute efforts to clarify roles and responsibilities for MS4 implementation across City departments.

Table 1

Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
	<p>(EMS) as a template, the City's Division of Fleet Management continued to work with other City departments to develop an EMS targeted at fleet maintenance activities.</p>	<p>fueling stations was begun in 2015 to bring them into full compliance with stormwater regulations.</p>	<p>must be updated to incorporate the improvements in the current version.</p> <ol style="list-style-type: none"> 2. Improvements needed in training; identifying roles and responsibilities in implementing SWPPP requirements; and consistently performing monthly and annual inspections. 3. Closing out items from the environmental audits conducted at facilities owned and operated by the departments of Finance and Management, Public Safety, Public Service, Recreation and Parks, 	

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
			Technology, and Public Health.	
Industrial and Related Facilities	<ol style="list-style-type: none"> 1. The names of industries that have been identified and contacted by the City that have not shown proof of permit or No Exposure Certification coverage are listed in Appendix P as Category 1 industries. 2. The number of Category 1 industries increased this reporting period since 67 industries were added to the City's inventory and four industries re-applied for coverage under OEPA General Permit No. OHR000005. 3. Twenty-five No Exposure Certification 	180 No Exposure Certifications and 120 Industrial General Permits have been acquired to date.		<ol style="list-style-type: none"> 1. The City will schedule appointments with Ohio EPA throughout 2016 to retrieve copies of NOIs, General Permit confirmation numbers, and No Exposure application and confirmation letters for industries in its inventory.

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
	exemptions have expired during this reporting period.			
Wet Weather Monitoring	The City found that the results of stormwater sampling performed since 2007 have remained consistent.	<ol style="list-style-type: none"> 1. The City conducted wet weather monitoring at three outfall locations during the four quarters of 2015. 2. Based on approval by the Ohio EPA, the City proceeded to negotiate a contract with The Ohio State University (OSU) for services to perform wet weather monitoring during the next 5-year permit cycle. The monitoring to be performed under the OSU contract will focus on measuring the water quality improvements 		<ol style="list-style-type: none"> 1. Continue collection of flow data and sampling at three outfall locations under Permit No. 4PI00000*CD. 2. The City will enter into a new contract with OSU for wet weather monitoring to be performed during the next permit cycle.

Table 1
Summary of Major Findings, Areas of Accomplishment,
Areas Needing Improvement, and Future Direction

Program Element	Major Findings	Areas of Accomplishment	Areas Needing Improvement	Future Direction
		provided by green infrastructure BMPs constructed under the City's Blueprint program.		

SECTION 2 – ASSESSMENT OF BEST MANAGEMENT PRACTICES

The SWMP is an on-going effort to reduce pollutant discharges from the MS4 to the maximum extent practicable. BMPs developed and implemented by various city departments and divisions in response to requirements specified in past and current MS4 permits are evidence of this effort. Compliance tasks are conducted and coordinated by the Department of Public Utilities, Division of Sewerage and Drainage, Stormwater and Regulatory Management Section. Based upon specific SWMP goals, compliance activities are delegated to different departments or divisions including Department of Public Service, Department of Public Safety, and Department of Recreation and Parks. Each of these departments administers practices targeted at reducing pollution from stormwater runoff. The City of Columbus continues to work to develop and improve a comprehensive employee training program, increase public awareness, foster inter-governmental and inter-community cooperation, and promote the improvement of stormwater runoff in local watersheds.

Ohio EPA permit 4PI00000*CD requires the City to develop and report on the implementation of BMPs and measurable goals for each element of the City's SWMP. The objective of stormwater BMPs is to control the quality and/or quantity of stormwater runoff to reduce the adverse impact on local receiving waters. BMPs are generally described as activities, regulation of practices, maintenance, structural controls, and management practices and procedures used to prevent or reduce the release of pollutants or otherwise prevent adverse impacts to surface waters. The following tables outline the BMP and measurable goal implementation status for each program component in the SWMP.

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Identify Target Pollutants

<u>BMP PE1– Targeted Public Education Themes</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period¹:	Measurable Goals Achieved?		
		Yes	No	Other
1. Distribute educational materials to reach at least 20% of city residents each year.	Bill inserts containing stormwater messages were sent to 314,000 ratepayers.	X		
2. Publicize at least 20 stormwater education messages annually using social media.	Messages were published on DPU and GreenSpot Facebook pages, and periodic messages were shared via Twitter.	X		
3. Review the list of targeted themes and audiences in Table 2-1 during preparation of the City’s annual compliance report to Ohio EPA.	The list of targeted themes was reviewed, and no changes were warranted.	X		
4. Continue pet waste campaign. Install and maintain signage and kiosks in parks.	2,325 residents pledged to pick up after their dog. Pet waste stations and bags were delivered in December 2015. They will be assembled and installed during winter months of 2016 in 86 parks across the city and around the reservoirs.			In Progress
5. Develop yard maintenance program in 2015 and begin implementation in 2016.	The City contracted with Franklin Soil and Water and Bluestem Communication to develop messaging and determine outreach strategies. Focus groups were held with stakeholders that included representatives from local agencies, residents and lawn care companies. Research was conducted to understand the current science behind	X		

¹ See Appendix B for detailed summary of Public Education and Outreach activities.

<u>BMP PE1– Targeted Public Education Themes</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period ¹ :	Measurable Goals Achieved?		
		Yes	No	Other
	messaging.			
6. Continue GreenSpot Backyard Conservation and rain barrel cost share program.	682 Columbus residents attended a workshop or completed an online course on causes and prevention of stormwater pollution. Each resident was eligible to receive a rain barrel at a reduced price or a rebate on a rain barrel, compost bin or native plants.	X		
7. Establish grant program for watershed organizations to promote green infrastructure credit and develop a mandatory training course as part of grant eligibility.	Initial efforts to develop a grant program began with a survey of existing facility owners that appeared to be eligible for the credit.			X*
8. Continue public education through the Utility Update and GreenSpot application, outreach activities, webinars and social media.	GreenSpot recruited 2,094 new household members in 2015 and participated in dozens of events where measures such as washing the car over grass (or at a commercial car wash), picking up pet waste, installing rain gardens/rain barrels and reducing the amount of fertilizers, pesticides, and herbicides used on the lawn were discussed. Seventy-five local businesses became GreenSpot members in 2015 and have committed to or have already taken steps that have a positive influence on reducing stormwater runoff and/or allowing more natural filtering to take place. A list of local businesses who have committed to take	X		

<u>BMP PE1– Targeted Public Education Themes</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period ¹ :	Measurable Goals Achieved?		
		Yes	No	Other
	action to reduce stormwater runoff is provided in Appendix D. GreenSpot held a webinar for small businesses on ways to conserve and protect water including presentations by Eco Plumbers and Williams Creek Consulting. As part of GreenSpot’s Corporate Sustainability Initiative, the City’s Wastewater Pretreatment Analyst presented information to six large businesses on fats, oils and grease, stormwater pollution prevention, spill prevention control and counter control measures and green infrastructure. Participants learned about illicit connections, proper container storage, proper waste storage, proper vehicle parking/storage, and site pollution prevention actions.			
9. Identify power washer companies and create/distribute educational information starting in 2015.	Flyer and flow chart on power washing were revised and updated. Information on proper power washing methods was included in the spring 2015 bill insert. Twenty-four power washing companies were contacted and provided educational information as part of the City’s outreach program.	X		
10. Continue working with Columbus Public Health’s (CPH) Food Protection Program to distribute FOG educational information.	The City conducted an annual FOG training for CPH employees. 4,343 FOG inspections were performed and 962 door hangers were distributed.	X		
Planned Activity for Next	In early 2016 a logo will be chosen for the lawn care program and the messages will be refined. An			

<u>BMP PE1– Targeted Public Education Themes</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period¹:	Measurable Goals Achieved?		
		Yes	No	Other
Reporting Period:	information card will be developed for distribution via partnering lawn care companies.			
Discussion:	* Before beginning the grant program, the City contracted with the Mid-Ohio Regional Planning Commission (MORPC) to look into why the credit is currently underutilized. As part of the scope of service for the Greenways Water Quality grant, MORPC staff reached out to representatives of five locations in Columbus that were eligible for the GI credit to find out why they did not take advantage of it. MORPC staff came to these conclusions: 1) knowledge of the existence of the credit may be low among developers of smaller projects not utilizing some of the major design firms, 2) the costs of applying for the credit for smaller projects outweigh the value of the credit, and 3) the application process is viewed as too complicated, time consuming and uncertain.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Proper management and disposal of used oil and toxic materials

BMP PE2 – Educate Auto Repair Businesses and General Public about Vehicle Fluids and Tire Recyclers				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publicize locations of recyclers of used oil and tires through SWACO.	1. Instructions on how to properly dispose of used tires and motor oil are posted on the SWACO web site: http://www.swaco.org/Residents/disposal-information.aspx 2. Household hazardous waste (HHW) recyclers, dates and locations of HHW drop off events coordinated by SWACO are posted on the SWACO web page: http://www.swaco.org/Residents/HouseholdHazardousWaste.aspx 3. Information on HHW disposal and link to SWACO site available on Division of Refuse web page within the Columbus Public Service Department: http://www.columbus.gov/Templates/Detail.aspx?id=64642	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Inform individuals of proper disposal of household hazardous and toxic materials

BMP PE3/PI5 – Educate General Public about Household Hazardous Wastes and Drop Off/Collection				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publicize locations of collection and recyclers of household hazardous waste (HHW) through SWACO.	Publicized location of HHW drop off locations and times through the Solid Waste Authority of Central Ohio (SWACO), which coordinates HHW events in Franklin County. SWACO HHW web page is: http://www.swaco.org/Residents/HouseholdHazardousWaste.aspx . This page also is accessible through a link on the Division of Refuse web page within the Columbus Public Service Department http://www.columbus.gov/Templates/Detail.aspx?id=64642	X		
2. In cooperation with SWACO, conduct annual HHW drop off events each year.	1. One HHW drop-off event was conducted in 2015. 2. The City maintains a permanent HHW drop-off facility at 645 E. 8th Avenue.	X		
3. Track amount of HHW collected per year.	Collected 195 tons of HHW ² .	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

² The 2014 Annual Report indicated 218 tons of HHW was collected. The actual amount of HHW collected in 2014 was 373 tons.

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Residential Lawn Care Program

<u>BMP PE4 – Educate Lawn Care Businesses and General Public About Lawn Chemicals and Yard Waste</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Include in the stormwater edition of the Utility Update distributed to 310,000 rate payers.	Spring 2015 stormwater edition covered opportunities to participate in river cleanups, watershed groups, storm drain marking; onsite stormwater management and the GreenSpot backyards program; outdoor cleaning for residents and businesses; and the PUP program.			In Progress*
2. Develop yard maintenance nutrient management program in 2015 and begin implementation in 2016.	Messages were developed in 2015 and will be implemented in 2016.	X		
3. Publicize City’s yard waste collection/recycling program offered through the Division of Refuse.	<ol style="list-style-type: none"> 1. Publicized recycling tips for homeowners through the Division of Refuse website at: http://www.columbus.gov/RecyColumbus/ while highlighting/promoting the city’s new curbside recycling program through our Facebook page. 2. Publicized yard waste residential collection program through the Division of Refuse website at: http://www.columbus.gov/yardwaste/ 3. <u>Shared several social media reminders about the availability of yard waste collection as well as the benefits to stormwater quality.</u> 	X		
Planned Activity for	* Messaging for the proper use of lawn chemicals will be refined during the early part of 2016 and			

<u>BMP PE4 – Educate Lawn Care Businesses and General Public About Lawn Chemicals and Yard Waste</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Next Reporting Period:	delivered directly to residents through the Utility Update, and social media and web sites managed by DPU and partnering watershed groups and agencies.			
Discussion:	A new topic was introduced in the stormwater edition of the Utility Update based on the need to educate residents and businesses on proper outdoor cleaning techniques.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Create opportunities for citizens to participate in the implementation of stormwater activities.

BMP PE5 – Develop and Implement Program Assessment Mechanisms				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Track the number, types and locations of new GreenSpot signups annually and evaluate trends over time.	New GreenSpot businesses fell into these types: 58 offices, education, nonprofits; 8 industrial and commercial; 10 restaurants, grocers, and retail stores. Trends include: large businesses that participate in the GreenSpot Sustainability Initiative course tend to encourage their employees to become household GreenSpot members. For example, Chase Bank, Hexion, Goodwill Columbus, Whole Foods and Ohio State University generated 1100 new GreenSpot Households.	X		
2. Increase the number of GreenSpot households by 1,500 new signups annually.	2,094 households became GreenSpots.	X		
3. Increase the number of GreenSpot businesses by 10 percent annually.	GreenSpot Businesses increased by 7.5 percent.		X*	
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* The City fell slightly short of a 10% increase in GreenSpot businesses because resources were devoted to organizations such as those in the Sustainability Initiative course, North Market and recreational centers so that number of Greenspot households would increase. This effort was rewarded by exceeding the household goal by approximately 40 percent. Another factor in the lower number of businesses sign-ups was that several of them that requested additional guidance before they would be ready to join.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI1 – Opportunity for Public Involvement, Storm Drain Marking Project</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Solicit 150,000 homes for participation into the program via brochure distribution and/or bill inserts.	Distributed bill inserts to more than 295,000 residents.	X		
2. Distribute 300 storm drain markers to volunteer groups per year.	Distributed 1,230 storm drain markers.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Public Involvement and Participation Activities

BMP PI2 – Central Ohio River Pride and Other Waterway Litter Cleanups				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Organize at least one stream or river cleanup per year.	The City organized two cleanups and publicized several others organized by partner organizations.	X		
2. River Pride cleanups will be promoted to at least 150,000 Columbus households to encourage public participation.	Two events were promoted via social media and within the Spring bill insert that was sent to over 295,000 residents. River Pride cleanups were also publicized on the DPU Web site and 645-STREAM line.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Public Involvement and Participation Activities

<u>BMP PI3 – Onsite Stormwater Retention</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publicize and provide opportunity for onsite residential stormwater retention activities.	The GreenSpot Backyards program was publicized in the Utility Update, GreenSpot e-newsletter, Franklin Soil and Water newsletters and on DPU, FSWCD, GreenSpot, MORPC and watershed groups’ social media outlets.	X		
2. Track number of rain barrels sold through the rain barrel cost share program and rain gardens installed through the GreenSpot Backyards program.	Through the GreenSpot Backyards program, residents received rebates for 144 rain barrels, 115 compost bins, and 121 native plants.	X		
Planned Activity for Next Reporting Period:	We continue to look for ways to merge existing programs and create a more cohesive stormwater education program that includes unified messaging with local agencies committed to clean water. As a starting point, we are working with FSWCD to develop a web page that can serve as a clearinghouse for information and resources.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

<u>BMP PI4 – Pet Waste Collection Bags</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Establish and maintain kiosks in city parks with pet waste bags.	1. Nine kiosks were maintained with pet waste bags at city reservoir park areas. 2. 108 pet waste stations were purchased for future installation at city parks. 3. Nine pet waste stations were purchased for future installation at city reservoir park areas.	X		
2. Distribute pet waste bags for use at city parks.	1. 9,000 pet waste bags were distributed at city reservoir parks. 2. 216,000 pet waste bags were purchased for future distribution at city parks.	X		
Planned Activity for Next Reporting Period:	Complete installation of 117 pet waste stations.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

Required SWMP Component: Public Involvement and Participation Activities

<u>BMP PI6 – Watershed and Land Stewardship</u>				
Status: Ongoing, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Perform 400 inspections per year of reservoir landowner properties in the Land Stewardship Program.	410 inspections of reservoir landowner properties under the Land Stewardship Program were conducted.	X		
2. Make 250 contacts per year to provide information and assistance to reservoir landowners in preparing or complying with a Land Stewardship Agreement.	327 contacts were made to contiguous neighbors regarding the maintenance of City of Columbus reservoir property and the land stewardship program.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI7 – Public Hearings and Presentations</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Publish public meeting dates and locations on the City’s web site and/or by email/mail subscriber notification.	All Columbus City Council meeting dates are published on the City’s website. Special Council meetings directly involving Public Utilities are also shared via social media. ³	X		
2. Hold at least one public hearing per year or meeting where residents can comment on stormwater services. This may include City Council’s annual hearing on stormwater, sanitary and water rates or meetings between DPU and the Central Ohio Watershed Council to keep information current and answer any questions about water quality concerns.	1. Conducted six public meetings/hearings (one special rate hearing at City Council and five Sewer and Water Advisory Board meetings). 2. DPU director, deputy director, assistant director for sustainability and division administrators met quarterly with members of Central Ohio Watershed Council to share information and answer any questions and concerns.	X		
3. Make available public comment opportunities at City Council meetings.	Public comment opportunities are available at all Columbus City Council meetings, as well as during Council’s annual rates hearing and, in 2015, the hearing to outline the formal adoption of Blueprint Columbus. Public comment is also invited at all Sewer and Water Advisory Board meetings, held at DPU throughout the year.	X		
Planned Activity for Next	Meet or exceed measurable goals.			

³ See Appendix E for list of City Council meeting/hearing dates for 2015.

BMP PI7 – Public Hearings and Presentations

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Reporting Period:				
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI8 – GreenSpot</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Inspire and educate residents, businesses and non-profit/community groups on how to live greener, more sustainable lives, including tips on water quality protection, through various outreach efforts.	The GreenSpot outreach/publicity materials included a bill insert to 314,000 rate payers, three features in Franklin Soil and Water Conservation District’s newsletter to teachers, SWACO’s home page banner slot, tabling at events, and GreenSpotLight awards. 18 classrooms at 15 schools joined the GreenSpot Kids program, which brings sustainability into everyday classroom life for first graders.	X		
2. Track the number, types, and locations of new GreenSpot signups annually and evaluate trends over time.	New GreenSpot businesses fell into these types: 58 offices, education, nonprofits; 8 industrial and commercial; 10 restaurants, grocers, and retail stores. Trends include: large businesses that participate in the GreenSpot Sustainability Initiative course tend to encourage their employees to become household GreenSpot members. For example, Chase Bank, Hexion, Goodwill Columbus, Whole Foods and Ohio State University generated 1100 new GreenSpot Households.	X		
3. Increase the number of GreenSpot households by 1,500 new signups annually.	2,094 households became GreenSpots	X		
4. Increase the number of GreenSpot businesses by 10 percent annually.	GreenSpot Businesses increased by 7.5%		X*	

<u>BMP PI8 – GreenSpot</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* The City fell slightly short of a 10% increase in GreenSpot businesses because resources were devoted to organizations such as those in the Sustainability Initiative course, North Market and recreational centers so that number of Greenspot households would increase. This effort was rewarded by exceeding the household goal by approximately 40 percent. Another factor in the lower number of businesses sign-ups was that several of them that requested additional and guidance before they would be ready to join.			

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION

SWMP Component: Public Involvement and Participation Activities

<u>BMP PI9 – Central Ohio Children’s Water Festival and Other School Programs</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Provide opportunities for children to participate in events annually.	The Central Ohio Children’s Water Festival was held on May 19, 2015.	X		
2. Track the estimated number of participants in children’s events annually.	500 third-graders attended the water festival.	X		
Planned Activity for Next Reporting Period:	The 2016 Central Ohio Children’s Water Festival is scheduled for May 10.			
Discussion:				

PUBLIC EDUCATION AND OUTREACH ON STORMWATER IMPACTS AND PUBLIC INVOLVEMENT / PARTICIPATION
SWMP Component: Hotline

<u>BMP PI10 – 645-STREAM Hotline</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Establish a hotline for residents to call to report illicit discharges.	Made hotline available to city residents to report illicit discharges. The hotline phone number is 645-STREAM (7873).	X		
2. Publicize hotline in at least one publication each year.	1. Distributed bill inserts in which the hotline number was provided. 2. Publicized hotline number on DPU website and the DPU Facebook page. 3. Storm drain markers applied on inlets bear this hotline number. 4. Information cards and a door hanger were created for stormwater investigators to use. These two materials educate residents and new City employees on stormwater pollution and prominently display the 645-STREAM hotline.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

ILLCIT DISCHARGE

Required SWMP Component: Prohibit Non-Stormwater Discharges

<u>BMP ID1 – Enact and Enforce City Code to Prohibit Non-Stormwater Discharges</u>				
Status: Completed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Review City Code at the beginning of each five-year permit cycle, comparing the codes to EPA permit regulations, and the City will revise the codes as necessary.	Columbus City Code Chapter 1145 currently provides the legal authority to prohibit illicit discharges to the MS4 as well as spills and the dumping or disposing of materials other than stormwater into the MS4; to require compliance with conditions in ordinances, permits, contracts or orders; to inspect operators of construction sites and industrial and commercial activities and to receive and collect necessary information such as stormwater plans and operating procedures, and to effectively respond to violations.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

ILLCIT DISCHARGE
SWMP Component: Mapping

<u>BMP ID2 – Storm Sewer Mapping</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Annually review and update mapping of existing MS4 infrastructure and outfalls.	1. 20 outfalls were added to the City’s inventory during this reporting period. 2. New elements of the City’s storm sewer system were continually added throughout the year as new development and redevelopment plans were reviewed and approved by the City. Refer to the City’s Stormwater Management Plan for more information on the City’s mapping process.	X		
2. Annually review and update, if necessary, the list of HSTSs that have been found to discharge to the City’s MS4.	Field investigations and records research identified 107 HSTSs that discharge to the City’s MS4. ⁴	X*		
Planned Activity for Next Reporting Period:				
Discussion:	* The City utilized various datasets to identify those areas that are likely to contain previously unidentified HSTSs connected to the MS4. The project to characterize the type and points of discharge for HSTSs within the City limits was completed in 2015.			

⁴ See Appendix F for addresses of known HSTSs that discharge to the City’s MS4.

ILLICIT DISCHARGE

SWMP Component: Illicit Discharge Detection Program

<u>BMP ID3 – Dry Weather Field Screening Procedures and Activities</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update written dry weather field screening procedures.	No changes were warranted to the written dry weather field screening procedures included in the City’s Stormwater Management Plan.	X		
2. Field crews will receive annual training in dry weather field screening procedures.	Stormwater sampling field crews attended three training sessions to review proper screening procedures ⁵ .	X		
3. Dry weather field screen 20% of MS4 outfalls each year.	1. 1,650 outfalls, or 51% of MS4 outfalls, were field screened during this reporting period ⁶ . 2. 312 outfalls exhibited measurable flow during dry weather screening	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:	Nine instances of illicit discharges were identified through field screening activities ⁷ .			

⁵ See Appendix G for training summary of City personnel.

⁶ See Appendix H for major outfall dry weather screening results.

⁷ See Section 3.2 for description of illicit discharges identified through dry weather outfall screening.

ILLCIT DISCHARGE

SWMP Component: Illicit Discharge Detection Program

<u>BMP ID4 – Illicit Discharge Investigations</u>				
Status: Ongoing, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review for update, written procedures that describe how to identify and trace illicit discharges and who should be notified in the instance of an illicit discharge, spill, or illegal dumping.	Illicit discharge investigation and reporting procedures were reviewed during this reporting period ⁸ . No changes were warranted this period.	X		
2. Train investigators annually on established procedures for illicit discharge investigation, response, and notification.	Field crews attended six training sessions to review illicit discharge detection and notification procedures ⁹ .	X		
3. Investigate each illicit discharge detected during dry weather field screening.	Nine illicit discharges were found during dry weather screening and all 9 of the illicit discharges were investigated ¹⁰ .	X		
4. Respond, when notified, to each instance of a spill, illegal dumping, sanitary discharge, failing HSTS discharge, or industrial release per the established procedures.	1. Received 135 reports of illicit discharge from general public.* 2. Responded to 135 reports of illicit discharge as reported by the general public ¹¹ .	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	*Of the 135 reports of illicit discharges received, 90 reports resulted in the identification of an illicit discharge.			

⁸ Written investigation procedures are included in the City’s current Stormwater Management Plan.

⁹ See Appendix G for training summary of City personnel.

¹⁰ See Section 3.2 for more information about these investigations.

¹¹ See Appendix I for summary of illicit discharge reports and investigations.

ILLCIT DISCHARGE

SWMP Component: Illicit Discharge Detection Program

<u>BMP ID5 – Management of Home Septic Treatment Systems</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Maintain a list of HSTS addresses that can be feasibly connected to the City’s central sanitary sewer system through service lateral installation.	160 properties were determined to be located near an accessible sanitary sewer. The list of addresses was provided to Columbus Public Health so that these properties could be ordered to connect to the central sanitary sewer system.	X		
2. Inspect all known, off-lot discharging HSTSs annually.	All known, off-lot discharging HSTSs were inspected.	X		
3. Track properties that connect to the City’s central sanitary sewer system.	Fifty-three properties connected to the sanitary sewer system.	X		
4. Track properties that participate in the City’s STEP program.	Fourteen applicants received loans through the Septic Tank Elimination Program (STEP) to successfully abandon their HSTS and tie into the City’s sanitary sewer system.	X		
5. Develop process to identify and prioritize for future sanitary sewer extension areas.	The City refined the criteria for the prioritization process and will complete its analysis in early 2016.	X		
Planned Activity for Next Reporting Period:	<ol style="list-style-type: none"> 1. Issue orders to connect (to the central sanitary sewer system) to the owners of properties that are located near an accessible sanitary sewer. 2. Develop a list of priority areas for sanitary sewer extension projects. 3. Begin design of sewer extension projects for the priority areas. 			
Discussion:				

ILLICIT DISCHARGE

Required SWMP Component: Illicit Discharge Training, Tracking and Elimination Program

<u>BMP ID6 – Illicit Discharge Tracking and Elimination</u>				
Status: Ongoing, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Train upon hire all new employees on the identification of illicit discharges and proper reporting procedures to the City’s IDDE section.	407 new city employees were presented with information on illicit discharge identification and reporting.	X		
2. Enter results of illicit discharge investigations into tracking database for each illicit discharge investigated.	Responded to 135 reports of illicit discharge as reported by the general public and added 135 reports of illicit discharge to the City’s tracking databases.	X		
3. Close out/document elimination of illicit discharges in tracking database.	134 instances of illicit discharge reported by the general public and nine illicit discharges discovered during dry weather monitoring were closed out documenting that the illicit discharge was eliminated.*		X*	
4. Review annually for update an enforcement action schedule that documents enforcement actions the City will take to eliminate illicit discharges into the City’s MS4.	No changes to the enforcement action schedule were warranted this reporting period.	X		
5. Apply appropriate enforcement actions to eliminate each identified illicit discharge ¹² .	1. 32 Notices of Violation were issued. 2. \$8,500 in Administrative Fines were assessed. 3. 30 illicit discharges were referred to other agencies for enforcement/elimination.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			

¹² See Section 5.1.1 for summary of illicit discharge enforcement actions taken during reporting period.

BMP ID6 – Illicit Discharge Tracking and Elimination

Status:

Ongoing, as needed

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Discussion:	* The City of Columbus and the Ohio EPA are continuing to work with Ohio Mulch Supply at 1600 Universal Drive to mitigate the sources of illicit discharges for which an NOV was issued in May 2015.			

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP1 – Construction Site Pollution Prevention Regulation</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Annually review, and revise as needed, the Stormwater Drainage Manual and Erosion and Sediment Pollution Control Regulations.	The City’s Stormwater Drainage Manual (SWDM) requires that all construction activity within the city complies with the requirements of Ohio EPA’s current Construction General Permit or the Erosion and Sediment Pollution Control (ESPC) Regulations, whichever is more restrictive. These documents were reviewed internally and the City has identified an opportunity to improve the clarity of its regulations.			X*
Planned Activity for Next Reporting Period:	* The City will start the process in 2016 to update the SWDM and Erosion and Sediment Pollution Control Regulations.			
Discussion:				

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP2 - Construction Site Pollution Prevention Plan Review and Approval Process</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
The City will review and comment on all submitted construction site pollution prevention plans ¹³ .	<ol style="list-style-type: none"> 269 new construction site pollution prevention plans were submitted to the City for review/approval. 269 new construction site pollution prevention plans were reviewed and approved. 	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:	Due to multiple reviews of the same plans, the total number of plans reviewed was 411.			

¹³ See Appendix J for a list of Construction Site Pollution Prevention Plans that were reviewed.

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP3 – Construction Site Inspection</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update, written procedures that describe how construction inspections are prioritized and performed.	Written construction inspection procedures are presented in the City’s revised Stormwater Management Plan submitted concurrently with this report.	X		
2. Train inspectors annually on established procedures for construction site inspection.	Four construction inspectors attended the 2015 Central Ohio Stormwater and Erosion Control Expo and participated in other training opportunities ¹⁴ .	X		
3. Perform an inspection at each construction site at least once every four weeks on average. ¹⁵	1. 3,356 construction site inspections were performed. 2. Responded to 17 various storm/SWPPP related reports from the general public. 3. The average number of active construction site inspections per month was 280.	X		
4. Perform a follow-up inspection within 10 days from the date a Construction Inspection Report or formal Request for Voluntary Compliance is issued.	There were 111 construction sites in non-compliant status; 104 were resolved within 10 days. Six were issued NOV’s. Additionally, four of the six NOV’s were accompanied with Administrative Fines totaling \$4,000.00.	X		
5. Maintain 85% of construction sites in compliance with the City’s Construction Site Pollution Prevention Regulations.	Over 96% of construction sites inspected were in compliance.	X		
Planned Activity for Next	Meet or exceed measurable goals			

¹⁴ See Appendix G for training summary of City personnel.

¹⁵ See Appendix K for construction site visit summary.

BMP CP3 – Construction Site Inspection

Status:

Ongoing, annually

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Reporting Period:				
Discussion:				

CONSTRUCTION

SWMP Component: Construction Program

<u>BMP CP4 – Tracking and Enforcement</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Update site tracking spreadsheet to include new and active construction sites and add inspection dates, recommended actions, priority, and compliance history for each inspection.	1. 269 construction sites were added to the City’s construction site inventory this reporting period. 2. The total number of new construction sites inventoried as of the end of this reporting period is 269. 3. Added 3,364 inspection results into the City’s tracking spreadsheet.	X		
2. Review annually for update an enforcement action schedule that documents enforcement actions the City will take to ensure construction site compliance with the City’s Erosion and Sediment Pollution Control Regulations.	No changes to the enforcement action schedule were warranted this reporting period.	X		
3. Apply appropriate enforcement actions to achieve compliance with the City’s Erosion and Sediment Pollution Control Regulation ¹⁶ .	1. Six Notices of Violation were issued. 2. Four Administrative Fines were assessed for a total of \$4,000.00.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:				

¹⁶ See Section 5.1.2 for summary of construction enforcement actions taken during reporting period.

POST CONSTRUCTION

SWMP Component: Post-Construction Regulations

<u>BMP PC1 – Post-Construction BMP Requirements</u>				
Status: Ongoing, annually, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review the City’s Stormwater Drainage Manual (SWDM) when necessary based upon comments and regulatory changes received throughout the year. Revise, if necessary, to reflect accepted standard practices in stormwater management and stormwater regulation.	Revisions to SWDM were completed in August 2012. No revisions were made to the SWDM this reporting period.	X		
Planned Activity for Next Reporting Period:	The City will be starting the process in 2016 to update the SWDM and Erosion and Sediment Pollution Control Regulations.			
Discussion:				

POST CONSTRUCTION

SWMP Component: Stormwater Pollution Prevention Plan Reviews

<u>BMP PC2 – Stormwater Post-Construction Plan Review and Approval Process</u>				
Status: Complete, as needed				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review construction plans and Stormwater Management Reports for all new development or redevelopment projects to ensure implementation of post-construction stormwater BMPs as required by the SWDM.	1. 170 stormwater construction plans were approved, and of those 133 included post-construction BMPs. ¹⁷	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

¹⁷ See Appendix L for a list of approved plans containing post-construction BMPs.

POST CONSTRUCTION

SWMP Component: Long Term Operation and Maintenance of BMPs

<u>BMP PC3 – BMP Maintenance Requirements and Inspection</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Contact and advise the BMP owner of maintenance and reporting responsibilities for each new BMP added to the City’s BMP inventory.	1. Maintenance and reporting responsibilities are required to be clearly indicated on all plans approved for construction. 2. 16 meetings and 27 phone calls were conducted with a BMP owner to review BMP maintenance plans and requirements.		X*	
2. Inspect each post-construction water quality BMP in the City’s BMP inventory at least once during each permit cycle.	1. 1,652 post-construction water quality BMPs have been constructed to date. 2. Inspected 221 post-construction water quality BMPs for proper maintenance and operation during this reporting period ¹⁸ .			In process**
Planned Activity for Next Reporting Period:	Meet or exceed measurable goal.			
Discussion:	* Due to staffing levels, the City was not able to contact the owner of each newly constructed BMP in 2015. The City has revised its process and hired a full-time inspector to ensure that new BMP owners are contacted and properly advised in 2016. ** The City hired a full-time inspector to inspect maintenance of post-construction BMPs in May of 2015.			

¹⁸ Sites where post-construction BMPs were inspected are listed in Appendix M.

POST CONSTRUCTION

SWMP Component: Long Term Operation and Maintenance of BMPs

<u>BMP PC4 – BMP Maintenance Tracking and Enforcement</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Update post-construction BMP database monthly to include new BMPs that are planned and constructed as part of new and redevelopment projects.	1. 936 (planned and constructed) post construction water quality BMPs were added to the post-construction BMP database this reporting period. 2. 1977 post-construction water quality BMPs that are either planned or constructed have been inventoried as of the end of this reporting period.	X		
2. Enter results of post-construction BMP inspections into tracking database for each BMP inspected.	The post-construction BMP database was updated to include inspection reports for 221 post construction water quality BMPs inspected.	X		
3. Review annually for update an enforcement action schedule that documents enforcement actions the City will take to ensure compliance with the City’s post-construction BMP maintenance requirements.	No changes to the enforcement action schedule were warranted this reporting period.	X		
4. Apply appropriate enforcement actions to ensure post-construction BMP maintenance compliance.	1. 137 inspection reports were sent to BMP owners. 3. No Notices of Violation were issued. 4. No Administrative Fines were issued.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	In 2015 the City completed a review of construction plans on file dating back to 2004 for post-construction BMPs that were included as part of their design. The purpose of the review was to			

BMP PC4 – BMP Maintenance Tracking and Enforcement

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
	screen past plans for any BMPs that might have been missed in prior years so that all BMPs on record are accounted for in the City's tracking database. All BMPs found as a result of this effort are included in BMP totals for this report.			

POLLUTION PREVENTION/GOOD HOUSEKEEPING
Required SWMP Component: List of Municipal Operations

<u>BMP GH1 – Maintain Inventory of Facilities Owned/Operated and Activities Conducted by the City Having Potential to Generate Stormwater Pollution</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Review and update the inventory and GIS coverage annually.	Total number of City O&M facilities currently stands at 86 ¹⁹ .	X		
Compare inventoried facilities to applicability requirements of the Ohio EPA’s Industrial Stormwater Permit upon each 5-year permit renewal period.	Six facilities have been identified as requiring industrial permit coverage.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goal			
Discussion:	<ol style="list-style-type: none"> 1. The stockpiling activities at the McKinley Ave. quarry were discontinued in 2015 and the facility removed from the City’s O&M inventory. 2. The Columbus Public Health facility was added to the City’s O&M inventory this reporting period. This facility was not originally identified for inclusion in the inventory. 3. The Transportation Central Outpost facility was moved to a new location in 2015. 			

¹⁹ See Appendix N for current list of City facilities that conduct activities having stormwater pollution potential.

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH2 - Develop and Implement Pollution Prevention Practices for City Facilities/Activities</u>				
Status: Complete, ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Submit Notices of Intent and prepare Stormwater Pollution Prevention Plans (SWPPPs) or submit No Exposure Applications to OEPA for Tier I city facilities ²⁰ that require coverage under OEPA’s Industrial Stormwater Permit Program.	General permit confirmation letters were issued to six city-operated facilities by Ohio EPA during the 2012 reporting period ²¹ .	X		
2. Maintain and distribute written pollution prevention practices and materials online to representative of operating City departments.	The online repository of written pollution prevention practices and materials was reviewed and no changes were warranted.	X		
3. Incorporate written pollution prevention practices into SWPPPs for Tier II city facilities ²² .	SWPPPs have been prepared for 75 of the 76 Tier II facilities as of the end of this reporting period.			In progress*
4. Continue to implement pollution prevention practices at City-owned and operated O&M facilities that include maintenance of spill kits at City refueling facilities and covering of materials stored outdoors where warranted.	The City continued to implement pollution prevention practices at its O&M facilities. The inspections performed at 59 facilities indicated that practices are being performed.			In progress**
Planned Activity for	Meet or exceed measurable goals.			

²⁰ Tier I facilities are defined as those facilities that require coverage under an Industrial Stormwater NPDES permit or No Exposure Certification.

²¹ See Appendix N for industrial permit numbers for regulated City facilities.

²² Tier II facilities are defined as those facilities that do not require coverage under an Industrial Stormwater NPDES permit or No Exposure Certification but still have the potential to generate stormwater pollution.

BMP GH2 - Develop and Implement Pollution Prevention Practices for City Facilities/Activities

Status:

Complete, ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Next Reporting Period:				
Discussion:	<p>* Using the Department of Public Utilities' EMS as a template, the Division of Fleet Management is working with other City departments to develop an EMS targeted at fleet maintenance operations. Development of new SWPPPs and updates to existing SWPPPs are part of the EMS initiative. The City is committed to enhancing protection of water resources through compliance with stormwater regulations and improvement of the maintenance and operation of City facilities.</p> <p>** The City did not perform annual inspections at each O&M facility this reporting period due to personnel turnover. The City is evaluating methods to ensure that the responsibilities for stormwater pollution prevention practices are met by each city department.</p>			

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH3 – Street Cleaning</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Continue to incorporate high efficiency sweepers (PM-10 street sweeping equipment) into the City’s street sweeping inventory.	No new sweepers were purchased during this reporting period. ²³			N/A
2. Sweep each curbed city street at least twice per year. Track and report total lane miles sweep annually.	1. Each curbed street was swept at least twice. 2. 17,281 miles of streets were swept.	X		
3. Collect and dispose of all debris and litter collected from street sweeping and roadside litter pick up operations at a sanitary landfill. Track and report total tonnage of material collected and disposed each year.	11,020 tons of debris and litter were collected and disposed.	X		
4. Continue to implement existing practices to reduce stormwater pollution from storage of materials collected during street sweeping operations and incorporate permanent structural controls when and where feasible.	1. The Transportation Division hauls debris to the transfer stations (Morse Road and Jackson Pike) or directly to the landfill. Debris that must be temporarily stored at each outpost is kept to a minimum and within a containment area prior to final disposal on a weekly basis. 2. A new street sweeper dump area was constructed at the Marion Outpost. *	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* In response to the 2014 EMS Fleet city-wide audit, the Transportation Division has implemented			

²³ See Appendix O for the list of the City’s current street sweeper inventory.

BMP GH3 – Street Cleaning

Status:

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
	improvements at some locations and planned or budgeted for them at others.			

POLLUTION PREVENTION/GOOD HOUSEKEEPING
Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH4 – Deicing and Snow Removal</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Continue to store all de-icing material stockpiles under roof or otherwise to prevent materials from entering stormwater runoff.	City stored all deicing materials in six salt barns.	X		
2. Annually calibrate salt spreaders to meter the minimum amount of material for public safety.	All 87 trucks used for de-icing operations and snow removal were calibrated for minimum salt application.	X		
3. Provide training annually to city staff performing de-icing operations to ensure that the established BMP procedures are followed and the minimum amount of de-icing materials is applied to ensure public safety.	245city employees were trained on proper salt application techniques at City’s Snow Warriors training session.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Pollution Prevention Procedures

<u>BMP GH5 – Refuse Collection</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Collect and dispose of refuse weekly and recycled materials biweekly from household within the city.	1. 303,083 tons of refuse was collected and disposed of through the City’s curbside collection program. 2. 33,302 tons of recycling was collected and disposed of from residents through the City’s curbside collection program.	X		
2. Coordinate at least one neighborhood refuse collection campaign per year.	1. 447 neighborhood litter cleanups were conducted. 2. 402,885 pounds of refuse was collected and disposed.	X		
3. Collect yard waste from single-family residential households biweekly.	22,974 tons of yard waste from city residents was collected and composted.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Stormwater Facility Maintenance

<u>BMP GH6 – Stormwater Infrastructure Inspection, Tracking, and Maintenance</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Inspect 10,000 catch basins/inlets annually for cleaning.	1. 14,221 catch basins/inlets were inspected 2. 3,483 catch basins/inlets were cleaned	X		
2. Televis 15,000 lineal feet storm sewer annually.	27,165 lineal feet of storm sewers were televised.	X		
3. Clean 50,000 feet of storm sewer pipe per year.	65,574 feet of storm sewer pipe was cleaned.	X		
4. Inspect all stormwater pump stations at least once quarterly.	1. Each pump station was inspected 35 times during the reporting period. 2. Six storm water pump stations were cleaned this reporting period.	X		
5. Inspect, clean, mow, or otherwise maintain all DOSD stormwater detention/retention basins at least once annually.	All 27 stormwater detention/retention basins are being maintained. Preventative maintenance routes for trash rack and/or sluice gate maintenance/inspection have been established. Mowing contract also in place.	X		
6. Inspect/clean all DOSD maintained trash racks at least twice annually.	1,174 trash rack inspections were conducted. 143 trash rack cleanings were performed.	X		
7. Clean 30,000 lineal feet of drainage ditches annually.	27,695 feet of drainage ditches were cleaned.		X*	
8. Maintain and update a database to track regular stormwater facility inspection and maintenance.	1. Sewer Maintenance Operations (SMOC) used the Oracle Utilities Work and Asset Management application to track maintenance and inspection activities	X		

BMP GH6 – Stormwater Infrastructure Inspection, Tracking, and Maintenance

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
	involving the collection system. 2. The City tracked the completion of over 10,604 storm, sanitary, and combined collection system maintenance activities in the Oracle application.			
9. Follow written pollution prevention (P2) practices for stormwater system maintenance activities.	The written P2 practices for stormwater maintenance included in the SWPPP for the City’s Sewer Maintenance Operations facility are followed when performing maintenance activities.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* Ditch cleaning efforts in 2015 were hampered by wet weather and the unplanned diversion of resources to address the emergency repair of other infrastructure.			

POLLUTION PREVENTION/GOOD HOUSEKEEPING

Required SWMP Component: Training and Education

<u>BMP GH7 - Employee Stormwater Pollution Awareness Training</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period²⁴:	Measurable Goals Achieved?		
		Yes	No	Other
1. All new City employees undergoing orientation will receive information on stormwater pollution awareness.	407 new city employees were presented with information on stormwater pollution.	X		
2. All new city employees undergoing orientation will be informed of the need and phone number to report illicit discharges.	407 new city employees were presented with information on illicit discharge identification and reporting.	X		
3. City employees that conduct activities at city Tier I and Tier II sites will be trained on elements of their respective stormwater pollution prevention plans annually.	1. 347 employees were trained at Tier I facilities. 2. 1,709 employees were trained at Tier II facilities.		X*	
4. Conduct updated training refresher once every permit term for personnel responsible for overseeing the implementation of P2 practices at City Tier I and Tier II sites.	Training was provided to responsible persons when the City's written P2 practices were updated in 2013.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:	* Training was provided to employees at all but five O&M facilities due to the relocation of one facility and turnover in personnel responsible for the others. The City is evaluating methods to ensure that the responsibilities for stormwater training at each facility are met.			

²⁴ See Appendix G for summary of City training sessions conducted this reporting period.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Inventory of Industrial Facilities

<u>BMP IF1 – Prepare Inventory of Industrial Facilities</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Maintain a list of industries that have the potential for meeting the definition of 40 CFR 122.26(b)(14).	The City continued to maintain its database of industries.	X		
2. Update the City’s inventory annually based on: <ul style="list-style-type: none"> a. NOIs submitted as part of Stormwater Management Plans, b. New industries identified within the Daily Reporter publication, c. Industries identified through recent illicit discharge and detection investigations d. New industries identified under the Industrial Waste Pretreatment Group, and e. Review of lists of permitted/no exposure qualifying industries maintained by Ohio EPA. 	Inventory updated this period. Current total number of industrial sites in the City’s inventory is 942.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:	The total number of industries in the City’s inventory continues to increase due to awareness and proper identification.			

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspection Schedule and Inspection Form

<u>BMP IF2 – Acquisition, Review, and Tracking of Permit Information, Stormwater Pollution Prevention Plans, and Industrial Monitoring Data</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Contact Ohio EPA and newly identified industries at least once each year to request: <ul style="list-style-type: none"> a. OEPA NPDES permit numbers or Notices of Intent forms, b. OEPA No Exposure Certification numbers, c. Stormwater Pollution Prevention Plans (SWPPPs), d. Stormwater monitoring data. 	1. In response to contacts made by the city to date, the City has the following documents actively on file: <ul style="list-style-type: none"> a. 120 Notices of Intent and 121 OEPA NPDES permit numbers b. 181 No Exposure Certifications 2. 44 SWPPP plans were reviewed during this reporting period. 3. Monitoring data for 4 industries was received this reporting period 4. Procured copy of list of industrial permit holders from Ohio EPA; incorporated data into the industry list.	X		
2. Update classifications of Category 1 and Category 2 industries annually. ²⁵	1. 587 Category 1 industries have been identified ²⁶ . 2. 355 Category 2 industries have been identified ²⁷ .	X		

²⁵ Industries that cannot show proof of NPDES permit coverage or No Exposure Certification by Ohio EPA or the industrial operator will be classified as Category 1 industries. Industries will be classified as Category 2 industries if Ohio EPA or the industrial operator can show proof of coverage under an industrial NPDES permit or no exposure certification by Ohio EPA and discharge to the City’s MS4. Once a Category 1 industry obtains permit coverage, the industry will be reclassified as Category 2.

²⁶ See Appendix P for list of Category 1 Industries.

²⁷ See Appendix Q for list of Category 2 Industries.

BMP IF2 – Acquisition, Review, and Tracking of Permit Information, Stormwater Pollution Prevention Plans, and Industrial Monitoring Data

Status:
Ongoing

Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
3. Maintain a hard copy file for SWPPPs and monitoring data received for each Category 2 industrial facility.	Hard copy files are available and located at the City's Division of Sewerage and Drainage, 1250 Fairwood Ave., Columbus, Ohio.	X		
Planned Activity for Next Reporting Period:	<ol style="list-style-type: none"> 1. Meet or exceed measurable goals 2. Follow-up with Ohio to acquire NOI's, General Permit confirmation numbers, and No Exposure application and certification letters during the 2016 reporting period. 3. Acquire monitoring data for Category 2 industries during the 2016 reporting period. 			
Discussion:	The lists of Category 1 and Category 2 facilities includes some that are believed to be closed and no longer in operation but additional review is required to verify before these facilities are removed from the inventory. As verification of closure is made the facility will no longer be included in the Category lists.			

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspection Schedule and Form

<u>BMP IF3 – Establish Industrial Facility Inspection Schedule</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Evaluate and prioritize industries for inspections annually.	1. 180 Category 1 and 130 Category 2 industries have been prioritized based on a “High” rating of illicit discharge potential ²⁸ . 2. 103 Category 1 and 68 Category 2 industries have been prioritized based on a “Medium” rating of illicit discharge potential. 3. 292 Category 1 and 127 Category 2 industries have been prioritized based on a “Low” rating of illicit discharge potential. 4. 12 Category 1 and 30 Category 2 industries could not be prioritized since SIC numbers are unknown.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:				

²⁸ High, low, and medium illicit discharge potentials are assigned to each industry based on information provided in Appendix A of the Illicit Discharge and Detection and Elimination, A Guidance Manual for Program Development and Technical Assessments, developed in cooperation with the Center for Watershed Protection and Robert Pitt with the University of Alabama.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspection Schedule and Form

<u>BMP IF4 –Industrial Facility Inspection Form</u>				
Status: Ongoing, annually				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Review annually for update, the Stormwater Industrial Site Inspection form.	The Stormwater Industrial Site Inspection form was revised in February 2015 to further enhance and comply with requirements in the City’s MS4 permit.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspections

<u>BMP IF5 – Staff Training</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
Implement routine training programs for employees that perform industrial site inspections.	The City’s industrial stormwater inspectors participated in 6 training opportunities related to industrial activities this reporting period. ²⁹	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:	Training taken in 2015 represented more in-depth analysis of permitting and potential future permit changes that built upon past training that provided a foundation for the inspectors.			

²⁹ See Appendix G for details of City training sessions conducted this reporting period.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspections

<u>BMP IF6 – Industrial Facility Inspections</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update, written procedures that describe how industrial inspections are performed.	The written industrial inspection procedures contained in the City’s Stormwater Management Plan were reviewed and found to be up-to-date.	X		
2. Review the SWPPPs of each permitted industry inspected.	The SWPPPs for 43 permitted industries were reviewed as part of an inspection. ³⁰	X		
3. Inspect each Category 1 and Category 2 industry at least once within the City’s MS4 5-year permit cycle.	1. 205 inspections were conducted at Category 1 industrial facilities ³¹ . 2. 144 inspections were conducted at Category 2 industrial facilities ³² .			In progress*
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals			
Discussion:	* The City is on pace to inspect each Category 1 and Category 2 industry during the current permit cycle.			

³⁰ Not all industries are required to obtain permit coverage.

³¹ See Appendix P for Category 1 industrial inspection dates.

³² See Appendix Q for Category 2 industrial inspection dates.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Industrial Facility Inspections

<u>BMP IF7 – Industrial Facility Inspection Tracking and Enforcement</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Enter results of industrial inspections into the tracking database for each industry inspected.	Inspection information for 349 industrial inspections were added to the City’s tracking database.	X		
2. Apply appropriate enforcement actions to eliminate potential pollution problems identified at industrial sites.	1. Five instances of suspected illicit discharge to the MS4 were observed during industrial inspections. ³³	X		
3. Document and forward to Ohio EPA observed violations of Ohio EPA’s industrial stormwater permit.	1. 349 inspection reports were issued to industry operators during this reporting period. 2. 36 reports of suspected violation of an operator’s permit were submitted to the Ohio EPA.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

³³ See Appendix I for summary of illicit discharge reports and investigations.

INDUSTRIAL AND RELATED FACILITIES

Required SWMP Component: Monitoring Industrial Sites

<u>BMP IF8 – Monitoring and Sampling of Industrial Sites</u>				
Status: Ongoing				
Measurable Goals	Summary of Activity During Reporting Period:	Measurable Goals Achieved?		
		Yes	No	Other
1. Review annually for update, written procedures that identify constituents of concern and when industrial facilities are required to monitor stormwater discharges.	The written procedures outlining industrial monitoring strategies included in City’s Stormwater Management Plan were reviewed and found to be up-to-date.	X		
2. Respond, when notified, to each instance of an industrial release per established procedures.	The City responded to 8 notifications of a suspected industrial release.	X		
3. Review and file stormwater monitoring and sampling reports submitted by industrial operators.	Monitoring reports from 4 Category 2 industries were reviewed by the City.	X		
Planned Activity for Next Reporting Period:	Meet or exceed measurable goals.			
Discussion:				

SECTION 3 – SUMMARY AND ANALYSIS OF COLLECTED INFORMATION

Information provided in this section was generated by the wet weather and dry weather outfall monitoring programs that were conducted from January 1, 2015 to December 31, 2015. A summary of activities and findings associated with development and implementation of the city-wide wet weather monitoring program is provided in Section 3.1. A summary and elimination status for illicit discharges detected under the City's dry weather outfall monitoring program is summarized in Section 3.2.

3.1 Summary of City-Wide Wet Weather Monitoring Activities

The goal of the City's wet weather sampling program was to collect samples at three locations throughout the City of Columbus during each quarter of 2015. The three locations selected for sampling were outfalls that are located downstream of land uses representing residential, commercial and industrial development. Analysis of the samples obtained from all three locations was performed by MASI Environmental Laboratories (MASI) and the Columbus Surveillance Laboratory. A full report on the City's wet weather monitoring activities and findings this reporting period can be found in city-wide monitoring report located in Appendix R.

Five sampling locations throughout the City representing medium density residential, high density residential, multi-family residential, commercial, and industrial land uses were monitored under permit No. 4PI00000*BD. The wet weather water quality data from these sites were thoroughly analyzed and reviewed. In an effort to further characterize overall water quality of the City's MS4, the City identified the three new sampling locations referenced above. In 2013 the City began monitoring the three new sampling locations in lieu of the previous five locations that were monitored in past years.

The City was able to collect samples at each of the three outfalls during all four quarters of 2015. The samples were analyzed by MASI and city laboratories for the following parameters:

MASI parameters

- Fecal coliform (#/100 ml)
- E. coli (#/100 ml)
- Nitrite (NO₂) (mg/l)
- Total Phosphorous (mg/l)
- Orthophosphate (mg/l)
- Carbonaceous biochemical oxygen demand (CBOD₅) (mg/l)
- Biochemical oxygen demand (BOD₅) (mg/l)
- Chemical oxygen demand (COD) (mg/l)

The Columbus Surveillance Laboratory parameters

- Total suspended solids (TSS) (mg/l)
- Ammonia (NH₃) (mg/l)
- Alkalinity (mg/l)
- Oil & grease (mg/l)
- Total cyanide (µg/l)

- Hardness (mg/l)
- Total recoverable cadmium (Cd) (µg/l)
- Total recoverable chromium (Cr) (µg/l)
- Total recoverable copper (Cu) (µg/l)
- Total recoverable lead (Pb) (µg/l)
- Total recoverable nickel (Ni) (µg/l)
- Total recoverable zinc (Zn) (µg/l)

3.1.1 Findings Summary

2015 sample results were compared to values provided in the National Stormwater Quality Database (NSQD) to determine how concentrations of constituents at Columbus outfalls compared to national datasets. 2015 results were also compared with sampling results obtained from 2007 through 2014 to determine if sample results collected across similar land uses from other parts of the City are different. A summary of these comparisons is presented below.

Comparison of Outfall Monitoring Data to NSQD Data

With the following exceptions, the 2015 City sampling values at the three sampling locations are generally consistent with national datasets. The following is a summary of notable differences between the NSQD and sample results collected at the three outfall locations:

- Fourth quarter Ammonia levels were higher than NSQD 75th percentile for all sites sampled.
- BOD levels in residential areas were higher than the NSQD 75th percentile.
- Analyte values for most parameters are consistently lower than the median and 25th percentile values of the NSQD data for each sampling site.
- Bacteria levels were significantly higher than the NSQD 75th percentile during the second and third quarters at each sampling location.

CBOD5, alkalinity, and nitrite were not included in the comparisons because less than 100 events were available within the NSQD.

Comparison of Outfall Monitoring Data to 2007 through 2014 Sampling Results

Comparison with the average event mean concentrations for years 2007 through 2014 reveals the following observations:

- The comparisons of 2015 data for Fecal Coliform and E. Coli bacteria parameters, both, are generally significantly higher than previous years.
- Levels of Zinc in the industrial area (OF-01-CD) have been steadily increasing over the sampling period.
- Levels of Total Suspended Solids in the commercial area (OF-02-CD) have been steadily increasing over the sampling period.

3.2 Illicit Discharge Detection and Elimination/Dry Weather Monitoring

As part of its Illicit Discharge Detection and Elimination (IDDE) program, the City conducted dry weather monitoring at stormwater outfalls during the January 1, 2015 to December 31, 2015 reporting period to identify the presence of illicit discharges in the City's storm sewer system. The City also investigated reports of illicit discharges into the City's storm sewer system received from the community. A full description of the activities conducted under the IDDE programs during the reporting period is provided in Section 2. The results of the dry weather outfall monitoring program are located in Appendix H, whereas a summary of illicit discharges confirmed as a result of dry weather outfall monitoring during the January 1, 2015 to December 31, 2015 reporting period are provided below.

- An illicit discharge was detected during this reporting period at city outfall No. 0179T0181. The discharge showed high levels of chlorine. Investigation revealed that the discharge was caused by a leaking city waterline. The discharge was reported to the City of Columbus Division of Water for resolution.
- An illicit discharge was detected during this reporting period at city outfall No. 0747T0096. The discharge showed high levels of chlorine. Investigation revealed that the discharge was caused by a leaking city waterline. The discharge was reported to the City of Columbus Division of Water for resolution.
- An illicit discharge was detected during this reporting period at city outfall No. 0477T0014. The discharge had a strong sewage smell. Investigation revealed that the discharge was caused by a failing septic system. The discharge was reported to the City of Columbus Health Department for resolution.
- An illicit discharge was detected during this reporting period at city open channel No. BW 314. The discharge had a strong sewage smell. Investigation revealed that the discharge was caused by a failing septic system. The discharge was reported to the Franklin County Health Department for resolution.
- An illicit discharge was detected during this reporting period at city outfall No. 0181T0663. The discharge showed high levels of detergents. Investigation revealed that the source of discharge was an illegally connected washing machine. The discharge has been connected to the sanitary sewer.
- An illicit discharge was detected during this reporting period at city outfall No. 0037T0467. The discharge showed floatables (mulch). Investigation revealed that the source of discharge was from Ohio Mulch Supply. A Notice of Violation was issued and the discharge was reported to the Ohio Environmental Protection Agency.
- An illicit discharge was detected during this reporting period at city outfall No. 0394T0281. The discharge showed high levels of chlorine. Investigation revealed that the discharge was caused by a leaking city waterline. The discharge was reported to the City of Columbus Division of Water for resolution.
- An illicit discharge was detected during this reporting period at city outfall No. 0477T0377. The discharge showed high levels of chlorine. Investigation revealed that the discharge was caused by a leaking city waterline. The discharge was reported to the City of Columbus Division of Water for resolution.

- An illicit discharge was detected during this reporting period at city outfall No. 0546T0113. The discharge showed high levels of chlorine. Investigation revealed that the discharge was caused by a leaking city waterline. The discharge was reported to the City of Columbus Division of Water for resolution.

SECTION 4 – REVISIONS TO ASSESSMENT OF CONTROLS AND FISCAL ANALYSIS

There are no revisions necessary to the assessment of controls as implemented under the present permit.

Funds generated by the City of Columbus Stormwater Utility are used to cover all costs for Compliance with the NPDES permit and the City’s stormwater Capital Improvements Program. The utility fee is collected from residential and non-residential customers. In 2015, a residential customer was charged one Equivalent Residential Unit (1 ERU = 2000 sq. ft) equal to \$0.1500 (effective 01/01/2015) per day for an average annual cost (365 days x \$0.1500) of \$54.75. Non-residential customers pay the same ERU rate based on their total impervious area. The following table contains expenditures for the NPDES program during the reporting period.

Category	Cost
Personnel	\$1,585,641.24
Materials & Supplies	\$14,593.35
Services	\$11,106,746.58
Street Cleaning	\$8,764,678.18
Pro Rata Charges	\$1,771,305.00
Debt Principal	\$9,566,500.00
Other Expenditures	\$19,932.60
Capital Outlay	\$29,191.30
Interest on Debt	\$4,148,163.67
Total Costs:	\$37,006,751.92

SECTION 5 – SUMMARY OF ENFORCEMENT, INSPECTIONS, PUBLIC EDUCATION, AND EMPLOYEE TRAINING

In addition to many other requests for service, SRMS and SMOC personnel made 135 investigations of reported or suspected illicit discharges and spills to the MS4 during the January 1, 2015 to December 31, 2015 reporting period. There were eleven cases where the City notified the Ohio EPA of an active illicit discharge to Waters of the State. No discharge or pollution problems were found during 36³⁴ of the investigations for suspected spills or illegal dumping. The appropriate Health Department (City or County) was notified in eight cases involving discharges from a home sewage disposal system. There were seven cases where the City notified the City of Columbus Division of Water about active water leaks discharging to Waters of the State. There were four investigations that were forwarded to the Franklin County Environmental Sheriff's Office for criminal prosecution. SRMS also conducted a total of 3,364 construction site inspections, 349 industrial inspections, and 137 site inspections for post-construction BMP maintenance during the January 1, 2015 to December 31, 2015 reporting period.

5.1 Summary of Enforcement Actions

Enforcement action was taken by the City if a violation is observed and a responsible party is identified. Typically the responsible party is notified, the violation is stated and request made that immediate steps be taken to cease, prevent, control, and clean up pollutant sources that are, or may, be discharged into stormwater runoff. The SRMS issued 40 Notices of Violation (NOV) during the last reporting period. When a Notice of Violation is sent to the responsible party, an explanation of discharge and a Remedial Action Plan to prevent future occurrences is required. Requests for Voluntary Compliance are issued either verbally or written when the discharge or potential discharge is considered minor in nature and is immediately ceased.

5.1.1 Notices of Violation, Illicit Discharge

Summaries of the City's 32 Notices of Violation for illicit discharges during the January 1, 2015 to December 31, 2015 reporting period are provided below. Discharges from industrial facilities subject to 40 CFR 122.26(b)(14) are noted.

- 3/13/15 Notice of Violation issued to Columbus Auto Shredding at 2181 Alum Creek Drive for allowing lime from a detention basin to enter into the City's MS4. This location is an industrial facility subject to 40 CFR 122.26(b)(14).
- 3/18/15 Notice of Violation and Administrative Fine (\$1,000) issued to Vander Autos for discharging wastewater from washing vehicles into the City's MS4.
- 4/14/15 Notice of Violation issued to Ohio Mulch for discharging mulch into the City's MS4. This location is an industrial facility subject to 40 CFR 122.26(b)(14).
- 4/22/15 Notice of Violation issued and Administrative Fine (\$1,000) to GFS Chemical for allowing material from the Gamma Picoline System to enter into the City's MS4. This location is an industrial facility subject to 40 CFR 122.26(b)(14) and a

³⁴ The 2014 Annual Report incorrectly reported that no discharge or pollution problems were found at 13 of the investigations for suspected spills or illegal dumping. In 2014 the actual number of investigations in which no discharge or pollution problems were found was 36.

an additional Notice of Violation and Administrative Fine (\$2,000) was issued as a result of the discharge for failure to immediately notify Director of spill as required by Columbus City Code Chapter 1145.32.

- 4/24/15 Notice of Violation issued to Flowline LLC for jetting a storm line without Best Management Practices in place into the City's MS4.
- 4/24/15 Notice of Violation issued to Ohio Auto Imports at 867 East Hudson Avenue for washing vehicles without inlet protection and allowing wash water to enter the City's MS4.
- 4/30/15 Notice of Violation issued to D&J Master Clean for allowing wastewater from outdoor power washing activities to enter into the City's MS4.
- 5/8/15 Notice of Violation issued to The Robert Weiler Company for allowing grease from the dumpster into the storm sewer.
- 5/20/15 Notice of Violation issued to Americlean for discharging wastewater from power washing activities into the storm sewer.
- 6/4/15 Notice of Violation issued to Decker Construction for performing saw cutting activities without inlet protection and allowing wastewater to enter the City's MS4.
- 6/4/15 Notice of Violation issued to Ernst Concrete for washing vehicles without inlet protection and allowing wash water to enter the City's MS4. This location is an industrial facility subject to 40 CFR 122.26(b)(14).
- 6/8/15 Notice of Violation issued to Select Management Resources for dumping paint into the City's MS4.
- 6/11/15 Notice of Violation issued and Administrative Fine (\$1,000) to Make It Shine Auto Detailing at 689 North James Road for washing vehicles without inlet protection and allowing wash water to enter the City's MS4.
- 6/22/15 Notice of Violation issued and Administrative Fine (\$1,000) to Shepherd Excavating for pumping sediment-laden water into the City's MS4.
- 7/17/15 Notice of Violation issued to Able Roof for allowing wastewater from concrete tool washing activities to enter into the City's MS4.
- 7/22/15 Notice of Violation issued and Administrative Fine (\$1,000) to Ocedon Restaurant Group for allowing grease from the dumpster to enter the storm sewer.
- 7/22/15 Notice of Violation issued to Burton Extreme Powerwash for discharging wastewater from power washing activities into the storm sewer.

- 7/28/15 Notice of Violation issued to Mya's Fried Chicken/Dock 580 for dumping grease into the City's MS4.
- 8/5/15 Notice of Violation issued to Raising Cain's Restaurant at 3820 South Hamilton Road for discharging wastewater from power washing activities into the storm sewer.
- 8/20/15 Notice of Violation issued to Detailed Solutions at 5666 Westbourne Avenue for washing vehicles without inlet protection and allowing wash water to enter the City's MS4.
- 8/20/15 Notice of Violation issued to Affordable Granite for performing saw cutting activities and allowing wastewater to enter the storm sewer. This location is an industrial facility subject to 40 CFR 122.26(b)(14).
- 8/24/15 Notice of Violation issued and Administrative Fine (\$1,000) to Lifestyle Communities for pumping sediment-laden water from a basin into the City's MS4.
- 8/26/15 Notice of Violation issued and Administrative Fine (\$1,000) to Shelly and Sands for pumping sediment-laden water from a basin into the City's MS4.
- 8/27/15 Notice of Violation issued to Countertop Sales at 5767 Westbourne Avenue for discharging wastewater from washing activities into the storm sewer. This location is an industrial facility subject to 40 CFR 122.26(b)(14).
- 9/1/15 Notice of Violation issued to Ohio Heating for allowing wastewater from the boiler system to enter into the storm sewer.
- 9/13/15 Notice of Violation issued to Richard Baker for allowing wastewater from a washing machine to discharge into the City's MS4.
- 9/28/15 Notice of Violation issued to Barr Engineering for washing vehicles without inlet protection and allowing wash water to enter the storm sewer.
- 9/30/15 Notice of Violation issued and Administrative Fine (\$500.00) to Amer Al Ahmad for having a waste discharge hose from an RV camper discharging to the storm sewer.
- 10/6/15 Notice of Violation issued and Administrative Fine (\$1,000) to Birchwood Foods for allowing grease to enter into the City's MS4. This location is an industrial facility subject to 40 CFR 122.26(b)(14) and an additional Notice of Violation and Administrative Fine (\$250) was issued as a result of the discharge for failure to prevent the accidental discharge of pollutants and failure to maintain the

pretreatment system as required by Columbus City Code Chapter 1145.26 and 1145.30.

- 11/23/15 Notice of Violation issued to Thayer Power and Communications for allowing muddy water from boring operations to enter into the storm sewer.
- 11/24/15 Notice of Violation issued to Taqueria El Buen Sazon at 5615 Cleveland Avenue for dumping grease into the storm sewer.
- 12/1/15 Notice of Violation issued to Alum Creek and 104 Topsoil for allowing mud from vehicle tracking to enter into the City's MS4.

5.1.2 Notices of Violation, Erosion and Sediment Pollution Control

Six Notices of Violation were issued to property owners and/or contractors for non-compliance with the City of Columbus construction site pollution prevention requirements during the January 1, 2015 to December 31, 2015 reporting period. Summaries of these Notices of Violation are provided below:

- Feb. 09, 2015 NOV to City of Columbus, Division of Water, for failure to ensure a subcontractor's responsibility to provide adequate SWP3 control that resulted in a direct discharge during pumping at the Kelton and Cole Street (RP-776) water line repair (non-emergency). The site is tributary to Alum Creek.
- Feb. 10, 2015 NOV and Administrative Fine (\$1000.00) to Darby Creek Excavating for the direct discharge of muddy water into the City of Columbus MS-4 at Kelton and Cole Street. The site is tributary to Alum Creek.
- Feb. 23, 2015 NOV and Administrative Fine (\$1000.00) to Gudenkauf Corporation for the direct discharge of turbid water into the City of Columbus MS-4 at Hard Road and Stoneford Drive. The site is tributary to the Scioto River.
- April 1, 2015 NOV to Columbus City Schools for failure to oversee proper SWP3 site controls at the Africentric Early College site (CC-16622). The school site is a direct tributary of Alum Creek.
- April 2, 2015 NOV and Administrative Fine (\$1,000.00) to Smoot Elford for direct discharge (pumping) of muddy water into the City's MS4 at the Africentric Early College site (CC-16622). The site is tributary to the Alum Creek.
- Dec. 3, 2015 NOV and Administrative Fine (\$1,000.00) to the Ohio Presbyterian Retirement for illicit pumping activity at the Goodale Landing construction site (CC-16457). The direct discharge of muddy water entered the City's MS4 and the site is a direct tributary of the Scioto River.

5.1.3 Notices of Violation, Post-Construction BMP Maintenance

No Notices of Violation were issued to property owners for non-compliance with the post construction BMP maintenance requirements during the January 1, 2015 to December 31, 2015 reporting period.

5.2 Summary of Public Education and Employee Training Programs

The City of Columbus recognizes that public education and participation and employee education programs that provide information, resources and engagement opportunities to residents, business owners, and city employees can result in improved water quality. The following summarizes stormwater public and employee education opportunities that were provided in 2015.

5.2.1 Public Education and Outreach Summary

The City's stormwater public education and outreach programs are focused on the following topics:

1. Residential: pet waste; yard maintenance; and methods of keeping stormwater onsite.
2. Industrial/commercial: water quality impacts associated with land development; the importance of good housekeeping; and fats, oil, and grease.

In 2015, PUP was again the focus of the residential education program, emphasizing proper disposal of pet waste. The field team had the boldly colored PUP wagon at dog parks, festivals and other locations that dog owners visit beginning in April and continuing through September. Pet waste bags were given to those who pledged to pick up after their dog. PUP outreach included a two-week radio promotion, the department's website and Facebook page, the GreenSpot Facebook page, and the Utility Update bill insert. Signage was designed and PUP waste stations were delivered for installation in early 2016 at 86 City parks and in the park land around our three reservoirs.

The PUP campaign is serving as a template for building future campaigns that target the audiences identified under the Public Education and Outreach program. Development of the yard maintenance program began in 2015. A partnership that includes Franklin Soil and Water, The Ohio State University Extension Services, lawn care companies, residents and other experts was formed to develop messaging that meets residents where they are and encourages them to take the next step in managing lawns in a way that will protect water quality.

Stormwater investigators created messaging they can use to talk to residents they meet while in the field. Their messaging, KNOW (Keeping Near Our Waters) was developed into a colorful card that directs residents to call 614-645-STREAM to report water pollution and a door hanger that informs residents of any pollutant found in the storm sewer in their area.

Information on proper outdoor cleaning techniques for residents and commercial businesses was introduced into the 2015 stormwater edition of the Utility Update bill insert.

The City conducted three Greenspot presentations on Fats, Oils, and Greases; Spill Prevention Control, and Countermeasure; and Stormwater Pollution Prevention Plans that reached 46 members of the public. The City also performed two stormwater education sessions, one to the Short North Alliance and the other to the Clintonville Area Chamber of Commerce. Lastly, the

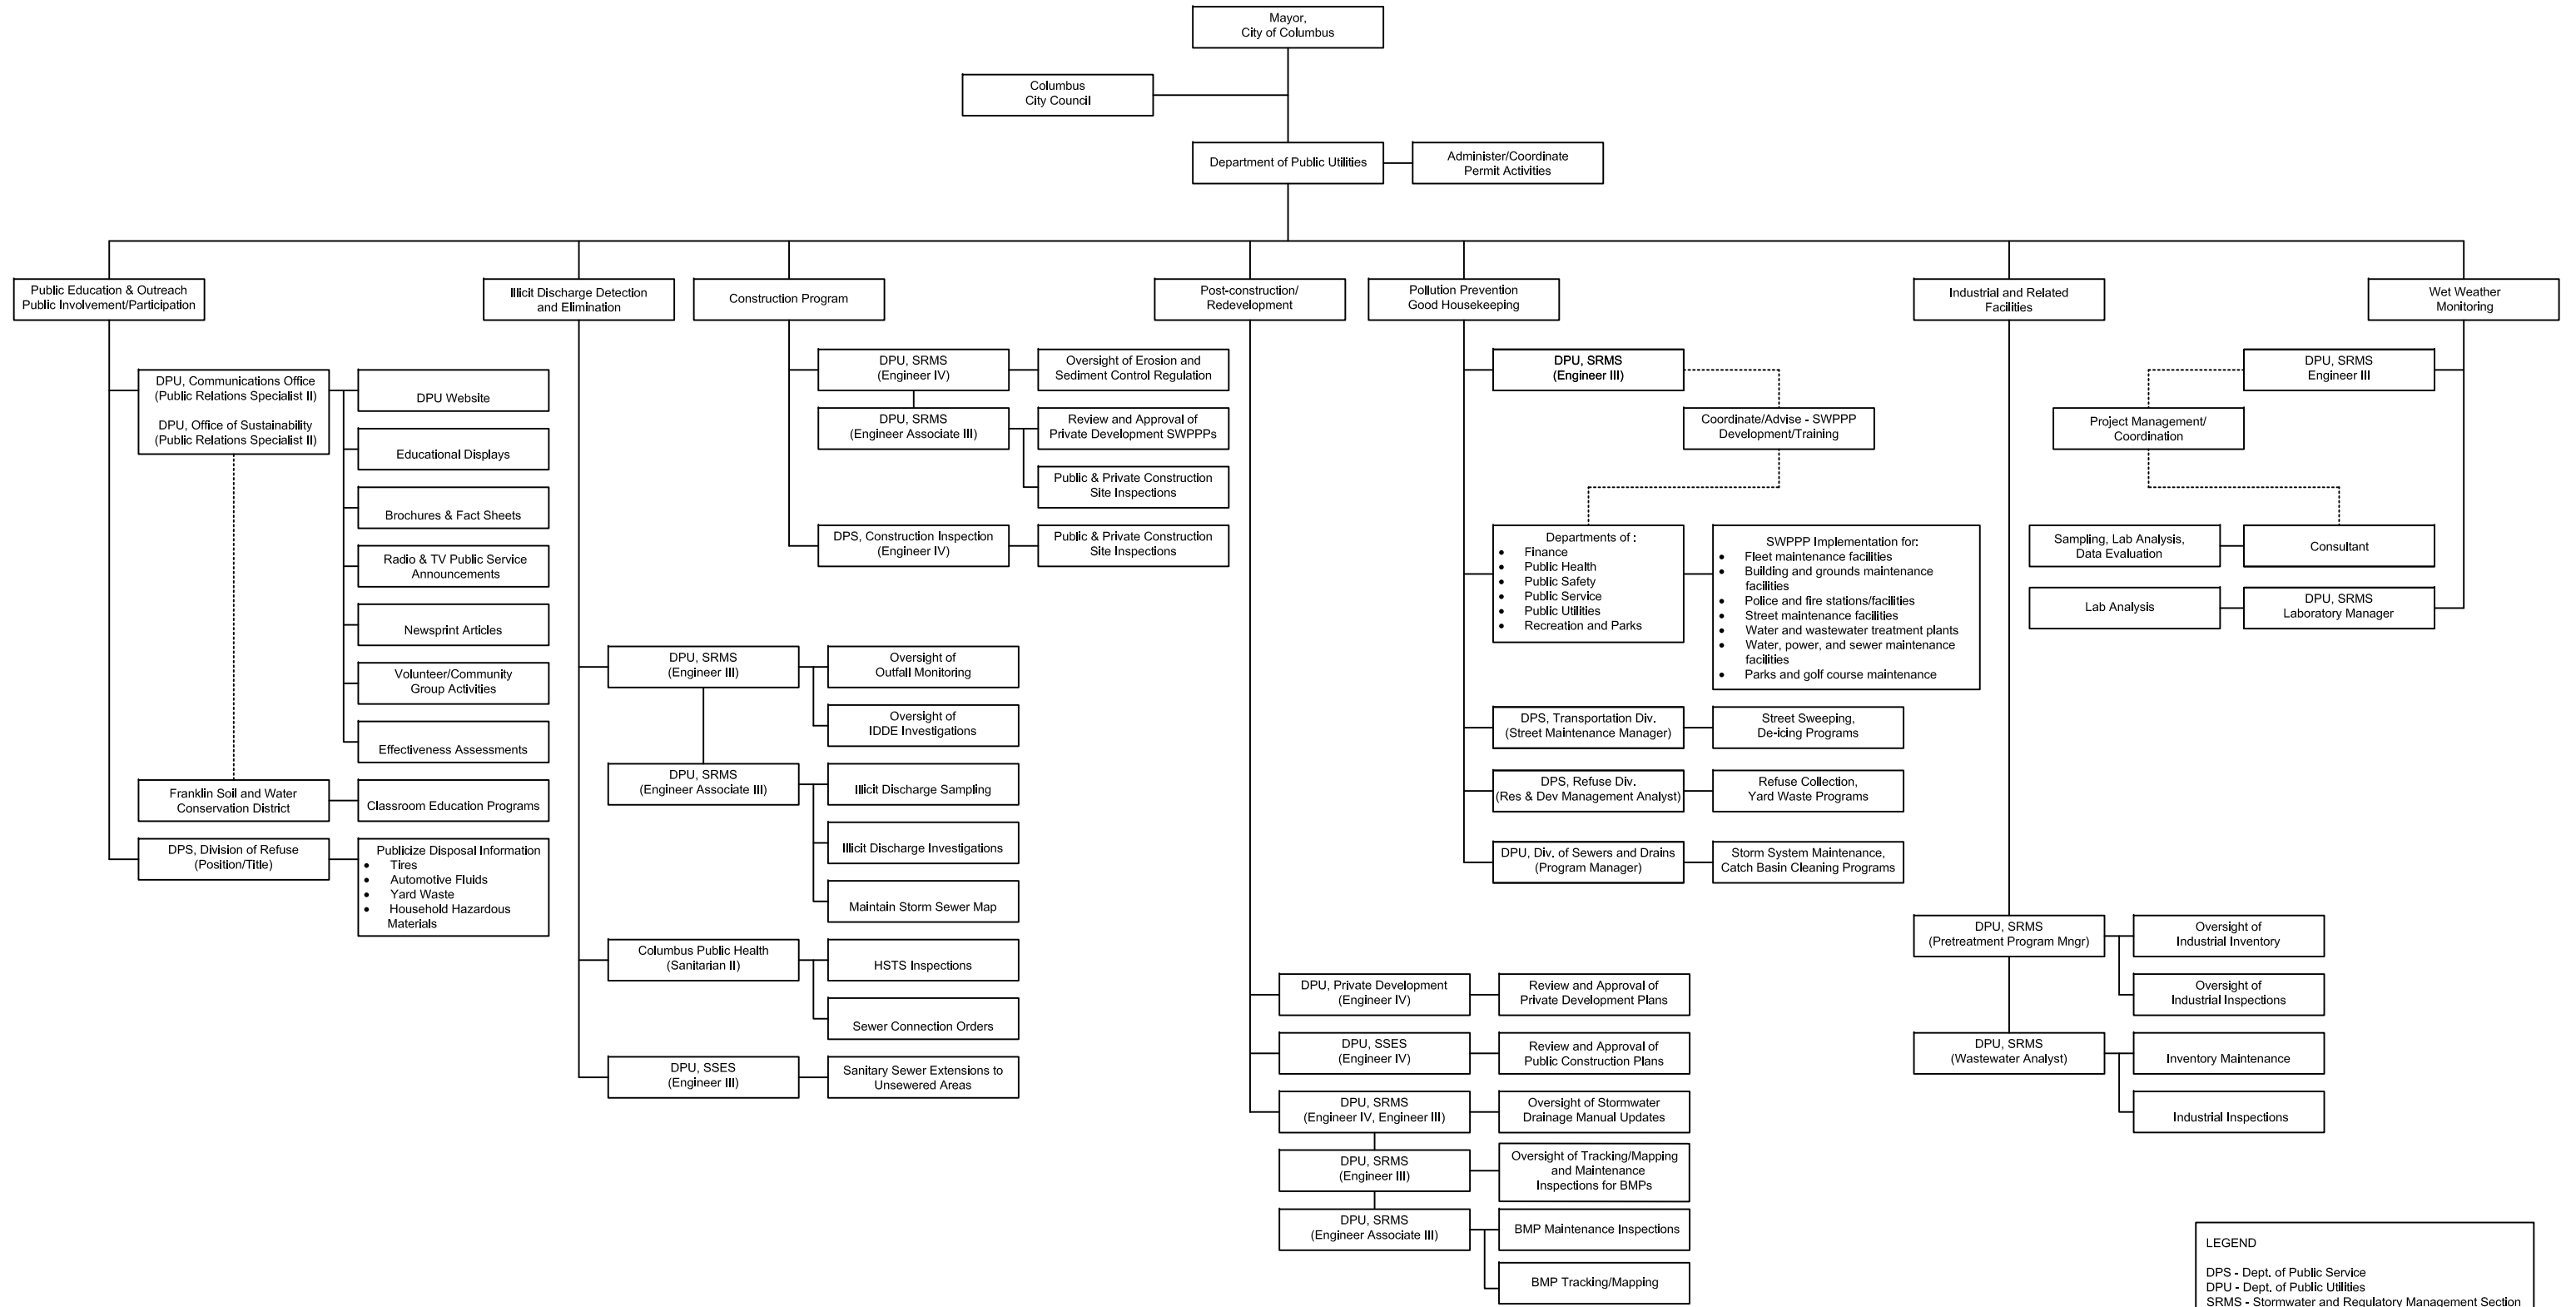

City conducted an outreach event at COSI on stormwater pollutants associated with street snow that included interactive elements (“dirty” snow) and posters.

5.2.2 Employee Education Summary

The City continues to increase stormwater pollution awareness amongst its employees by providing information on stormwater pollution prevention at new employee orientations and during training conducted to familiarize staff with Stormwater Pollution Prevention Plan contents. Under its EMS, the Department of Public Utilities (DPU) has developed on-line training modules that cover BMPs for various DPU activities such as vehicle washing. The City conducted or participated in numerous training opportunities during the 2015 reporting period. The City will continue to provide training on stormwater pollution practices to personnel that work at operations and maintenance facilities. See Appendix G for a summary of employee training activities.

River Pride 2015 events, schedule announced

The Columbus Department of Public Utilities and partners will kick off the 15th annual Central Ohio River Pride on Monday, June 1. This month-long event is designed to promote awareness and appreciation of our natural waterways through environmental stewardship and recreation. Activities include stream-bank litter cleanups, invasive plant removal, rain garden workshops and other opportunities as listed below. Volunteers and participants are invited to the following events:

Date/Time	Location	Contact/Sponsoring Organization
Saturday, June 13 9:00 a.m. - noon	Griggs Reservoir litter cleanup	Columbus Department of Public Utilities/ Scioto Boat Club, 645-1748
Saturday, June 13 9:00 – 11:00 a.m.	Adena Brook litter cleanup and invasive plant removal	Adena Brook Community judyrob59@gmail.com, 447-8043

Other Ways to Get Involved:

Contact any of the listed organizations to participate in additional opportunities throughout the year. For a complete list, visit www.columbus.gov/volunteer.

Plan your own neighborhood or waterway cleanup. For assistance, contact Keep Columbus Beautiful by calling 645-2421 or visit www.columbus.gov/PublicService/kcb/. If you live outside Columbus please contact your local municipality.

Organize a storm drain marking community service project in your Columbus neighborhood to get involved on an individual or group level. This is an ongoing project limited to dry weather conditions.

These organizations plan periodic events and/or are excellent sources of stewardship information (all phone area codes 614):

Friends of Alum Creek and Tributaries (FACT) is seeking volunteers for cleanup service projects along the Alum Creek corridor; email info@friendsofalumcreek.org or call 569-8544.

Friends of the Scioto River promotes the protection and enjoyment of the Scioto River valley and organizes several cleanups each year; email info@sciotoriverfriends.org

Friends of the Lower Olentangy Watershed (FLOW) organizes free educational events and service activities including cleanup and removal of invasive plants at several locations along the river; 267-3386 or email info@olentangywatershed.org.

Franklin Soil and Water Conservation District encourages conservation through a variety of activities, services and educational materials; visit www.franklinswcd.org

Riverfest On Tour!, a service of the Mid-Ohio Regional Planning Commission, continues this spring and summer with canoe rides along several local waterways through July; for a complete schedule, please visit www.morpc.org/riverfest.

News Release

News Date: July 06, 2015

STATE BUDGET REMOVES DRINKING WATER PROTECTIONS AROUND CITY RESERVOIRS

Columbus Department of Public Utilities Reacts to State Budget Amendment that Removes City's Ability to Protect Drinking Water Supplies Around City Reservoirs

In response to an amendment to the state's two year state budget bill, Am. HB 64, Division of Water Administrator Rick Westerfield, P.E., PhD, issued the following statement:

"We are obviously disappointed, and view this amendment as trespassing. The city purchased property around the reservoirs many years ago as buffers to filter pollutants to protect the water quality for our 1.1 million drinking water customers," Westerfield said. "We already offer some limited access to adjacent property owners, including allowing invasive species removal and some view corridors. However, this is not their property, and the city has an obligation to manage this public property in the public's best interest."

The Department of Public Utilities has asked the City Attorney's Office to review all legal options against the amendment, which does not take effect for 90 days. A similar amendment appeared in the budget two years ago, but Governor Kasich vetoed that attempt. Since then, water quality challenges in the state of Ohio have increased, with Columbus recently having a two-week nitrate advisory, a taste and odor issue caused by an algal bloom in late 2013, and Toledo had to issue a do not consume advisory last summer due to toxic algae. Vegetated buffer strips are commonly used by water agencies as a best management practice to not only filter pollutants and excess nutrients carried in overland stormwater, but to also prevent land erosion through deep rooted trees and plants.

"Our concern is that there is nothing in this amendment to prohibit those who do not own these important riparian corridors from removing trees - purchased with public money - and otherwise clearing city-owned land for their own personal benefit," Westerfield added.

Other organizations in addition to Columbus Public Utilities that expressed concern about the amendment included the Ohio Sierra Club, Ohio Environmental Council, Friends of the Scioto River, and Friends of the Lower Olentangy Watershed.

Mayor Coleman, Councilmember Klein Celebrate Tunnel Project Milestone

Mayor Michael B. Coleman, City Councilmember Zachary M. Klein and Department of Public Utilities Director Greg Davies joined other community leaders in the Arena District, where tunneling for the largest capital project in Columbus history has concluded. The two-phase OSIS Augmentation Relief Sewer (OARS) project, totaling just under \$371 million, will dramatically reduce combined sewer overflows in downtown Columbus.

Excavating the 20-foot diameter tunnel began at the Jackson Pike Wastewater Treatment Plant in 2010 and extended north nearly 4.5 miles, going as deep as 190 feet. When functional by late summer 2017, the new sewer will eliminate more than one billion gallons of overflows annually from the existing Olentangy-Scioto Interceptor Sewer (OSIS) by storing and transporting that wastewater to treatment facilities, rather than having it overflow into the Scioto River during periods of heavy rain.

“When our sewers overflow, it’s bad for the river and bad for our city,” said Mayor Coleman. “This project will greatly reduce those overflows, making our river cleaner and improving the quality of life around it.”

Now that the tunneling work is complete, the next steps include removing the 95-ton cutterhead and the rest of the 540-foot long Tunnel Boring Machine; putting finishing touches on the OARS tunnel itself and connecting it to the existing OSIS trunk sewer; and constructing the pump station at Jackson Pike that will lift the flow of the new tunnel into the facility for treatment.

“We have done and will continue to do everything we can to keep the costs of this project as low as possible,” said Councilmember Klein, chair of the Public Utilities Committee. “This project also qualifies for low-interest loans through the Ohio Environmental Protection Agency that will, over the life of the loan, save our ratepayers millions of dollars as compared to financing through higher interest rate bonds.”

For more information on OARS, please visit: <http://columbus.gov/Templates/Detail.aspx?id=38013> (or www.utilities.columbus.gov and click on Projects.)

Blueprint Columbus Approved by Ohio Environmental Protection Agency

Will result in greater benefits at lower cost – and in less time – compared to original “gray” plan

Mayor Michael B. Coleman’s Blueprint Columbus proposal, submitted as an alternative to the city’s 2005 Wet Weather Management Plan to comply with its consent orders and greatly reduce sewer overflows, has been approved by the Ohio Environmental Protection Agency (OEPA) and will be implemented over the next 20 years by the Department of Public Utilities. The official approval letter was received December 1.

“Blueprint Columbus is a huge step forward not only for our city, but for other communities that are working to meet consent order requirements in reducing overflows,” said Mayor Coleman. **“This plan is truly cutting edge and will serve as an example as to how green infrastructure and other innovative ideas can work with traditional technologies to create more beneficial solutions.”**

The first 10 years of the 2005 wet weather plan saw the investment of over \$1 billion toward reducing combined sewer overflows from the city’s older areas, resulting in dramatic improvements. Much of the remaining work – to address sanitary sewer overflows – involved traditional “gray” infrastructure, including large, deep, and expensive tunnels that would only be used a few times each year. Mayor Coleman, Utilities Director Greg Davies, and engineers at the Department of Public Utilities wondered if perhaps there might be a better way, and OEPA granted the city three years to study the idea. The result – Blueprint Columbus – was submitted September 15, and addresses overflows through four pillars: lining residential sewer laterals, a voluntary sump pump program, redirecting roof water runoff away from foundation drains, and installing green infrastructure to treat runoff before it enters storm sewers.

“I commend the city of Columbus not only for its forward thinking in creating a plan that includes green infrastructure and innovative ideas, but also for including a fallback plan that demonstrates the city’s commitment to complying with our legal agreements to reduce sewer overflows,” said Ohio EPA Director Craig W. Butler. **“The ideas in Blueprint Columbus can serve as a model for other communities dealing with sewer overflows.”**

Support of the study process, including several pilot projects focused on gathering the data necessary to prove Blueprint would work, and eventual approval by Columbus City Council were critical to the development of the plan.

“The City of Columbus continues to be a partner with the State of Ohio to improve local waterways and protect the environment in central Ohio,” said Councilmember Zach Klein, chair of the Public Utilities Committee. **“Mayor Coleman and his team have done an outstanding job developing a creative plan that complies with the consent decree but better serves the community.”**

Benefits of Blueprint Columbus over the original WWMP include:

- It’s more affordable: not only is Blueprint considerably less expensive than the original “gray” proposal, it can be finished 10 years sooner with the same or even better results.
- It’s greener: while Blueprint and the original plan would both greatly reduce overflows, Blueprint will also provide initial stormwater filtering, resulting in better water quality.
- It’s better for our neighborhoods and economy: the new green infrastructure will create attractive neighborhood amenities as well as new jobs to help maintain those features.

“I appreciate the time invested by Director Butler and everyone at Ohio EPA who examined the Blueprint proposal, carefully weighed its effectiveness against traditional technologies, and asked excellent questions about the plan,” said Utilities Director Greg Davies. **“Blueprint Columbus is an excellent example of bringing new innovative thinking to age-old problems, resulting in a win-win-win for our utility, our ratepayers and our community.”**

Use these tips for easy clean up and keep yard waste out of the storm drains.

RECYCOLUMBUS
We were meant for each other.

Home Pick Up Makes Yard Waste Recycling Easy!
While you're gardening and landscaping, remember to keep it green and recycle your yard waste in paper biodegradable bags or hard-sided containers labeled "Yard Waste."

Prepping Yard Waste - 3 Easy Steps

1. Place yard waste in a biodegradable bag or hard-sided container. Do not use plastic bags.
2. Do not include any hazardous materials, such as paint cans, oil, antifreeze, or other liquids.
3. Break down any large branches into 3-foot sections.

What is NOT Yard Waste? Here's what does NOT go in yard waste bags or containers:

- No rocks
- No sod
- No plastic pots
- No concrete or gravel
- No dirt
- No plastic bags
- No food waste

What is Yard Waste?
Yard waste is organic waste generated during regular household gardening and landscaping, including:

- Grass clippings
- Leaves
- Twigs
- Branches
- Shrubbery

Columbus Department of Public Service
December 2, 2015

Yard Waste tip card (2-sided): Go to <http://www.columbus.gov/yardwaste/> then "Click here for quick information about yard waste."

The Columbus Dispatch had an incorrect article this morning that is being corrected. There is no toxic microcystin in the Dublin Road Water Plant drinking water. Some is being detected in the surface water (Scioto River) but finished drinking water is treated and still meets or exceeds state and federal standards. We use a multi-barrier water treatment process and are adding powdered activated carbon at both the Dublin Road and Hap Creman water plants to remove algal compounds. You can view statewide testing results on the Ohio EPA's web site at the below link, and for drinking water you will see that the finished water is at a non-detect level. (Please make sure you are viewing finished water results) For any questions, please call our lab 645-7691. http://wwwapp.epa.ohio.gov/dsw/hab/HAB_Sampling_Results.xlsx

An encouraging development in the fight against algae. Other sources of excess nutrients that run off into our drinking water supplies include lawn chemicals and failing septic tanks. We all play a role in protecting our water resources.

Testing farm soil can help in algae fight

Ohio's ongoing problems with toxic algae likely won't be solved anytime soon, scientists say. But some practices already in place could help slow the flow of fertilizer from farm fields to waterways that feeds the algae that plague Lake Erie...

Thank you to Dr. Long for this letter to the Dispatch.

Land buffers protect our waterways

Safe drinking water is something most of us take for granted. However, our area's recent nitrate advisory and algae blooms around Ohio highlight the negative health and economic impact that upstream agricultural and residential runoff has on the quality

Good article on keeping stormwater out of basements. In the case of sewer backups, Columbus residents can apply for the Project Dry Basement program to obtain a backflow prevention device. Report all sewer backups to 645-7102.

Experts offer solutions to help keep basements dry

After ridding their basements of water from this summer's endless rains, central Ohio homeowners are embarking on another task: keeping the water from coming back. The first steps to a dry basement, experts say, should be taken outside the...

We've had some calls this week about a difference in taste in the Hap Cremean Water Plant service area's finished water. It was due to an algal bloom in Hoover Reservoir, and treatment has been increased to remove the compounds that cause this. It is not toxic or harmful and is purely an aesthetic taste issue, which some notice while others do not. If you have any questions or concerns please call our Water Quality Assurance Lab at 645-7691.

The water nitrate advisory issued June 8th is cancelled. We are pleased to report that the results of the most recent water samples show nitrate levels well below (4.9 at the plant tap) the nitrate standard, or maximum contaminant level of 10 parts per million. It is no longer necessary for infants less than six months old and pregnant women to use bottled water. Thank you all for your patience.

This is not related to the public water supply. We maintain chlorine levels in the public water distribution system to keep this bacteria from growing to harmful levels. This is something that usually happens on private property typically with tower type building systems (office buildings, nursing homes etc.). For any questions on water quality in the public system, please call our Water Quality Assurance Lab at 645-7691.

Anne Coopey is there any idea of when this advisory may be lifted? Is the current and projected rainfall this week extending the issue?

Like Reply June 15, 2015 at 6:31pm

Columbus Public Utilities it will take some time to see the full effects of the rain, which could either help dilute or bring additional nitrate into the equation. After the last heavy rain in the northern part of the watershed it took a week for that nitrate to reach the Dublin Road plant. There is no way to predict how long the advisory will last but we expect it will continue at least through this week.

Ever wonder who Columbus' top industrial water user is? Here is a hint.

A look inside the Budweiser plant

With summer on the way workers at the Budweiser plant have increased production to meet the seasonal demand. The bulk of the production is Budweiser and Bud Light, but the brewery produces 20 different Anheuser-Busch brands.

May 11-15 is Infrastructure Week (<http://infrastructureweek.org/>), and a good time to update the city's largest ever capital improvements project: the OARS Deep Sewer Tunnel (<http://columbus.gov/Templates/Detail.aspx?id=38013>). Crews have mined almost four miles, with about 3,000 feet to go ahead of an anticipated late summer breakthrough north of the Arena District.

As temps warm, it is common to see water hauling trucks filling up from a city hydrant to fill customer pools. Rest assured they must have a permit which requires a fee so they pay for the water. If you see anything suspicious (like an unidentified vehicle coming back repeatedly), call our permit office at 645-7490.

This NBC story features a topic that has been a problem at city reservoirs:

dangerous cliff diving. When we get into hot weather please talk to your kids about the dangers of this activity, which is also illegal in our area. Cooling off at a local pool is much safer. If you see anyone cliff diving please notify local law enforcement.

Cliff divers risk injury, death to seek thrills on vacation

Thrill-seekers making daring leaps from cliffs and high bridges make for dramatic video on YouTube, but the consequences can be serious – and even deadly. TODAY national investigative correspondent Jeff Rossen reports.

Division of Power crews have been restoring electricity knocked out to 800+ customers due to today's storms. To report a city power outage, call 645-7627, a 24/7 #. AEP customers should call AEP. City utility 24/7 lines are posted here, and are also accessible through 311 by following the prompts. Never touch a downed power line; stay away and phone it in ASAP.

Columbus Public Utilities shared Ohio Utilities Protection Service's photo.

Published by George J. Zonders [?] April 3, 2015

A friendly reminder from the folks at the Ohio Utilities Protection Service: April is National Safe Digging Month, and dialing 811 isn't just important for large projects - locating underground utility lines is crucial any time you dig in your own yard, for anything from placing deck supports to planting flowers. Call before your dig!

Ohio Utilities Protection Service

April 3, 2015

Always call O.U.P.S. and facility owners if you make contact with an underground utility. The tiniest nick, dent or scrape, which may look like nothing now—if left unreported and unrepaired—can erode to become a safety and efficiency threat that could have been avoided. #Call811

While the 20' to 30' spray of water made for some great video, it turned out to be a minor repair on this 1976 16" far east side waterline, which is pretty young by infrastructure standards. It was fixed with a clamp and water was restored before noon. Please report all waterline breaks to 645-7788 24/7 so a crew can be dispatched as soon as possible to prioritize it. This one was fixed quickly because it was reported to us overnight. Thank you, Water Warriors!

Water Gushes from East Columbus Main Break

Public utility crews on the far east side of Columbus are working to stop a water main break that is shooting water more than 20 feet in the air.

areas are usually owned by that municipality, but Columbus is under contract to repair many (but not all) of them. This basically means Columbus may repair breaks in the suburbs; however, capital improvement replacement for infrastructure owned by a suburban entity falls on that jurisdiction. The agreements vary for our 20+ contracting communities and since it's impossible for residents to know, please continue to report water breaks in the area to 311 or 645-8276 and we'll check it out.

The City of Upper Arlington

January 16, 2015

There is currently a water main break affecting residents on Woodbridge and Nayland Roads. Disruption to service as well as foggy water is possible. City of Columbus Public Utilities is expecting the break to be repaired today:

Do you know where the main water valve in your home is? It is probably in your basement on an outside wall and may look like this. Knowing where it is located in advance of an emergency like a home plumbing leak is wise so you can turn the water off quickly.

To prevent home water pipes from freezing, open cupboard doors on outside walls to allow heat to reach them. If you've had past issues, you may want to leave a trickle of water running. If traveling, turn the water off at the inside valve. City water mains are larger, below the freeze line, and do not freeze. They sometimes break in cold weather from the ground freezing solid above them, adding stress, but can break year round. To report a suspected water break, call 645-7788. Most city breaks are repaired within 2 weeks or sooner and are prioritized on severity and types of customers served, with medical and schools being examples of higher priority.

City of Columbus 2015 Employee Training Summary

Date(s)	Sponsor	Name of Class / Description	No. of City Attendees	Relevant Program Element
1/6/2015	Stormwater One	Low Impact Development and Bioretention	1	PD, PC, IDDE
1/13/2015	Stormwater One	Collective Stormwater Management Solutions	1	PD, PC, IDDE
1/13/2015	Stormwater One	Intro to the NPDES Permit Program	1	PD, PC, IDDE
1/14/2015	Stormwater One	Understanding EPA's NPDES MS4 Permit Program	1	PD, PC, IDDE
1/15/2015	Stormwater One	Green Infrastructure Solutions for Wet Weather	1	PD, PC, IDDE
1/22/2015	SRMS	Dryweather Sampling & Inspection Overview	4	IDDE
2/5/2015	Practicing Institute of Engineering	Compost Based BMP's, LID Methods, TMDL	7	CP, IF
2/5/2015	Filtrexx Pollution Control/Siltsoxx	Filtrexx Products for Hydrocarbon, Bacteria, Heavy Metals and Nutrient Removal	4	CP
2/5/2015	The Practicing Institute of Engineering	Compost Based BMP's, LID Methods and TMDL Solutions	5	IDDE
2/18/2015	Center For Watershed Protection	Using Illicit Discharge Programs to Monitor Bacteria	2	IDDE
2/18/2015	OTCO	Wastewater Collections Systems	3	IDDE
2/20/2015	Franklin Soil and Water Conservation District	Central Ohio Erosion Control Expo	14	PD, PC, CP, IF
3/2/2015	Hazen & Sawyer	Urban Green Infrastructure Retrofits and Monitoring-MW030215	1	PC

PD - Program Development
PE - Public Education and Outreach
GH - Good Housekeeping

PI - Public Involvement
CP - Construction Program
IF - Industrial Facilities

IDDE - Illicit Discharge Detection/Elimination
PC - Post Construction
WWM - Wet Weather Monitoring

City of Columbus 2015 Employee Training Summary

Date(s)	Sponsor	Name of Class / Description	No. of City Attendees	Relevant Program Element
5/6/2015	Ohio Stormwater Association, Tinkers Creek Watershed Partners	8th Annual Ohio Stormwater Conference	2	PD, PC
5/14/2015	The Ohio Water Environment Association	2015 Collection Systems Workshop	2	IF
6/9/2015	SRMS	Review of Dryweather Sampling Procedures	5	IDDE
6/10/2015	Franklin Soil and Water Conservation District	Multi-Sector & Industrial Stormwater Permits	3	IF
8/5/2015	Five Cities Conference	2015 Five Cities Plus Conference	2	IDDE
8/26/2015	Mapistry	Understanding the EPA's New Multi-Sector General Permit	5	IF
9/1/2015	Contech Engineered Solutions	UrbanGreen Stormwater Solutions Overview	4	PC
9/3/2015	Franklin Soil and Water Conservation District & Ohio Stormwater Association	OSA - Updating Your MS4's Storm Water Management Programs (SWMP)	2	PD
9/17/2015	Urban Sustainabilities Network	2015 Green Cities, Clean Water	1	PC
10/20/2015	Storm Water Simplified	SWPPPTrack Software Demo	7	PD, CP, IF, IDDE
11/3/2015	NETI Webinars	Winter O&M for Green Infrastructure	2	PC
11/12/2015	The Ohio Water Environment Association	2015 Watershed Workshop	3	PD, PC
11/17/2015	Water Management Association of Ohio	44th Annual WMAO Conference	1	PD, PE, CP, PC, GH, IF, WWM
11/18/2015	Center for Watershed Protection	Checking in on Post-Construction Stormwater Management	2	PC
12/1/2015	SRMS	Sampling Procedures	1	IDDE

PD - Program Development
PE - Public Education and Outreach
GH - Good Housekeeping

PI - Public Involvement
CP - Construction Program
IF - Industrial Facilities

IDDE - Illicit Discharge Detection/Elimination
PC - Post Construction
WWM - Wet Weather Monitoring

City of Columbus 2015 Employee Training Summary

Date(s)	Sponsor	Name of Class / Description	No. of City Attendees	Relevant Program Element
12/7/2015	ms consultants, inc	Green Infrastructure Operation and Maintenance Successes and Experiences	3	PC
12/9/2015	Arcadis	Inspections and Maintenance of Stormwater BMPs	3	PC, GH
various	Citywide Training & Development / Division of Sewerage and Drainage	Stormwater Awareness for New Employees	407	GH
various	Department of Public Utilities, Divisions of Water and Power	SWPPP training at 3 water treatment plants, 910 Dublin Road facility, 3 watershed management facilities, and 3500/3568 Indianola Avenue facility.	226	GH
various	Department of Public Utilities, Division of Sewerage and Drainage	SWPPP training at 2 wastewater treatment plants, the Compost facility, Sewer Maintenance Operations Center, and the Grit Pad facility.	265	GH
various	Department of Public Service, Division of Refuse	SWPPP training at 3 city-operated refuse collection facilities.	129	GH
various	Department of Public Service, Transportation Division	SWPPP and snow removal training for 6 transportation maintenance facilities.	72	GH
various	Columbus Public Health	SWPPP training for employees.	14	GH
various	Department of Recreation & Parks	SWPPP training for 14 maintenance facilities and 5 city-owned golf courses.	99	GH
various	Department of Finance & Management	SWPPP training for fleet and facilities management.	81	GH
various	Department of Public Safety, Division of Fire	SWPPP training at 33 fire stations.	1170	GH

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
1/2/2015	Mr. Khai Diep 1371 Chenille Way Galloway, OH 43119	Dumping of paint into storm sewer and onto the curb and inlet grate. Drip evidence and painting supplies outside pointed to a job inside the nearest house.	EEI performed cleanup. Cleanup completed. Franklin County Environmental Sherriff Coyne met with Mr. Diep and he paid for the cleanup.
1/22/2015	Gilbert Group 203 East Broad Street Columbus, OH 43215	Grease was traced to a catch basin behind the plaza at 3242 Cleveland Avenue. Outside grease container was overflowing.	Cleaned up and boomed the outfall. The source is not within Columbus jurisdiction. Information turned over to Franklin County Public Health and Environmental Crimes Task Force.
1/27/2015	Unknown 2530 Stonington Avenue, Columbus, OH 43213	Complaint of resident throwing dog feces into curb inlets in front of house.	Inspected inlets around area and found no feces. Passed out Do You Know Where Your Storm Sewers Go to the homes in the neighborhood.
2/4/2015	Ruscilli Construction 2041 Arlingate Lane, Columbus, OH 43228	Construction site at State Fairgrounds without proper BMP's in place caused tracking onto the street and freeway.	Sent the findings to Erosion and Sediment, City of Columbus, to have them inspect the site.
2/11/2015	Joyce Sauls 1576 Brentnell Avenue, Columbus, OH 43219	Laundry machine discharging to sump pump.	Distributed City Code 1145.86 and requested voluntary compliance. Follow-up on 02/23, issue resolved.
2/12/2015	Unknown 2077 Parkwood Avenue, Columbus, OH 43219	Report of sewage in the channel at the corner of 2077 Parkwood Avenue.	Took a grab sample and ran a field test. All testing was within limits. No illicit discharge.
2/13/2015	Unknown 8385 Eldorado Drive Powell, OH 43065	A fuel leak at one time had occurred and stained the asphalt and curb line.	No fuel laying in the curb or inlet.
2/23/2015	Unknown	Vehicle accident involving a tanker truck caused a fuel spill near 3119 Sullivant Avenue.	No entry into the storm sewer system.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
3/3/2015	Black Strap Inc. P.O Box 258, Neligh, NB 68756	Faulty valve on bottom of semi-trailer opened, spilling fertilizer on 70 west bound near Miller Avenue.	No material reached the storm sewer system.
3/5/2015	Unknown 4700 Stiles Avenue Columbus, OH 43228	Sediment laden water was noticed in Big Run near the Jackson Pike bridge. The discharge was traced up the creek to a small tributary, and then traced to a large construction project at Stiles Elementary School.	Project was within Prairie Township. Took photos as evidence and notified OEPA and Franklin County of the discharge. Franklin County assumed responsibility.
3/10/2015	Unknown 1686 Laredo Court Columbus, OH 43065	Vehicle maintenance was being performed in the street.	Police Impound removed vehicle on 3/18/15. No fluids entered the storm sewer.
3/11/2015	Unknown 300 West Broad Street Columbus, OH 43215	Illegal scrappers broke into the secured site and tampered with the transformers, causing the PCB oil to enter the storm line and go to the river.	Ohio Environmental Protection Agency handled clean-up and enforcement.
3/13/2015	Columbus Auto Shredding 2181 Alum Creek Drive Columbus, OH 43207	Contractor dumped lime into a stormwater detention basin instead of a process water pond. Released black stagnant water and the lime into the storm sewer.	Notified O.E.P.A. and Columbus Auto Shredding about the event. NOV-RAP 4/20/2015.
3/18/2015	Vander Autos 681 North James Road Columbus, OH 43219	Washing vehicles outside. No inlet protection was being used.	Explained violation and distributed City Code 1145.86 and educational material. The employee stopped washing outside. NOV-RAP 6/19/2015.
3/23/2015	Columbus Fire Station #8 1240 East Long Street Columbus, OH 43203	Fire engine training near a demolition site resulted in muddy water leaving the site. Water ponded in the street and entered uncovered storm drains.	Spoke with the engine crew and Lieutenant about the discharge. Requested that they find another site for training. Reinstalled sediment controls at the edge of the demolition site.
3/26/2015	CBRE Technical Services 77 South High Street, Columbus, OH 43215	City had a callout that sump was pumping all the time. We were called to test discharge	Field test on water passed.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
4/3/2015	Unknown	Residents claimed to have seen the residents of 2306 Atwood Terrace dumping grease into the catch basin.	Distributed educational materials in the neighborhood. City cleaned catch basin, line and manhole in the intersection.

4/30/2015	D & J Master Clean, Inc. 6185 Huntley Road Suite F Columbus, OH 43229	Power washing dumpster and outside parking area of restaurant, no containment.	We blocked inlet immediately and explained the violation to the employee. Explained the Outdoor Cleaning Memo. NOV-RAP 5/26/2015.
5/4/2015	Unknown	A member of the Home Owners Association at 2878 Pheasant Field called the City about dumping into a catch basin; nothing was found in the catch basin. The member of the association asked for literature for distribution at the neighborhood meetings.	Applied 12 curb markers in the area. Dropped off City Code 1145.86 and educational materials.
5/8/2015	The Robert Weiler Company 10 North High Street, Suite 401 Columbus, OH 43215	Property maintenance neglect has allowed grease and dumpster liquid from the businesses in the complex to enter a private storm sewer on the property.	Spoke with tenants and the Property Manager in the building and gave them educational materials. Contractor cleaned the catch basins and private sewer on 5/14/2015. NOV-RAP 6/5/2015.
5/13/2015	Unknown	Homeowner called in large soap discharge.	No discharge visible or evidence upstream. Checked with one service station that the homeowner suspected as a source; found no evidence there of a discharge.
5/18/2015	Unknown 602 Olde Irish Drive Columbus, OH 43119	A sump pump in a City water line vault was discharging onto the street and the water was standing in a low spot in the gutter.	Spoke with the resident at 602 Olde Irish Dr. and explained the situation. We called the City Street Department to sweep the street.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
5/18/2015	Unknown North Bank Park 311 West Long Street Columbus, OH 43215	Discharge of a white/brown, oily liquid found at the outfall pipe. The source of the discharge was later found to be oil that was infiltrating into an upstream manhole from the surrounding soil.	Set up containment. The City stopped the infiltration into the manhole.
5/19/2015	Unknown 66 Sunnyside Lane Columbus, OH 43214	Caller wanted bagged grass moved from the top of the catch basin, no clippings found in the sewer.	Nothing in sewer. Spoke with a few residents in the area and handed out educational materials.
5/20/2015	Americlean P.O. Box 1252 Fairborn, OH 45324	Cleaning of overhead ventilation system and grease hoods, no containment used. Discharge reached the private storm system.	Employees stopped work upon request. Began cleaning using vacuum and mops. Checked 05/21, area good. NOV-RAP 6/23/2015.
5/21/2015	Resident 87 North Yale Avenue Columbus, OH 43222	Anonymous report of washing machine discharging out the side of the house onto the ground.	We found that the report was true, but the discharge did not reach the curb line/storm sewer. Homeowner said he has a plumber hired to provide a sanitary connection for the washer.
5/29/2015	Alum Creek Topsoil 2600 Alum Creek Drive Columbus, OH 43207	A report of excessive tracking off site onto Alum Creek Drive.	Nothing found during the visit. Was told they sweep the road entrance.
5/29/2015	DSS Services 2390 Innis Road Columbus, OH 43224	Report of water in the street for dust suppression at demolition site.	No demolition dirt or debris in curb or inlet. On 05/29/2015, street was dry.
6/3/2015	Rumpkee 1191 Fields Avenue Columbus, OH 43201	Trash truck washing out on pad had a hydraulic line burst, leaking oil onto the pad.	Spoke with Facility Manager after investigating. Found no sign of oil in the storm or at outfall. Manager said oil dry was used to contain and clean up the spill.
6/4/2015	Decker Construction 3040 McKinley Avenue Columbus, OH 43204	Company did saw cutting and did not use inlet protection. Curb was full of dried slurry.	Follow up on 6/5/2015, inlet protection was in place and curb cleaned. Gave field foreman a copy of City Code 1145.86. NOV-RAP 7/8/2015.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
6/4/2015	Ernst Concrete 3361 Successful Way Dayton, OH 45414	Outdoor washing of trucks allowed wastewater to enter into uncovered catch basins.	Explained the violation and ordered cleanup of MS4. Ernst stopped all washing. Cleanup of ditch completed on 06/10/15. NOV-RAP 10/26/2015.
6/5/2015	Playa Larga Taco Truck Parking lot 552 Norton Road Columbus, OH 43213	A report of a food truck dumping grease in a catch basin.	Checked all catch basins and manholes in the area. No sign of anything being dumped. Provided food truck with City Code 1145.86.
6/5/2015	Unknown	Grass clippings are being dumped near the bank of the creek behind Creekside Drive between houses 1680-1714.	Nothing was found in storm sewer. One pile of grass was found in a yard about 30 to 50 ft. from the creek. Distributed City Code 1145.86.
6/8/2015	Select Management Resources 3440 Preston Ridge Road Suite 500 Alpharetta, GA 30005	City Fleet Management saw a contractor painting next door. He did a stormwater check the following day and noticed paint in the catch basin.	Select Management Resources agreed that the paint used on the project matched the paint in the catch basin. They cleaned the catch basin and storm lines. NOV-RAP 7/24/2015.
6/10/2015	Unknown 6458 Faircrest Road Columbus, OH 43229	311 reported to the Stormwater Section that the homeowner at 6458 Faircrest was dumping oil in a pit on their property.	No violation of City Code 1145.86 was found. Applied curb markers in the area and distributed educational materials to the surrounding area.
6/11/2015	Make It Shine Auto Detailing LLC 689 North James Road Columbus, OH 43219	Washing a vehicle outside of the garage bay, no containment on inlet allowed wash water to enter the storm sewer.	Distributed City Code 1145.86 and educational material. Mr. Davis said washing will all be done inside the building from now on. Notified O.E.P.A. of discharge to state waters. NOV-RAP 8/10/2015.
6/16/2015	Love'N Comfort Home Health Care LLC 6050 Cleveland Avenue Columbus, OH 43231	Citizen called to notify Stormwater that asphalt has been placed in the gutter for a drive apron.	Completed the investigation. No violation of City Code 1145.86.
6/19/2015	Extreme Detailing 5409 Redwood Drive, Columbus OH 43229	Reported washing of cars with discharge to a storm sewer inlet. Address is residential, but the resident is operating a business at this location.	No violation seen. Advised workers to avoid discharge and explained and distributed City Code 1145.86.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
6/22/2015	Unknown	Citizen reported that a neighbor is throwing fast food trash into curb inlets when they drive by. No trash was found in inlets around area.	We distributed educational materials in the area.
6/22/2015	Shepherd Excavating, Inc. 6295 Crosgray Road Dublin, OH 43016	Pump out of a house foundation excavation onto the street with no filter bag on the hose or inlet protection on the downstream storm sewer inlet.	Pumping was finished when City arrived. Explained the violation and ordered cleanup. Inlet was cleaned out on 06/23/2015. NOV-RAP 7/21/2015.
6/25/2015	Mann Transport Inc. 3400 Panama Lane, Suite 149 Bakersfield, CA 93313	Vehicle accident caused the loss of fuel from the saddle tanks of a tractor trailer. Fuel spilled onto the on-ramp, and some entered the catch basin and a nearby ditch line.	The fire department and a private cleanup company contained the spill and put absorbent down on the ramp. Did not reach the outfall.
6/25/2015	Unknown	Caller reported a soapy discharge in Adena Brook coming from the 21" line in the headwall.	No evidence of discharge at the time of the investigation.
6/30/2015	Columbus Division of Water 4250 Morse Road Columbus, OH 43230	Blockage or leak in the Hap Cremean Water Plant slurry line caused an overflow from an access manhole.	The discharge did not enter the storm sewer.
6/30/2015	Anchor Car Wash Systems 233 Dawson Avenue Columbus, OH 43209	No illicit discharge seen at this time. Solid waste from auto repair shops on east side of property.	Turned the findings over to Brian White, Solid Waste Inspector, City of Columbus.
7/1/2015	HOC Transport 1569 Industrial Parkway Akron, OH 44310	Truck lost control and crashed, catching truck and tanker on fire. Most of the ethanol burned off leaving minimal amount. Nothing was detectable downstream in City assets.	Ohio Department of Transportation directed cleanup.
7/6/2015	Larzell Hensley 2400 Spring Lake Drive Columbus, OH 43219	Drain for both laundry washing machine and basement sink was plumbed into the sump pump causing the discharge.	Mr. Hensley was told to correct the plumbing violations by connecting to the sanitary stack. He received educational material. Returned on 7/16/15, found issues were fixed.
7/6/2015	Rushman Automotive 6843 Schrock Hill Court Columbus, OH 43229	Anonymous call stating oil is being dumped into storm sewer from this business.	Found no evidence. Talked to the owner and gave him a copy of City Code 1145.86.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
7/15/2015	City of Columbus Parks and Recreation 1533 Alum Industrial Drive West Columbus, OH 43209	Large leak in fountain system infiltrating into storm and going into the Scioto. Dye test confirmed discharge. Narrowed leak to an area under small halo fountain.	Referred to City Project Dry Basement personnel to help pinpoint leaking area. Let them know that this is an illicit discharge.
7/16/2015	Wendy's Restaurant # 1448 2335 East Fifth Avenue Columbus, OH 43219	Oil being moved to collection tank caused a spill.	Chuck's Septic performed the site clean up. The spill was contained on site. No entry to storm sewer.
7/17/2015	Able Roof 4777 Westerville Road Columbus, OH 43231	Able Roof did a chimney repair at 602 Beechwold and a witness saw the employees near the catch basin with a bucket and cleaning equipment.	Upon investigation mortar was in and on the catch basin that would be consistent with a chimney repair. The heavy debris was cleaned from the catch basin. NOV-RAP 9/9/2015.
7/20/2015	MI New Hope Church of God 640 Demorest Road Columbus, OH 43204	Church appeared to be cleaning out grass and leaves that were in an old, in-ground pool. Material was dumped in back of property.	This is in Franklin County; gave the findings to Lela Anthony at Franklin County Health Department.
7/20/2015	City of Columbus/ Public Service/ Streets 50 West Gay Street Columbus, OH 43215	Street Investigators sprayed Iuka Park brick paved areas with a brine solution from curb to curb to control weed growth in the City street.	Advised the City Street Department to discontinue the practice until consultation with OEPA for development of BMP's.
7/21/2015	Vision Lounge 4212 Eastland Square Columbus OH 43232	Reported dumping of grease outside of lounge from a health inspector.	Searched the area and could find no evidence of outside dumping.
7/22/2015	Ocedon Restaurant Group, LLC 200 Hoff Road, Suite F Westerville, OH 43082	Grease and oils flowed into a private storm inlet which clogged up and caused ponding around storm drain.	We spoke to shift supervisor and informed her the storm line needed to be cleaned. On 7/24/15, Pro Flow cleaned the site and jetted the lines. NOV-RAP 10/27/2015.
7/22/2015	Burton Extreme Powerwash 1370 Brentnell Avenue Columbus, OH 43219	Washing the front of the building and the walkway without containment to keep wash water from entering the street.	Explained the violation and City Code 1145.86. Had company absorb wash water still in the curb with absorbent material. NOV-RAP 9/3/2015.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
7/24/2015	Safari Auto/ Top Auto 2441 Morse Road Columbus, OH 43224	Bad housekeeping on business lot. Oil and other fluids were spilled on the ground.	Spoke with both owners of the shared business and asked them to clean up the area. No violation at this time.
7/27/2015	Columbus Division of Water 910 Dublin Road Columbus, OH 43215	Heavy flow at outfall during drive-by tested high for chlorine.	Traced discharge to the area of 1393 Community Park Drive where it appeared some digging had been done recently. Called City Leak Detection and repair made.
7/28/2015	Mya's Fried Chicken/Dock 580 580 North Fourth Street Columbus, OH 43215	Grease entering the curb and inlet due to poor housekeeping procedures.	Told company to clean the inlet and the gutter. Checked back on 7/31/2015 and the grease in the gutter and inlet was cleaned up. NOV-RAP 8/19/2015.
7/28/2015	Eldin S Rector 5126 Thornhill Court, Grove City OH 43123	Illicit discharge tracked to defective septic system located within the County but enters Columbus MS4.	Turned over to Dan Sinclair Franklin County Public Health, who inspected system on 7/29/15 and issued a violation.
7/29/2015	GFS Chemical 851 McKinley Avenue Columbus, OH 43222	Complaint of white smoke coming from the catch basin.	Investigated and sampled. No violation of City Code 1145.86.
7/30/2015	Columbus Division of Water 910 Dublin Road Columbus, OH 43215	Dry weather sample tested high for chlorine.	Discharge was tracked to a black corrugated pipe that appeared to drain the curb line of Freedom Trail heading north. Called City Leak Detection and reported the discharge.
7/30/2015	Chardon Labs Inc. 7300 Tussing Road Reynoldsburg, OH 43068	Discharge from private sewage treatment system to the storm sewer with high ammonia level and odor. Employees at the business were not able to produce records of the system or maintenance.	Positive dye test confirmed connection to the storm sewer. Notified City Health Department.
7/31/2015	Columbus Division of Water 910 Dublin Road Columbus, OH 43215	Dry weather sample tested high for chlorine.	Discharge was tracked to a black corrugated pipe that appeared to drain the curb along Dewbourne Drive. Called City Leak Detection and repaired.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
8/5/2015	Raising Cain's Restaurant 3820 South Hamilton Road Columbus, OH 43232	Power washing parking lot without inlet protection.	The Manager was informed that power washing activity was to cease until proper inlet protection was in use. He received a copy of City Code 1145.86. NOV-RAP 8/28/2015.
8/7/2015	Unknown	A vehicle was leaking some oil on the ground in the street. Car was not on the street during the investigation.	Used absorbent to clean up the street. Applied curb markers and passed out educational material in the area.
8/12/2015	Ramco Pearson 1675 West Lane Avenue Upper Arlington, OH 43221	Sanitary overflow from private lateral cleanout going to storm sewer.	Business shut off water, called plumber to open lateral and clean storm line where sewage entered. Did not reach outfall.
8/17/2015	Unknown	Paint spilled in front of a stormwater inlet. A witness said a truck dropped the paint bucket when it turned the corner and hit the curb.	No witness was able to give enough information to identify a responsible party. City cleaned up the paint.
8/17/2015	Multiple houses Alton-Darby Creek	Multiple septic tank failures and illicit connections caused an illicit discharge in City MS4. Houses located in Franklin County.	Turned findings over to Franklin County Public Health for investigation.
8/20/2015	Detailed Solutions 5666 Westbourne Avenue Columbus, OH 43213	Employee was seen washing vehicle with no inlet protection.	Explained City Code and proper use of inlet protection. Returned on 8/28/15 and found proper inlet protection in use. NOV-RAP 9/18/2015.
8/20/2015	Affordable Granite LLC 5664 Westbourne Avenue Columbus, OH 43213	Cutting granite countertops inside a building with no drains. Wastewater discharged to outside storm inlet with no protection.	Explained the violation and City Code 1145.86 and distributed the same. NOV-RAP 9/4/2015.
8/24/2015	Lifestyle Communities 230 West Street Suite 200 Columbus, OH 43215	Pump out of sediment laden water from a basin at a construction site, hose was placed in a catch basin.	Project Manager admitted the violation. Explained City Code 1145.86. NOV-RAP 10/6/2015.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
8/26/2015	Shelly and Sands 1515 Harmon Avenue Columbus, OH 43223	Contractor using a pump to drain the basin without a silt sock, discharging to storm.	Had them stop the discharge. Contractor put a silt sock on the discharge line. NOV-RAP 9/23/2015.
8/26/2015	The Place is Clean 2167 Safford Avenue Columbus, OH 43223	Company reportedly cleaned the carpets at 1392 Boswall and then dumped his tank into a catch basin.	Turned findings over to The Franklin County Environmental Crimes Unit for resolution.
8/26/2015	Mr. Kelby Neal 1379 Penfield Road Columbus, OH 43227	Vehicle leaks and reported dumping of fluids from several cars in front of 1679 Penfield. Staining evident in the curb and the inlet. Mr. Neal denied dumping any fluids.	Explained City Code 1145.86 to Mr. Neal. Ordered the cars to be moved from the street and had Street Maintenance sweep the curb and City clean the storm sewer.
8/27/2015	Spaghetti Warehouse Restaurants Inc. 397 West Broad Street Columbus, OH 43215	Sloppy housekeeping around grease bin and improper disposal of mop water in the parking lot. Did not reach storm sewer.	Had company clean up grease bin area and distributed educational materials.
8/27/2015	Countertop Sales 5767 Westbourne Avenue Columbus, OH 43213	Employees at this address wash down the floors at the end of the day. The resulting flow went to the catch basin.	Explained City Code 1145.86 to owner who received copy of same. Returned on 8/31/15 and the area was cleaned. NOV-RAP 10/5/2015.
9/1/2015	Ohio Heating 1324 Clara Avenue Columbus, OH 43221	Company drained boiler system into a sump that pumps to the storm sewer. Technician admitted doing it.	Told them that this is considered an illicit discharge, gave them a copy of City Code 1145.86. NOV-RAP 10/30/2015.
9/2/2015	Unknown	Something was dumped into the private catch basin at 2650 North High Street.	Spoke to CSL Plasma, gave them an educational packet with City Code 1145.86. Unable to determine origin of source, cleaned up the catch basin.
9/8/2015	Advanced Commercial Roofing 1924 North Elm Street, Muncie, IN 47303	Contractor put reflective coating on roof. The overspray had a metal glitter look to it. Overspray was on the sidewalk and the back lot. No evidence of reaching storm sewer.	Talked to Advanced Commercial Roofing. Told them to clean up the area. Area cleaned-up. Gave them a copy of City Code 1145.86.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
9/10/2015	Unknown	Report of green water with a sewage odor laying in the street on Dublin-Granville Road. Found water with some green algae on it between the median strip and the west edge of the road on Strawberry Farms heading southbound.	Water did not have any sewage color or odor and flow was too low to test. Talked to City Leak Detection, they have been onsite and the flow was not City water.
9/10/2015	Unknown 1025 Oak Street Columbus, OH 43205	Report of car fluids from a red Chevy Blazer on the ground and in the curb.	Vehicle was not observed but there was an oil spot about three feet wide. According to a nearby resident, the vehicle in question was towed the day before. We cleaned up the residual oils using Oil-Dri.
9/13/2015	Homeowner 5016 Delwanda Avenue Columbus, OH 43214	Washing machine hooked to a floor drain that went to the storm sewer. Dye test confirmed connection.	Told homeowner to disconnect and reroute washer to sanitary line. On 11/30/2015 follow-up visit confirmed washing machine discharge was connected to the sanitary. NOV-RAP 11/30/2015.
9/16/2015	Precision Sitework 2580 Groveport Road Columbus, OH 43207	Complaint of muddy water flooding a resident's backyard. Construction contractor on the site next door was trying to move muddy water with a piece of equipment and it escaped the site through a gap in the silt fence.	No evidence of a discharge in the MS4 or the outfall. We spoke with the onsite foreman and requested that he repair this gap.
9/23/2015	Unknown 41 South High Street Columbus, OH 43215	Complaint of dumping in a catch basin. Nothing out of the ordinary in the catch basin.	Curb markers were placed on the catch basins in the area. Follow-up on 09/24/2015. No evidence of dumping.
9/28/2015	Barr Engineering, Inc. 5710 Westbourne Avenue Columbus, OH 43213	Power washing a company truck without inlet protection allowed wash water to enter the storm sewer.	Explained the violation and City Code 1145.86. Distributed educational material. Cleanup was performed immediately. NOV-RAP 10/9/2015.
9/30/2015	Amer Al Ahmad 15300 Lake Avenue Lakewood, OH 44107	Fifth wheel RV camper parked over an inlet with the waste discharge hose draining into the inlet.	RV camper was removed. Left educational material with the Property Manager for the owner and a copy of NOV on 11/10/2015 and 11/13/2015.
10/5/2015	Mr. William Kirk 238 Edgevale Road Columbus, OH 43209	Complaint of raw sewage being pumped to the street curb with a portable pump. A house resident admitted pumping but denied the water he pumped from the basement was sewage.	The resident at home denied access to the house and thus no evidence of the discharge could be observed. Distributed City Code 1145.86. Notified Columbus Health and Code Enforcement of the issue.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
10/6/2015	Birchwood Foods 1821 Dividend Drive Columbus, OH 43228	Tank in pretreatment area had a failed valve causing grease to get into stream. When pretreatment was shut down, production was causing system to surcharge and overflow into storm sewer.	When we arrived, clean up was in progress. O. E.P.A. was on site directing cleanup of stream. Contractor cleaned private and City storm assets. NOV-RAP 12/1/2015.
10/19/2015	City of Columbus, Division of Water 910 Dublin Road Columbus, OH 43215	18 inch water main broke in front of 1631 Oakhill and chlorinated water and silt entered the storm sewer in Upper Arlington.	Division of Water was on scene and put the leak in as an emergency repair for 10/20/2015.
10/21/2015	Mr. Don Whaley 5049 Shannonbrook Drive Columbus, OH 43221	Car repair on the street caused a leak of transmission fluid. The fluid was on the asphalt, but had not migrated from the original spill site.	Requested clean-up of fluids. Distributed City Code 1145.86 and educational material. Follow-up on 10/23 confirmed clean-up was done.
10/21/2015	Homeowner 2611 Spaatz Avenue Columbus, OH 43204	Broken line from kitchen sink to stack causing kitchen sink water to go to the sump pump.	Told them to have sewer contractor fix pipe. Follow up on 10/22/2015, private sewer was repaired.
10/27/2015	Fas Lube 4844 North High Street Columbus, OH 43214	The employees used an old, clean oil drum to mark a catch basin that was caving in so customers would not drive into the hole.	We moved the barrel from the catch basin and used caution tape to mark the private storm structure failure. Called owner and notified them.
10/30/2015	Local Waste Services 1300 South Columbus Airport Road Columbus, OH 43207	Truck fire on I-70 between 3rd and High Street caused fuel to get into O.D.O.T. storm line. Did not reach City assets.	O.D.O.T. was already on site with cleanup. Fuel was contained in the inlet.
11/2/2015	Ruscilli Construction 5000 Arlington Centre Boulevard Suite 300, Columbus, OH 43220	Pumping out construction area without silt sock and discharging into storm sewer.	Explained City Code 1145.86 and told them to stop and put sock on the discharge. Gave our findings to City Sediment and Erosion Section.
11/3/2015	Elon Property Management 3155 Harshmann Drive Reynoldsburg, OH 43068	Massive algal bloom died as fall cooling temperatures caused turnover in the pond.	No violation since this is a private retention pond, there was no flow to the City sewer, and it was a result of a natural process.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
11/3/2015	Homeowner 2390 Kilbourne Avenue Columbus, OH 43229	Septic tank with aerator draining directly to storm sewer. Called out to sample.	Unable to test, no flow at the current time. Called Health Department for inspection and they notified us that the house is scheduled to connect to the sanitary in January 2016.
11/14/2015	Unknown	Report of an man dumping five gallons of oil into a curb drain. We found an unknown quantity of oil inside the inlet.	Environmental Enterprise Incorporated called for clean-up. Completed on 11/16. Placed a curb marker on the inlet.
11/20/2015	Ernst Concrete 711 Stimmel Road #A Columbus, OH 43223	Truck #842 finished a pour at 251 Orchard Lane and washed his chute out over the guard rail and into the woods at the end of Orchard Lane.	No concrete was in our assets, called Ernst and had them clean up concrete in the woods. Clean-up was completed 11/24/15.
11/20/2015	Ohio Mulch 1600 Advance Avenue Columbus, OH 43207	O.E.P.A. conducted inspection at the business and found water flowing from the settling pit onsite into the storm sewer. They took samples of the water with them for further analysis.	No discharge when City arrived. Employees had turned on the pumps and were moving water in the concrete pit to the retention pond.
11/23/2015	Thayer Power and Communication 116 Cypress Street Reynoldsburg, OH 43068	Muddy water from boring operations entered the catch basin. Power washing of road surface was also observed.	Violation was stopped and we explained City Code 1145.86 and educational materials. Clean-up completed 11/23/2015. NOV-RAP 12/16/2015.
11/24/2015	Taqueria El Buen Sazon 5615 Cleveland Avenue Columbus, OH 43231	Food service truck was dumping grease into a catch basin.	Explained the violation and gave a copy of City Code 1145.86. Told to have sewer cleaned by a professional company. Follow up on 11/30/15, confirmed clean-up. NOV-RAP 1/8/2016
12/1/2015	Alum Creek and 104 Topsoil 2480 Alum Creek Drive Columbus, OH 43207	Tracking of mud onto the street.	Explained City Code 1145.86 to them. Clean-up was in progress when we arrived. Told them they should look into improving their controls. NOV-RAP 1/15/2015
12/3/2015	Rufus Hancock, Homeowner 1603 East Whitter Street Columbus, OH 43206	Pumping of an excavation during a repair of a water service to a residential duplex.	Explained violation and City Code 1145.86. Pumping had just finished and was not resumed. The curb and street were cleaned.

2015 Illicit Discharge Investigation Summary

Date Reported	Name / Company Address	Cause	Resolution
12/4/2015	Church's Chicken 4375 Refugee Road Columbus, OH 43232	Grease interceptor had overflowed into the parking lot.	Spoke to Manager and told him to clean-up the parking lot. Product did not reach storm sewer.
12/4/2015	Unknown	White substance in the stream at Busch Park.	Discharge had stopped. Unable to trace source.
12/7/2015	Professional Truck Wash 4255 Roberts Road Columbus, OH 43228	Housekeeping issues around the dumpster. Nothing reached the storm sewer.	Told an employee to sweep up around the dumpster area and gave a copy of City Code 1145.86. Cleaning was completed before we left site.
12/9/2015	Unknown	A resident in the area reported a white substance in Big Walnut Creek.	Checked the creek in the area described by the resident and found nothing of concern.
12/11/2015	Miken Terminals 3973 Fisher Road Columbus, OH 43228	Complaint stated that the company is dumping antifreeze.	This area is in Franklin County. Did not see any evidence of dumping.
12/14/2015	SJT Depot 2692 Fisher Road Columbus, OH 43204	Runoff from firefighting. pH of water was neutral, drainage went to a private storm system then to State waters.	Firefighting is a permissible discharge. This was a large warehouse fire that was mainly skids and cardboard.
12/23/2015	Coughlin Investments Ltd. 6493 East Main Street Reynoldsburg, OH 43068	A hole in the bottom of the dumpster caused liquid to leak from the dumpster and onto the ground.	Nothing entered the sewer. Called the property owner, explained City Code 1145.86. Asked owner to replace the dumpster. Dumpster was replaced.
12/30/2015	MCSP, Inc. 7740 Reinhold Drive Cincinnati, OH, 45237	Outdoor washing of equipment caused concrete slurry to enter the private storm sewer.	Notified MCSP of violation of City Code 1145.86. MCSP cleaned the private storm sewer system. Discharge did not enter the MS4. NOV-RAP 1/26/2016

Comments: Diesel spill from a semi truck entered into private storm sewer in rear of 2600 International St. at inlet # 0222T0125 and was contained to the north in inlet # 0222T0123. EPA was on site and just wanted to make sure private storm sewer did not enter into City sewers, which it does not. EPA said there was no need for Pre-treatment or Storm Water sections to come out. Clean up was being handled by Clean Harbors, Inc. No further work.

Comments: There was no spill found at Eldorado dr and highridge Dr. Per the actual 311 complaint this was called out to the street maintenance on 2-12-2015. They sent it back to 311 and when we were dispatched out on 2-17-2015 there was no spill detected. The street was covered with snow and ice. We checked inlet numbers # 0097410434, 10514, 10433 found no sign of anything in the inlets. No further work is needed

Comments: Fire Dept called, there was a van that was leaking gas and they were concerned about it going to the storm drain. There was less than 20 gallons leaked out and was contained by CFD and did not reach the storm drains. CFD also put down oil dry in all affected areas where gas was leaking.

Comments: Assisted EPA with location of storm drains. All the storms in the area lead to an outfall in the rear of the Anderson Concrete Plant. We assisted the EPA by placing a temporary boom across outfall. When we left an environmental company was in route to install permanent booms. Chris from EPA did inquire if he could obtain a hard copy of our maps.

Comments: Chris from EPA called to inquire about a substance in the stream in the rear of 2240 Green Island Dr. Upon arrival the water was cloudy, but looked as if it were soil runoff. We checked the stream to Roberts Rd. where it was clear. We also check every pipeend leading to the stream and saw no apparent problems. I spoke with Chris again and he stated the the caller, called repeatedly. I explained to him what we saw and what it looked like and he agreeded it seem like dirt runoff, and then thanked us for our help. We concluded our investigation at this time.

Comments: We did see an area that looked like there was dumping of oil or something like that. Spoke with T Hedges and he informed EPA of our findings, and they were going to send someone to investigate the location. We checked the closest storm sewer to location and found that no oil was in the sewer.

<p>Comments: There was a deisel fuel spill on the 315 south bound on ramp> 100 gallons of fuel spilled. At the east side of ramp some fuel went down the hill but was contained in a low spot. No fuel made it into culvert pipe#0009t1007. Inlet #0009t1008 was full of debris so the fuel that made it into inlet was contained. It did contaminate the debris in inlet. Etlles tow ing did most of the cleanup. Epa was on site and had a diffrent contractor do the cleanup on the hill side and they dug out 3 ft of the inlet to remove the contaminated debris. WE called for a vactor truck to vact out the rest of inlet and to jet the line to open the storm sewer to allow water flow . Epa was happy with the cleanup and no further work is needed at this time. Mike foster was notified by Mr. Paul Fannin</p>

<p>Comments: YSSO5 – The sump pump discharge at 7474 Bethel RD was due to the private service connection being stopped. The 8 inch City sanitary sewer was open between upstream manhole # 0296s0378 and downstream manhole # 0296s0380. The sewage entered the storm system at inlet basin/ditch number 0296T1353. Attempts to contain the sewage had micro center shut restrooms off were successful. The overflow ended at 12:40 08/12/2015. Mike Foster was notified by phone at 13:05 08/12/2015. Also Mike Foster called Storm water out to location.</p>

Comments: NEC CB Asset # 0127T0786. Someone dumped approximately 5 gallons of white paint into a CB, NEC of Tibet Rd and Findley Ave. Referred to Stormwater, Mr. Merz and Mr. Conrad responded to investigate. Power cleaning declined clean up due to Hazmat concerns. Stormwater should make arrangements for cleaning by Hazmat contractor.
Mr Bertacchi, Industrial Pretreatment Manager, approved disposal of this paint vacced from CB.

Comments: At location, we found nothing being pumped into the storm sewer. We spoke with Glenna at permits, and the location has not tapped in the main line as of yet. She did inform us that the location was on the list from the health department to be ordered to hook up, but nothing as of yet has happened. Will have the storm sewer TV'ed to see if there is any leaching from the septic tank to the storm. We did have faint odor down stream from location, and will have storm water retrieve a sample of the water in the storm sewer as well.

Final - 2015 NPDES Stormwater Sampling Summary

Three City – Owned Outfalls

Introduction

The report titled *2015 NPDES Stormwater Sampling Summary – Three City-Owned Outfalls* is being prepared in fulfillment of requirements set forth in the City of Columbus’ MS4 Permit, OEPA Permit No. 4PI00000*CD. The permit requires implementation of a Wet Weather Monitoring Program (the program), including annual reporting and evaluations of the program through the five-year permit cycle. This annual report provides an evaluation of the data collected in 2015 in comparison with national stormwater data and the City of Columbus wet weather sampling data from 2007 – 2014.

This report summarizes monitoring and water quality sampling activities for 2015, which is the ninth program year (year four of the second permit cycle.) Results from each of the last eight program years have been incorporated into the various summary tables throughout this report. **Table 1**, below, represents a summary of the previous reports submitted under permit Nos. 4PI00000*BD and 4PI00000*CD.

Table 1 – Summary of Program Reports

Permit No.	Calendar Year	Permit Year	Report Date
4PI00000*BD	2007-2011	1-5 (4PI00000*BD)	March 7, 2012 (final report)
4PI00000*CD	2012	1 (4PI00000*CD)	February 18, 2013
4PI00000*CD	2013	2	February 25, 2014
4PI00000*CD	2014	3	January 30, 2015
4PI00000*CD	2015	4	February 2016
4PI00000*CD	2016	5	TBD

The City’s consulting engineer was able to collect samples during all four quarters of 2015. Analyses of all samples were performed by MASI Environmental Laboratories and the Columbus Surveillance Laboratory. Each laboratory analyzed the samples with regard to the parameters summarized in **Table 2**.

Table 2: Summary of Laboratory Parameter Responsibility

MASI Environmental Laboratory		
Parameter	Abbreviation	Unit of Measure
Fecal Coliform	-	# / 100 ml
E. Coli	-	# / 100 ml
Nitrite	NO ₂	mg / l
Total Phosphorous	-	mg / l
Orthophosphate	-	mg / l
Carbonaceous Biochemical Oxygen Demand	CBOD ₅	mg / l
Biochemical Oxygen Demand	BOD ₅	mg / l
Chemical Oxygen Demand	COD	mg / l
Columbus Surveillance Laboratory		
Parameter	Abbreviation	Unit of Measure
Total Suspended Solids	TSS	mg / l
Ammonia	NH ₃	mg / l
Alkalinity	-	mg / l
Oil and Grease	-	mg / l
Total Cyanide	-	µg / l
Hardness	-	mg / l
Total Recoverable Cadmium	Cd	µg / l
Total Recoverable Chromium	Cr	µg / l
Total Recoverable Copper	Cu	µg / l
Total Recoverable Lead	Pb	µg / l
Total Recoverable Nickel	Ni	µg / l
Total Recoverable Zinc	Zn	µg / l

Stormwater Pollutant Sources

Stormwater pollutants monitored for the Columbus program are often released by materials or products used in construction, transportation, manufacturing, and in residential areas. For example:

- Galvanized roofs and gutters, paint, and tires are common sources of zinc;
- Brake pads, antifreeze, and pesticides are possible sources of copper;
- Burning fuels and batteries are common sources of cadmium;
- Fertilizers, detergents, and organic matter are common sources of nitrogen; and
- Pets, wildlife, and failing home septic systems are common sources of bacteria.

It is important to note that there can be many different sources that contribute to the level of pollutants in stormwater.

Sampling Locations

During program years 1-6, five sampling locations throughout the City representing medium density residential, high density residential, multi-family residential, commercial, and industrial land uses were used in the program. The wet-weather water quality data from these sites were thoroughly analyzed and reviewed. In an effort to further characterize overall water quality of the City's MS4, the City requested (and received approval) that Ohio EPA allow establishment of three new sampling locations representing **residential, commercial, and industrial** land uses. In 2013 the City began using these newly established sampling locations in lieu of the previous five locations reported in years past. **Table 3**, below, presents a summary of the land use, tributary acreage, and location of these three outfalls sampled.

Table 3: Summary of City Sampling Locations

Site	Land Use	Tributary Area (ac)	Location	Manhole (Structure) ID
OF-01-CD	Industrial	15	Dearborn Drive	0744T0035
OF-02-CD	Commercial	16	Scarborough Boulevard	0394T1216
OF-03-CD	Residential	16	Creighton Place & Arrowsmith Drive	0477T0395

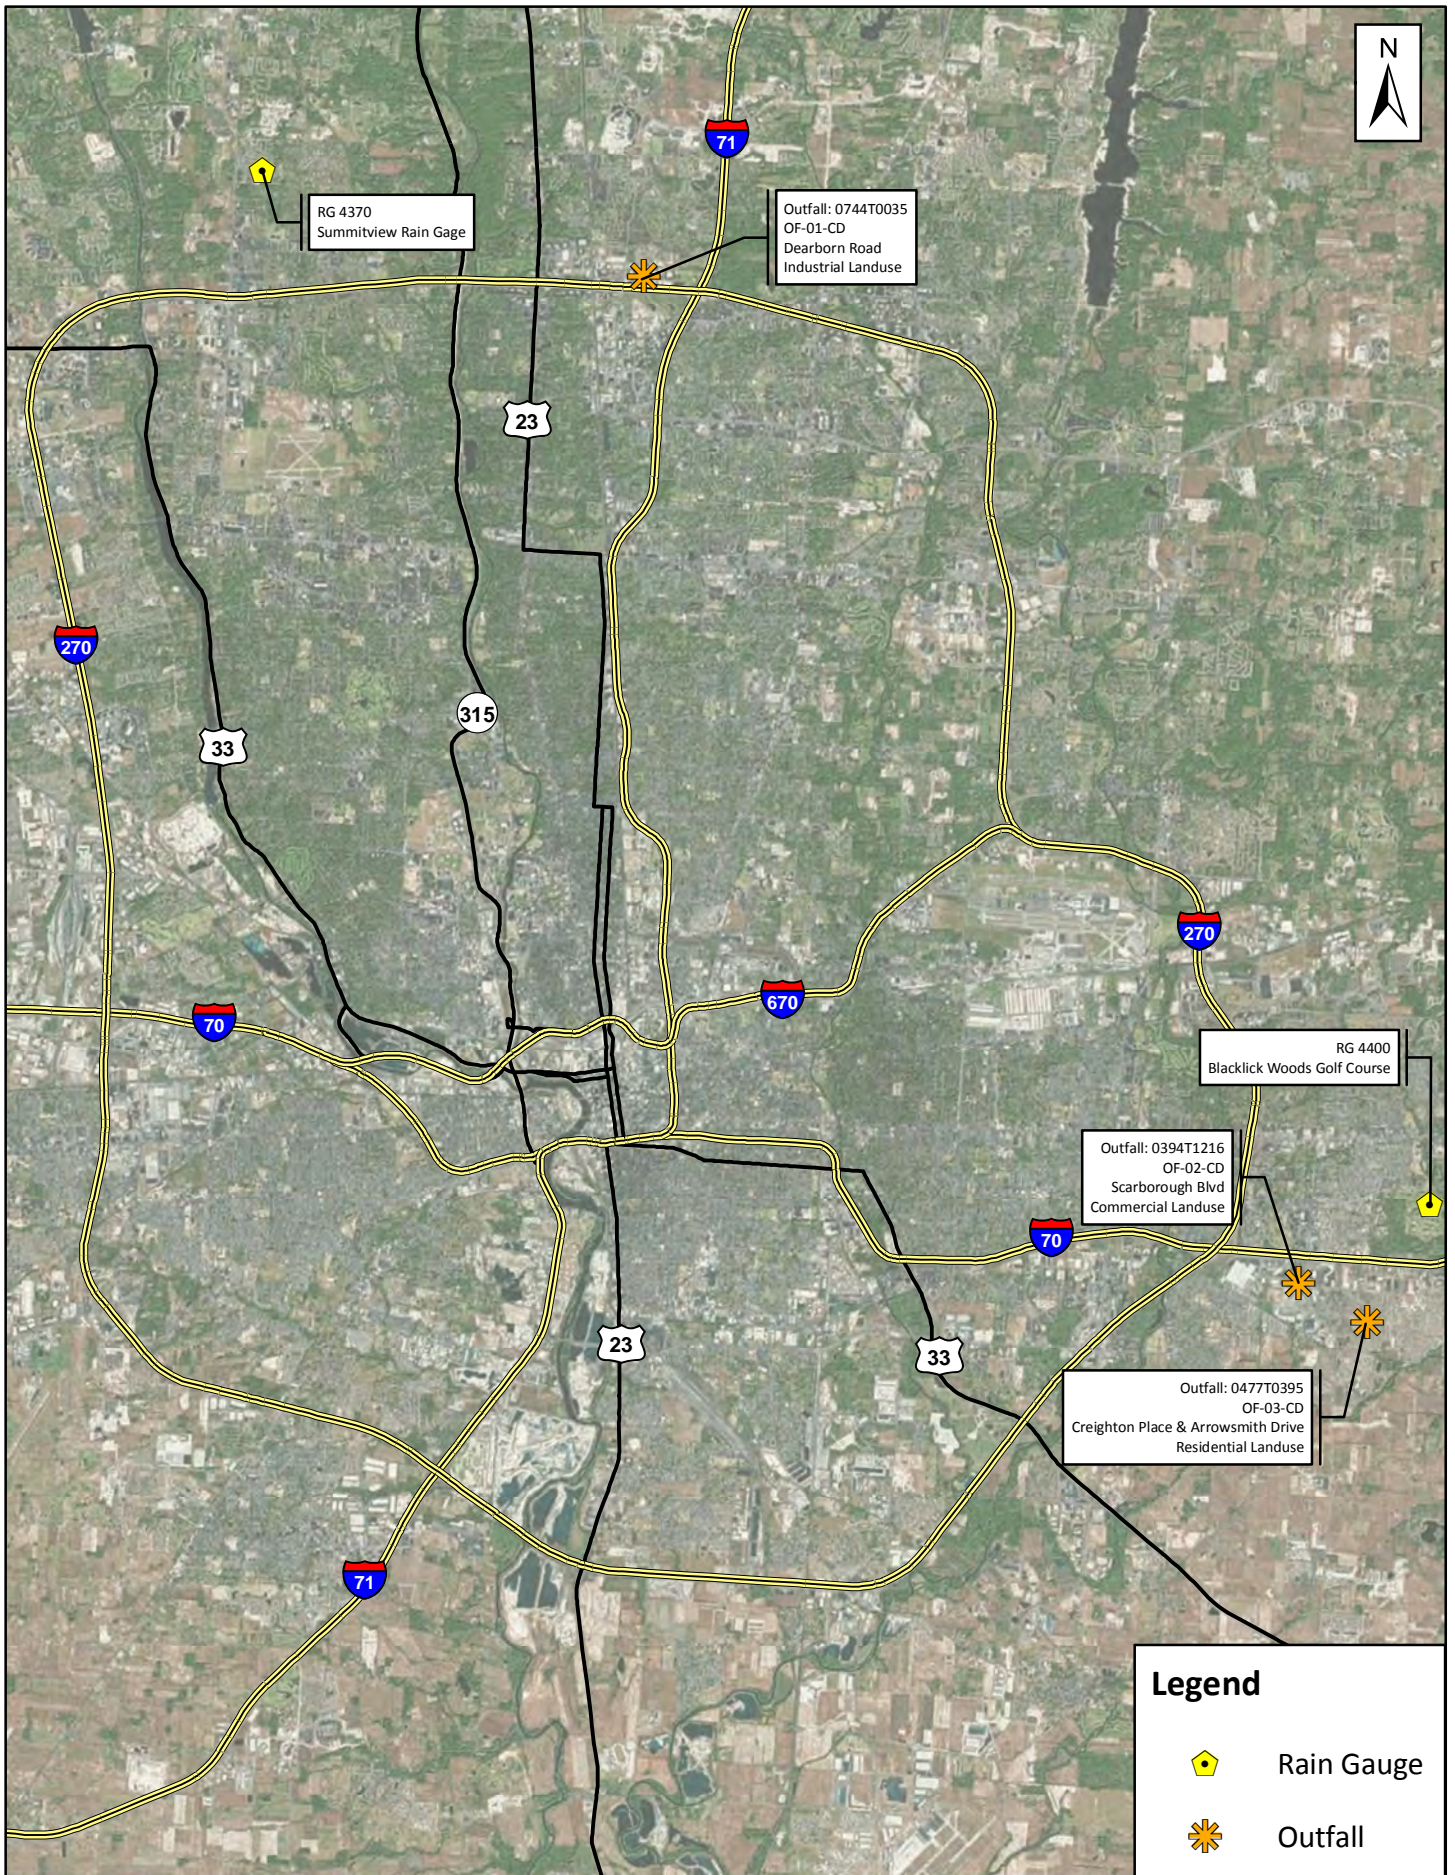

Description of Sampling Locations

Figure 1 illustrates the location of each sampling site as well as the nearest rain gauge. Each sampling site is described in further detail below:

OF-01-CD: This sampling point is located near Dearborn Drive approximately 550-feet southeast of Worthington Galena Road. The stormwater monitored at this location comes from a tributary area of approximately 15 acres of industrial land use. Photos and a site map of this sample location are presented on **Figure 2**.

OF-02-CD: This sampling point is located off Scarborough Boulevard approximately 1000-feet south of Alshire Road. The stormwater monitored at this location comes from a tributary area of approximately 16 acres of commercial land use. Photos and a site map of this sample location are presented on **Figure 3**.

OF-03-CD: This sampling point is located near the northwest corner of the intersection of Creighton Place and Arrowsmith Drive. The stormwater monitored at this location comes from a tributary area of approximately 16 acres of residential land use. Photos and a site map of this sample location are presented on **Figure 4**.

Sampling Events and Rainfall Data

Rainfall event characteristics for each sampling event in 2015 were obtained from rain gauges located throughout the City. Rain gauges used for this program were selected based on their proximity to the established program sampling sites; and are illustrated in Figure 1. **Table 4** provides a summary of the dates when sampling occurred at each location during Quarters 1 through 4.

Table 4 – Summary of Sampling Events (by location)

Location	Quarter 1	Quarter 2	Quarter 3	Quarter 4
OF-01-CD	03/23/2015	05/26/2015	07/07/2015	11/06/2015
OF-02-CD	03/25/2015	05/26/2015	07/07/2015	11/06/2015
OF-03-CD	03/25/2015	05/25/2015	07/29/2015	11/06/2015

Rain events were selected based on the requirements outlined in the City of Columbus NPDES Stormwater Monitoring Project Quality Assurance Project Plan. **Table 5** provides a summary of the rain events during which sampling was performed. Hydrographs for these rain events are included in **Appendix A**.

Table 5 – Summary of Rainfall Data (by event date)

Location	Rain Gauge	Total Rain Volume(in)	Antecedent Period (day)	Duration (hrs)
Quarter 1				
OF-01-CD	RG 4370	0.24	5.0	1.8
OF-02-CD	RG 4400	0.20	5.1	1.1
OF-03-CD	RG 4400	0.20	5.1	1.1
Quarter 2				
OF-01-CD	RG 4370	0.28	9.2	3.1
OF-02-CD	RG 4400	0.75	8.1	6.4
OF-03-CD	RG 4400	0.75	8.1	6.4
Quarter 3				
OF-01-CD	RG 4370	1.08	6.8	7.9
OF-02-CD*	RG 4400	0.71	7.0	7.6
OF-03-CD	RG 4400	0.16	2.1	0.7
Quarter 4				
OF-01-CD	RG 4370	0.4	8.2	4.4
OF-02-CD	RG 4370	0.4	8.2	4.4
OF-03-CD	RG 4370	0.4	8.2	4.4

For the fourth quarter data, RG 4400 near sites OF-02-CD and OF-03-CD did not record a rain event. This is most likely due to a malfunction of the rain gage as other across the city recorded a similar value to RG4370, near OF-01-CD. Therefore for fourth quarter data RG 4370 has been used in place of RG 4400.

Also in the fourth quarter at site OF-03-CD, flow data was not available due to possible sensor malfunction. Therefore a flow weighted composite was not able to be calculated, and event composite was prepared in its place.

NPDES Wet Weather Sampling Results

This section presents data for each sampled quarter in 2015 as analyzed by MASI Environmental Laboratory and the Columbus Surveillance Laboratory. These values are reported for each location in **Tables 6 through 9** found in **Appendix B**. The quarterly event mean concentrations (EMC) for each sampling location were averaged to determine the annual mean for each of the sampled parameters.

The EMC of a pollutant is defined as the total pollutant mass discharged during a runoff event divided by the total runoff volume. An estimate of the EMC is typically obtained from the analytical results of flow-weighted composite samples collected during a runoff event. Discrete grab water samples are collected throughout the duration of the runoff event and combined into a single composite sample based on the proportion of the total flow volume represented by each sample. The composite sample is sent to the laboratories for analysis with the results representing the EMC. In cases where no flow data is available, for example due to equipment malfunction, the event composite sample is prepared and analyzed with time-weighted compositing, and EMC concentrations are estimated from that sample. The flow-weighted/time-weighted composite calculations for each site and sampling event are included in **Appendix C**.

Each discrete grab sample is analyzed individually. The results are mathematically combined into a single value representing the EMC based on the proportion of the total flow volume represented by each grab sample. Individual results of the grab samples and calculations of the flow weighted bacteria EMC values based on the grab samples are included in **Appendix D**.

A few of the analytical results indicate that measurements were less than the value which can be routinely detected and reported by a laboratory. These “non-detected” results are indicated with a “less than” (<) symbol preceding the number. This value is known as the practical quantification limit (PQL). When a result is below the PQL, the PQL is used to determine the average value. For example, samples were collected from OF-01-CD (Dearborn Road) during Quarters 1 through 4 (Table 6). The orthophosphate values determined from the flow-weighted composite samples were <0.05 mg/L, 0.12 mg/L, 0.10 mg/L and <0.05 mg/L, respectively. These values are considered to be an EMC for orthophosphate for each event. The annual average (mean) of these values was determined by averaging 0.05, 0.12, 0.10 and 0.05 to get 0.08 mg/L, which is the annual mean orthophosphate EMC for OF-01-CD (Dearborn Road) in 2015.

Comparison of 2015 Wet Weather Monitoring Data

Evaluation of 2015 Columbus Monitoring Data

Table 9, also found in Appendix B, compares the average quarterly values of EMCs generated in 2015. Comparison of the 2015 data and average EMCs reveal the following observations:

- Concentrations of individual parameters varied by site and event as found in the results from previous years.
- Bacteria concentrations are significantly higher in the residential areas.
- Residential areas also exhibit lower levels of alkalinity.
- Total suspended solids are significantly higher in commercial areas.
- Zinc levels are significantly higher in industrial and commercial areas.

Evaluation of 2007-2015 Columbus Monitoring Data

Table 10, also found in Appendix B, compares the Program’s average annual EMC values for each parameter at each sampling location with that of past years’ of the program (note these are separated by land-use, however, as previously discussed, sampling locations from 2007-2012 are different than 2013 and 2014). Evaluation of this data reveals the following observations;

- The comparisons of 2015 data to 2014 data indicate that the mean values for the commercial and industrial sites are very similar for most parameters
- The comparisons of 2015 data for Fecal Coliform and E. Coli bacteria parameters, both, are generally significantly higher than previous years.
- Levels of Zinc in the industrial area (OF-01-CD) have been steadily increasing over the sampling period.
- Levels of Total Suspended Solids in the commercial area (OF-02-CD) have been steadily increasing over the sampling period.

Comparison of Columbus Monitoring Data to NSQD Values

National Stormwater Quality Database (NSQD) Version 3 was compared to the sampling results obtained from the three City of Columbus sampling locations to identify similarities and differences. NSQD includes a total of 8,602 rain events from 104 cities throughout the continental United States. A copy of the Version 3 database can be found at:

<http://rpitt.eng.ua.edu/Research/ms4/mainms4.shtml>

The comparison between the City’s data and NSQD was performed by creating box and whisker plots of the NSQD records. Box and whisker plots provide a graphical representation of data distribution by displaying the minimum, median, maximum, 25th percentile, and 75th percentile values for a given set of data. **Figure 5**, below, illustrates how to interpret the elements shown in box and whisker plots.

Box and whisker plots of the NSQD records were created for 17 parameters of interest, which included: ammonia, BOD₅, COD, total suspended solids (TSS), total phosphorus, fecal coliform, E. coli, hardness, oil & grease, orthophosphate, cadmium, chromium, copper, cyanide, lead, nickel, and zinc. Added to each plot were the City’s quarterly EMC 2015 sampling data, along with the mean values of the City’s combined 2007 through 2012 data and the mean value of the combined 2013 to 2014 data.

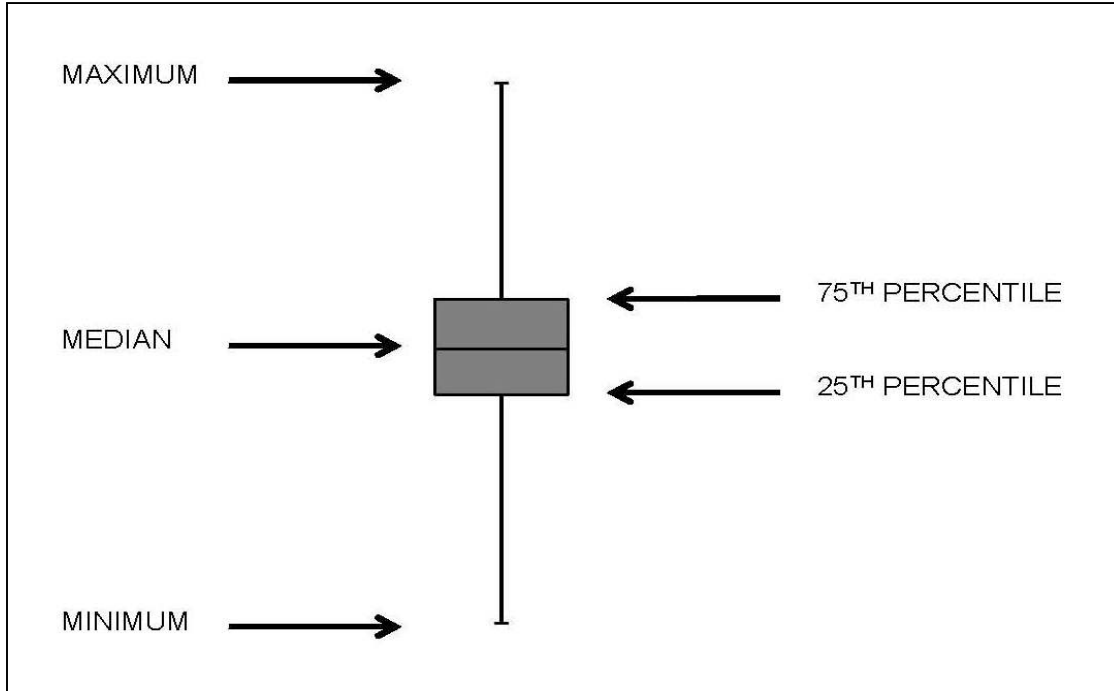

Figure 5 – Box and Whisker Plot Interpretation

Each of the three sampling locations was matched to a subset of the NSQD record set representing the same land use category. Each sampling location has been classified by land use, as described previously, and again summarized in **Table 12**, below.

Table 12 – Land Use Designation of Sampling Sites

Sampling Site	Land Use
OF-01-CD	Industrial
OF-02-CD	Commercial
OF-03-CD	Residential

The 2015 City sampling values, and nine-year program means, at all sampling locations are generally consistent with the NSQD data ranges represented by the box and whisker plots in **Appendix E**. There are a few exceptions:

- Fourth quarter Ammonia levels were higher than NSQD 75th percentile for all sites sampled.
- BOD levels in residential areas were higher than the NSQD 75th percentile.
- Analyte values for most parameters are consistently lower than the median and 25th percentile values of the NSQD data for each sampling site.
- Bacteria levels were significantly higher than the NSQD 75th percentile during the second and third quarters at each sampling location.

Not all parameters are represented in the box and whisker plots shown in Appendix D. CBOD₅, Alkalinity, and Nitrite are not included in the comparisons because less than 100 events were available within the NSQD.

Conclusions

Samples were collected and evaluated in a manner consistent with the QAPP established for this program, indicating that the program is yielding quality data useful in establishing a dependable database of stormwater measurements for future interpretation. On an annual basis, the reported lab data are evaluated with regard to plausibility, significant digits, and practical quantification limits. Each record is validated to assure that any laboratory, analytical, or field collection errors have been identified. Any records that are questionable have been reviewed prior to development of this report. Additionally, any records found to be inaccurate or false have been flagged (with explanation) or removed from the report.

The comparisons of 2015 data to 2014 data indicate that the mean values for bacteria, both Fecal Coliform and E. Coli, are significantly higher than previous years.

Levels of Zinc in industrial areas have been steadily increasing over the sampling period.

Levels of Total Suspended Solids in commercial areas have been steadily increasing over the sampling period

Analyte values for most parameters are consistently lower than the median and 25th percentile values of the NSQD data for each sampling site.

The overall stormwater quality, as characterized in the 2014 Wet Weather Monitoring Program, varies from event to event, site to site and year to year as demonstrated by the variation in mean values. This is a common trend in stormwater due to range of outside and local factors that can impact water quality such as precipitation, air quality, and variation in antecedent precipitation conditions between storms.
